Title: Regulatory Pilot Projects (Renewal).

ICR numbers: EPA ICR No. 1755.09, OMB Control No. 2010-0026.

ICR Status: This ICR is scheduled to expire on March 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This is an information collection request renewal that will allow for the continued solicitation of proposals for innovative pilot projects and to allow EPA to continue its commitments to monitor the results of ongoing pilot tests of regulatory innovation. The renewal of this ICR is important as it will allow the Agency to continue to measure performance outcomes of regulatory innovation piloting and to assess the broader applicability of those pilot projects. The ICR is also necessary to allow EPA to identify State and Tribal co-regulators as well as other stakeholders who are interested in partnering with EPA in innovative pilot projects, allowing the Agency to continue its commitment to innovation and regulatory flexibility with facilities, communities, and states in achieving environmental results. The renewal of this ICR will allow the Office of Policy to continue to work with potential stakeholders on innovative

approaches to achieve improved environmental results.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Respondents/Affected Entities: States and regulated entities participating in EPA regulatory pilot projects.

Estimated Number of Respondents: 832.

Frequency of Response: Quarterly, annually, on occasion.

Estimated Total Annual Hour Burden: 4,680 hours.

Estimated Total Annual Cost: \$258,694. This is exclusively for labor as there are no capital investment or maintenance and operational costs.

Changes in the Estimates: There is a decrease of 3,068 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This reflects the reduced number of Project XL and State Innovation Grant projects reporting as those programs come to a close.

Dated: February 25, 2011.

Title: EPA's ENERGY STAR® Product Labeling (Renewal)

ICR numbers: EPA ICR No. 2078.05, OMB Control No. 2060-0528.

ICR Status: This ICR is scheduled to expire on March 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: ENERGY STAR is a voluntary program developed in collaboration with industry to create a self-sustaining market for energy efficient products. The center piece of the program is the ENERGY STAR label, a registered certification label that helps consumers identify products that save energy, save money, and help protect the environment without sacrificing quality or performance. In order to

protect the integrity of the label and enhance its effectiveness in the marketplace, EPA must ensure that products carrying the label meet appropriate program requirements.

The ENERGY STAR program has determined it necessary to shift from a self-certification program to one in which we have an enhanced qualification and verification process with all testing being done in EPA recognized, accredited labs and partners participating in product specific certification programs. These changes are an effort to preserve the consumer confidence in the ENERGY STAR label and to protect the significant value it offers program partners. EPA believes that the new requirements will mean that leadership companies' participation and the ENERGY STAR label will become even more meaningful in the market. Maintaining the value of this brand requires ensuring products labeled with the ENERGY STAR deliver on their promise to the consumer. Beginning in January 2011, manufacturers must obtain third party certification for new products labeled with the ENERGY STAR mark. As with previous program requirements, program participants submit signed Partnership Agreements indicating that they will adhere to logo-use guidelines and that participating products meet specified energy performance criteria based on a standard test method.

As part of our contribution to the overall success of the program, EPA has agreed to facilitate the sale of qualifying products by providing consumers with easy-to-use information about the products. To be effective, EPA and its relevant recognized certification body must receive qualifying product information from participating manufacturers. Partners need to provide qualifying information prior to labeling so as to ensure that EPA information is recent and accurate. The information will be compiled by the certification body which will then provide EPA with the appropriate data so the product may be incorporated into a complete qualifying products list per product category, posted on the ENERGY STAR Web site, and supplied to those purchasers who request it via phone, fax, or e-mail.

In order to monitor progress and support the best allocation of resources, EPA also asks manufacturers to submit annual shipment data for their ENERGY STAR qualifying products. EPA is flexible as to the methods by which manufacturers may submit unit shipment data. For example, if manufacturers already submit this type of information to a third party, such as

a trade association, they are given the option of arranging for shipment data to be sent to EPA via this third party to avoid duplication of efforts and to ensure confidentiality. In using any shipment data received directly from a partner, EPA will mask the source of the data so as to protect confidentiality.

Finally, Partners that wish to receive recognition for their efforts in ENERGY STAR may submit an application for the Partner of the Year Award.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 28 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Respondents for this information collection request include Partners in ENERGY STAR. Partners are product manufacturers.

Estimated Number of Respondents: 2050.

Frequency of Response: Initially/one-time and annually.

Estimated Total Annual Hour Burden: 65,338 hours.

Estimated Total Annual Cost: \$4,344,125, that includes \$32,543 in Operations and Maintenance Costs.

Changes in the Estimates: There is a decrease of 31,750 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. There are several reasons for the change in reporting burden. EPA has changed the ENERGY STAR program from a self-certification program to an enhanced qualification process with all partners participating in product specific certification programs. Partners no longer report directly to EPA to qualify their models but instead work with third party certification bodies who will provide EPA, on a regular basis, with a list of certified models that EPA will post on our web site EPA increased the estimated number of

respondents for Partnership Agreements, Unit Shipment data, and Award applications based on improved and updated data and analysis.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection Being Reviewed by the Federal Communications Commission, Comments Requested

February 24, 2011.

SUMMARY: The Federal Communications Commission (FCC), as part of its continuing effort to reduce paperwork burdens, invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501-3520. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and (e) ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before May 2, 2011. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via e-mail to PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0717.

Title: Billed Party Preference for InterLATA 0+ Calls, CC Docket No. 92-77, 47 CFR Sections 64.703(a), 64.709, 64.710.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 1,418 respondents and 11,250,150 responses.

Estimated Time per Response: 1 minute (.017 hours)-50 hours.

Frequency of Response: Annual and on occasion reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is found at 47 U.S.C. 226, Telephone Operator Services, Pub. L. 101-435, 104 Stat. 986, codified at 47 CFR 64.703(a) Consumer Information, 64.709 Informational Tariffs, and 64.710 Operator Services for Prison Inmate Phones.

Total Annual Burden: 205,023 hours.

Total Annual Cost: \$116,250.

Nature and Extent of Confidentiality: An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information from individuals.

Privacy Impact Assessment: No impacts(s).

Needs and Uses: Pursuant to 47 CFR 64.703(a), Operator Service Providers (OSPs) are required to disclose, audibly and distinctly to the consumer, at no charge and before connecting any interstate call, how to obtain rate quotations, including any applicable surcharges. 47 CFR 64.710 imposes similar requirements on OSPs to inmates at correctional institutions. 47 CFR 64.709 codifies the requirements for OSPs to file informational tariffs with the Commission. These rules help to ensure that consumers receive information necessary to determine what the charges associated with an OSP-assisted call will be, thereby enhancing informed consumer choice in the operator services marketplace.
