BILLING CODE 3510–22–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2010–0080]

Children's Products Containing Lead; Technological Feasibility of 100 ppm for Lead Content; Notice, Reopening of the Hearing Record

AGENCY: U.S. Consumer Product Safety Commission.

ACTION: Notice, reopening of the hearing record.

SUMMARY: Section 101(a) of the Consumer Product Safety Improvement Act (“CPSIA”) provides that, as of August 14, 2011, children's products may not contain more than 100 parts per million (“ppm”) of lead unless the U.S. Consumer Product Safety Commission (“CPSC,” “Commission,” or “we”) determines that such a limit is not technologically feasible. The Commission may make such a determination only after notice and a hearing and after analyzing the public health protections associated with substantially reducing lead in children's products. On February 16, 2011, the Commission conducted a public hearing to receive views from all interested parties about the technological feasibility of meeting the 100 ppm lead content limit for children's products and associated public health considerations. Individual Commissioners requested at the hearing that certain participants respond to additional questions in writing, as well as submit relevant studies and additional data referenced in oral presentations. Accordingly, through this notice, the Commission is reopening the hearing record until March 24, 2011.

For all other matters: Dominique Williams, U.S. Consumer Product Safety Commission, Bethesda, MD 20814; telephone: (301) 504–7597; e-mail: dwilliams@cpsc.gov.

SUPPLEMENTARY INFORMATION: Section 101(a)(2)(C) of the CPSIA (15 U.S.C. 1278a(a)(2)(C)) provides that, as of August 14, 2011, children's products may not contain more than 100 parts per million (ppm) of lead unless the Commission determines that such a limit is not technologically feasible. The Commission may make this determination only after notice and a hearing and after analyzing the public health protections associated with substantially reducing lead in children's products. Section 101(d) of the CPSIA (15 U.S.C. 1278a(d)) provides that a lead limit shall be deemed technologically feasible with regard to a product or product category if:

(1) A product that complies with the limit is commercially available in the product category;

(2) Technology to comply with the limit is commercially available to manufacturers or is otherwise available within the common meaning of the term;

(3) Industrial strategies or devices have been developed that are capable or will be capable of achieving such a limit by the effective date of the limit and that companies, acting in good faith, are generally capable of adopting; or

(4) Alternative practices, best practices, or other operational changes would allow the manufacturer to comply with the limit.

In the **Federal Register** of January 26, 2011 (76 FR 4641), we published a notice (“hearing notice”) announcing that the Commission would hold a public hearing pursuant to section 101(a) of the CPSIA. The hearing notice stated that the Commission was seeking information on specific issues, such as whether any product or product
