

the Trusted Platform Module. Trusted authentication is provided by tokens. The padlock on the browser assures we can trust web interactions since they are protected by SSL. Close-held keys and strong key management systems assure cryptographic trust.

At the workshop we will explore what assurances these trust anchors do and do not provide, what they depend upon, how they do or do not interact with the rest of the system, how they typically fail, and what needs to be addressed to enable effective use of them.

How To Apply

If you would like to participate in this workshop, please submit (1) a resume or curriculum vita of no more than two pages which highlights your expertise in this area and (2) a one-page paper stating your opinion of the assertion and outlining your key thoughts on the topic. The workshop will accommodate no more than 60 participants, so these brief documents need to make a compelling case for your participation. Applications should be submitted to assumptionbusters@nitrd.gov no later than 5 p.m. EST on March 18, 2011.

Selection and Notification: The SCORE committee will select an expert group that reflects a broad range of opinions on the assertion. Accepted participants will be notified by e-mail no later than March 30, 2011. We cannot guarantee that we will contact individuals who are not selected, though we will attempt to do so unless the volume of responses is overwhelming.

Submitted by the National Science Foundation for the National Coordination Office (NCO) for Networking and Information Technology Research and Development (NITRD) on February 22, 2011.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-63936; File No. SR-DTC-2011-03]

Self-Regulatory Organizations; the Depository Trust Company; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Regarding Providing Participants With a New Optional Settlement Web Interface

February 22, 2011.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ notice is hereby given that on February 7, 2011, The Depository Trust Company (“DTC”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared primarily by DTC. DTC filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act² and Rule 19b-4(f)(4)³ thereunder so that the proposal was effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change will establish a new browser-based interface, the “Settlement Web,” that allows Participants to view their settlement-related activity.

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78s(b)(3)(A)(iii).

³ 17 CFR 240.19b-4(f)(4).

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

DTC Participants have the ability to view all of their settlement related activity using different functions in the Participant Browser System (“PBS”).⁴ Based on request from its Participants, DTC has created a more user-friendly interface called Settlement Web that allows Participants to view their settlement related activity. The Settlement Web will reduce the amount of time that Participants spend in PBS by increasing the efficiency in searching for settlement activity. Participants that chose to use the Settlement Web will have access to a Navigation Bar that will provide Participants with improved inquiry and update capabilities for their settlement transactions. Participants will also have the ability to view different settlement related activities using the Dashboard in the Settlement Web homepage. Additionally, Participants will have the option to use an alert function located within the Settlement Web’s dashboard to provide them to set alerts regarding settlement related events.⁵ Participants will be able to customize the function to control which events for which they want to be notified. These alerts will reduce the amount of time spent in PBS because Participants will no longer have to manually check multiple settlement functions to be made aware of various settlement events. Notifications will be made available to Participants through the alerts window in the dashboard or by e-mail. The e-mail will notify the

⁴ In 2008, DTCC completed a multi-year initiative to transition all Participant Terminal System (“PTS”) functions to PBS. Now, rather than toggle between the two tools, Participants can manage all their needs through the web-based PBS, which is more flexible than PTS while offering greater functionality. However, Participants are still able to use PTS for most of their settlement activities.

⁵ Events, which include, for example, settlement extension broadcasts and the receipt of a specific delivery, are regularly scheduled processing milestones associated with a given settlement cycle.
