SUPPLEMENTARY INFORMATION:

Background.—In October 2007, the Commission determined that revocation of the antidumping duty order covering certain welded large diameter line pipe from Mexico would not be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time. On April 21, 2008, six months after completion of the Commission’s review, the Mexican producer Tuberias Procarsa, S.A. de C.V. (“Procarsa”) attempted to file with the Commission a revised foreign producers’ questionnaire response which sought to revise certain aspects of its originally reported capacity, production, and shipment data. On April 24, 2008, the Commission rejected the submission on the grounds that it was untimely filed.

On November 21, 2007, the domestic producer United States Steel Corporation (“U.S. Steel”) filed a request for review of the Commission’s determination by a binational panel under Article 1904 of the North American Free Trade Agreement. The parties completed briefing in the proceeding in 2008 and 2009. The Panel held a hearing in the proceeding on July 22, 2010.

On January 18, 2011, the Panel issued an opinion in the matter. In its opinion, the Panel affirmed the Commission’s reliance on the existence of differing conditions of competition for Mexico and Japan when deciding not to exercise its discretion to cumulate the subject imports from those countries. The Panel also held that U.S. Steel was barred
