

• To further explore findings obtained from quantitative studies. FDA will use focus group findings to test and refine their ideas but will generally conduct further research before making important decisions, such

as adopting new policies and allocating or redirecting significant resources to support these policies. In the **Federal Register** of November 30, 2010 (75 FR 74061), FDA published a 60-day notice requesting public

comment on the proposed collection of information. No comments were received. FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹

| Activity | Number of respondents | Annual frequency per response | Total annual responses | Hours per response | Total hours |
|------------------------------|-----------------------|-------------------------------|------------------------|--------------------|-------------|
| Focus Group Interviews | 1,440 | 1 | 1,440 | 1.75 | 2,520 |

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

Annually, FDA projects about 20 focus group studies using 160 focus groups with an average of 9 persons per group, and lasting an average of 1.75 hours each. FDA is requesting this burden for unplanned focus groups so as not to restrict the Agency's ability to gather information on public sentiment of its proposals in its regulatory and communications programs.

Dated: February 1, 2011.

Leslie Kux,

Acting Assistant Commissioner for Policy.
