

Frequency

Most companies administer their security awareness training curriculum on an annual or bi-annual cycle. Typically, companies will generate quarterly or annual reports on employee training progress. At other companies, employees may receive training periodically as needed and submit feedback via the evaluation form between one and four times per year, which TSA equates to an average frequency for this collection of two times per year. Thus, company employees would provide TSA feedback approximately once every two years.

Out of the approximately 75,000 individual hazmat motor carrier and shipper companies, TSA estimates that approximately 75 percent of the companies that receive the CD-ROM training will incorporate it into their training plans. This number can be assumed due to the current DOT requirement (49 CFR 172.704) for certain hazmat motor carriers and shippers to conduct security awareness and in-depth training for their hazmat employees. TSA assumes that 50 percent of those who take the training will provide feedback on the training program. TSA estimates the average hour burden per response per shipper/carrier company employee will be approximately 20 minutes. TSA estimates the total annual hour burden will be dependent on the number of company employees that participate per motor carrier/shipper company. Therefore, TSA estimates that the maximum total annual hour burden will be approximately 16,667 hours per year for all motor carrier/shipper industry participants [50,000 employees × 20 minutes = 16,667 hours].
