## DEPARTMENT OF HOMELAND SECURITY

### Office of the Secretary

[Docket No. DHS-2011-0003]

#### Privacy Act of 1974; Department of Homeland Security Office of Operations Coordination and Planning—004 Publicly Available Social Media Monitoring and Situational Awareness Initiative System of Records

**AGENCY:** Privacy Office, DHS.

**ACTION:** Notice of Privacy Act system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security is giving notice that it proposes to establish a new Department of Homeland Security system of records titled, "Department of Homeland Security Office of Operations Coordination and Planning—004 Publicly Available Social Media Monitoring and Situational Awareness Initiative System of Records." The Office of Operations Coordination and Planning (OPS) National Operations Center (NOC), has launched and leads the Publicly Available Social Media Monitoring and Situational Awareness (Initiative) to assist the Department of Homeland Security (DHS) and its components involved in fulfilling OPS statutory responsibility to provide situational awareness. The NOC and participating components may share this de-identified information with international partners and the private sector where necessary and appropriate for coordination. While this Initiative is not designed to actively collect Personally Identifiable Information (PII), OPS is publishing this System of Records Notice (SORN) because the Initiative may collect PII for certain narrowly tailored categories. For example, in the event of an *in extremis* situation involving potential life and death, OPS will share certain PII with the responding authority in order for

them to take the necessary actions to save a life, such as name and location of a person calling for help buried under rubble, or hiding in a hotel room when the hotel is under attack by terrorists. In the event PII comes into the Department's possession under circumstances other than those itemized herein, the NOC will redact all PII prior to further dissemination of any collected information. This collection is currently covered under DHS/OPS-003 but in order to provide more transparency, DHS is issuing a specific SORN for this activity. This newly established system will be included in the Department of Homeland Security's inventory of record systems.

**DATES:** Submit comments on or before March 3, 2011. This new system will be effective March 3, 2011.

**ADDRESSES:** You may submit comments, identified by docket number DHS-2011-0003 by one of the following methods:

#### SUPPLEMENTARY INFORMATION:

##### I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) Office of Operations Coordination and Planning (OPS), including the National Operations Center (NOC), proposes to establish a new DHS system of records titled, "DHS/OPS-004 Publicly Available Social Media Monitoring and

Situational Awareness Initiative System of Records."

This system of records will allow DHS/OPS, including the NOC, to provide situational awareness and establish a common operating picture for the entire federal government, and for state, local, and tribal governments as appropriate, and to ensure that critical disaster-related information reaches government decision makers. See Section 515 of the Homeland Security Act (6 U.S.C. 321d(b)(1)). The law defines the term "situational awareness" as "information gathered from a variety of sources that, when communicated to emergency managers and decision makers, can form the basis for incident management decision-making." OPS has launched and leads this Initiative to fulfill its legal mandate to provide situational awareness and establish a common operating picture. In doing so, OPS is working with select components within the Department to achieve this statutory mandate. This collection is currently covered under DHS/OPS-003 but in order to provide more transparency, DHS is issuing a specific SORN for this activity.

The NOC will use Internet-based platforms that provide a variety of ways to follow activity related to monitoring publicly available online forums, blogs, public websites, and message boards. Through the use of publicly available search engines and content aggregators the NOC will monitor activities on social media for information that the NOC can use to provide situational awareness and establish a common operating picture. The NOC will gather, store, analyze, and disseminate relevant and appropriate de-identified information to federal, state, local, and foreign governments, and private sector partners authorized to receive situational awareness and a common operating picture. Under this initiative, OPS generally will not: (1) Actively seek personally identifiable information (PII); (2) post any information; (3) actively seek to connect with other internal/external personal users; (4) accept other internal/external personal users' invitations to connect; or (5) interact on social media sites. However, OPS is permitted to establish user names and passwords to form profiles and follow relevant government, media, and subject matter experts on social media sites in order to use search tools under established criteria and search terms for monitoring that supports providing situational awareness and establishing a common operating picture. Furthermore, PII on the following categories of individuals may be collected when it lends credibility to the

report or facilitates coordination with federal, state, local, tribal, territorial, foreign, or international government partners: (1) U.S. and foreign individuals in extremis situations involving potential life or death circumstances; (2) Senior U.S. and foreign government officials who make public statements or provide public updates; (3) U.S. and foreign government spokespersons who make public statements or provide public updates; (4) U.S. and foreign private sector officials and spokespersons who make public statements or provide public updates; (5) names of anchors, newscasters, or on-scene reporters who are known or identified as reporters in their post or article or who use traditional and/or social media in real time to keep their audience situationally aware and informed; (6) public officials, current and former, who are victims of a transportation accident or attack and; (7) known terrorists, drug cartel leaders or other persons known to have been involved in major crimes or terror of Homeland Security interest, (e.g., mass shooters such as those at Virginia Tech or Ft. Hood) who are killed or found dead.

The NOC will identify and monitor only information needed to provide situational awareness and establish a common operating picture. The NOC will use this information to fulfill the statutory mandate set forth above to include the sharing of information with foreign governments and the private sector as otherwise authorized by law.

DHS is authorized to implement this program primarily through 6 U.S.C. 121; 44 U.S.C. 3101; Executive Order (E.O.) 13388; OPS Delegation 0104; and Homeland Security Presidential Directive 5.

This system has an effect on individual privacy that is balanced by the need to collect, plan, coordinate, report, analyze, and fuse homeland security information coming into and going out of OPS, including the NOC. Routine uses contained in this notice include sharing with the Department of Justice (DOJ) for legal advice and representation; to a congressional office at the request of an individual; to the National Archives and Records Administration (NARA) for records management; to contractors in support of their contract assignment to DHS; to appropriate federal, state, tribal, local, international, foreign agency, or other appropriate entity including the privacy sector in their role aiding OPS in their mission; to agencies, organizations or individuals for the purpose of audit; to agencies, entities, or persons during a security or information compromise or

breach; to an agency, organization, or individual when there could potentially be a risk of harm to an individual; and to the news media in the interest of the public. A review of this system is being conducted to determine if the system of records collects information under the Paperwork Reduction Act (PRA).

Consistent with DHS's information sharing mission, information contained in the DHS/OPS—004 Publicly Available Social Media Monitoring and Situational Awareness Initiative System of Records may be shared with other DHS components, as well as appropriate federal, state, local, tribal, territorial, foreign, or international government agencies. This sharing will take place only after DHS determines that the receiving component or agency has a verifiable need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice.

This newly established system will be included in DHS's inventory of record systems.

## II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR Part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to their

records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/OPS—004 Publicly Available Social Media Monitoring and Situational Awareness Initiative System of records. In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.
