What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What information collection activity or ICR does this apply to?

Affected entities: Entities potentially affected by this action are metropolitan planning organizations, local transit agencies, state departments of transportation, and State and local air quality agencies. Federal agencies potentially affected by this action include the Federal Highway Administration (FHWA), Federal Transit Administration (FTA), and EPA.

Title: Transportation Conformity Determinations for Federally Funded and Approved Transportation Plans, Programs and Projects

ICR numbers: EPA ICR No. 2130.04, OMB Control No. 2060–051.

ICR status: This ICR is currently scheduled to expire on May 31, 2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Transportation conformity is required under Clean Air Act section 176(c) (42 U.S.C. 7506(c)) to ensure that federally supported transportation activities are consistent with (“conform to”) the purpose of the state air quality implementation plan (SIP). Transportation activities include transportation plans, transportation improvement programs (TIPs), and federally funded or approved highway or transit projects. Conformity to the purpose of the SIP means that transportation activities will not cause or contribute to new air quality violations, worsen existing violations, or delay timely attainment of the relevant national ambient air quality standards (NAAQS or “standards”) or interim milestones.

Transportation conformity applies under EPA’s conformity regulations at 40 CFR Part 93, subpart A, to areas that are designated nonattainment, and those redesignated to attainment after 1990 (“maintenance areas” with plans

developed under Clean Air Act section 175A) for the following transportation related criteria pollutants: Ozone, particulate matter (PM_{2.5} and PM₁₀), carbon monoxide (CO), and nitrogen dioxide (NO₂). The EPA published the original transportation conformity rule on November 24, 1993 (58 FR 62188), and subsequently published several revisions. EPA develops the conformity regulations in coordination with FHWA and FTA.

Transportation conformity determinations are required before Federal approval or funding is given to certain types of transportation planning documents as well as non-exempt highway and transit projects.¹

EPA considered the following in renewing the existing ICR:

- Burden estimates for transportation conformity determinations in current nonattainment and maintenance areas for the ozone, PM_{2.5}, PM₁₀, CO, and NO₂ NAAQS, which made up EPA’s previous ICR (ICR # 2130.03);
- Federal burden associated with EPA’s adequacy review process for submitted SIP budgets that are to be used in conformity determinations;
- New start-up burden associated with learning to perform quantitative hot-spot analyses;
- New burden associated with using the MOVES model for conformity analyses;
- Efficiencies in areas doing conformity for multiple NAAQS; and,
- Differences in conformity resource needs in large and small metropolitan areas and isolated rural areas.

This ICR does not include burden associated with the general development of transportation planning and air quality planning documents for meeting other Federal requirements.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 7 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently

¹ Some projects are exempt from all or certain conformity requirements *see* 40 CFR 93.126, 93.127, and 93.128.

changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: This ICR estimates that approximately 174 Metropolitan Planning Organizations will incur burden associated with transportation conformity requirements.

Frequency of response: The information collections described in this ICR must be completed before a transportation plan, TIP, or project conformity determination is made. Per SAFETEA-LU and DOT's planning regulations, transportation plans and TIPs must be updated at least every 4 years. Conformity determinations on projects in metropolitan and isolated rural areas are required on an as-needed basis.

Estimated total average number of responses for each respondent: 392.

Estimated total annual burden hours: 68,282 hours.

Estimated total annual costs: \$4,014,663. This includes an estimated burden cost of \$4,014,663 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

There is an increase of 19,043 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's adjustments associated with the actual number of 2006 PM_{2.5} NAAQS nonattainment areas versus the estimated number in the previous ICR, adjustment for increased burden associated with quantitative hot-spot analyses and an adjustment for increased burden associated with the transition from the MOBILE6.2 to MOVES model.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the

approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
