Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the Agency's function; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Form CMS-105 captures the annual projected CLIA workload that the State survey agency will accomplish. It is also used by the CMS regional office to approve the annual projected CLIA workload. The DRA also requires that the States submit pricing information for the 50 most widely prescribed drugs so that the States' prices can be compared to the national average prices obtained from the survey. The States pricing information will be compared and the States will be ranked. The Act also requires that States report their drug utilization rates for noninnovator multiple source (generic) drugs, their payment rates under their State plan, and their dispensing fees.
