BILLING CODE 6730-01-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank

indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 1, 2011.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690-1414:

1. *Community State Bank Employee Stock Ownership Plan and Trust, Union Grove, Wisconsin*, to acquire up to 850 shares of Union Bancorporation, Inc., Union Grove, Wisconsin, and increase its ownership up to 38.24 percent, and thereby indirectly increase its control of Community State Bank, Union Grove, Wisconsin.

Board of Governors of the Federal Reserve System, March 4, 2011.

Jennifer J. Johnson,
Secretary of the Board.

BILLING CODE 6210-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Request for Information (NOT-ES-11-007): Needs and Approaches for Assessing the Human Health Impacts of Exposure to Mixtures

AGENCY: National Institutes of Health (NIH), HHS.

ACTION: Request for information.

SUMMARY: The National Institute of Environmental Health Sciences (NIEHS), the Division of Extramural Research and Training (DERT) and the National Toxicology Program (NTP) seek input for identification of key research areas in mixtures. Information provided will be used in planning a workshop for late summer 2011 to help inform the development of intramural and extramural research efforts that address the combined health effects of multiple environmental exposures ("mixtures"). This request for information (RFI) is for planning purposes only and should not be construed as a funding opportunity or grant program. Input from all

interested parties is welcome including the lay public, environmental health researchers, health professionals, educators, policy makers, industry, and others. Please respond on-line at the Mixtures Request for Information Web page (<http://ntp.niehs.nih.gov/go/rfimix>) by April 15, 2011.

DATES: Please respond online at the Mixtures Request for Information Web page (<http://ntp.niehs.nih.gov/go/rfimix>) by April 15, 2011.

FOR FURTHER INFORMATION CONTACT:

Other correspondence regarding this RFI should be directed to either (1) Dr. Danielle Carlin, DERT Program Administrator, NIEHS, P.O. Box 12233, MD K3-04, Research Triangle Park, NC 27709, (telephone) 919-541-1409, (e-mail) carlindj@niehs.nih.gov or (2) Dr. Cynthia Rider, NTP Toxicologist, NIEHS, P.O. Box 12233, MD K2-12, Research Triangle Park, NC 27709, (telephone) 919-541-7638, (e-mail) ridercv@niehs.nih.gov.

SUPPLEMENTARY INFORMATION:

Background

The NIEHS mission is to reduce the burden of human illness and disability by understanding how the environment influences the development and progression of human disease. To accomplish this, the NIEHS supports research and professional development in environmental health sciences, clinical research, and public health.

DERT plans, directs and evaluates the NIEHS grant program, which supports research and research training in environmental health. It develops program priorities and recommends funding levels to assure maximum utilization of available resources in attainment of NIEHS objectives. Through cooperative relationships with NIH and with public and private institutions and organizations, DERT maintains an awareness of national research efforts and assesses the need for research and research training in environmental health.

The NTP is an interagency program whose mission is to evaluate agents of public health concern by developing and applying tools of modern toxicology and molecular biology. The NTP designs and conducts laboratory studies and testing programs and analyzes its findings to assess potential hazards to human health from exposure to environmental substances. The NTP also carries out formal review and literature analysis activities.

The evaluation of human health effects from multiple environmental exposures represents a special challenge to the research community due to the

inherent complexity of the topic. The term "mixture" can be broadly interpreted and can refer to a substance with variable composition or to mixtures resulting from combined exposures. For the purposes of this RFI, "mixtures" pertains to any set of multiple environmental exposures (chemical or non-chemical) that may contribute jointly to adverse human health outcomes, irrespective of whether people are exposed to the substances at the same/different times or through similar/distinct sources or routes.

Continuous human exposure to complex and dynamic mixtures precludes directly testing the toxicity of each possible exposure combination. Therefore, predictive models of mixture toxicity must be developed and validated in order to characterize the hazard associated with complex exposures. In order to develop these models, a better understanding is required of both the composition of real-world exposures and the fundamental principles of chemical interactions. Combinatorial or statistical approaches are needed to address the potential interactions of complex exposures. Moreover, these approaches should be used to move beyond assessment of individual chemicals and further our understanding of the impacts of realistic exposures.

Information gathered through this RFI will be used in planning a workshop on mixtures to be held in late summer 2011. The date and location have not yet been determined, but when set, will be announced in the **Federal Register**. The overarching goals of this workshop are to foster discussion on the approaches, infrastructure, and resources needed to make progress and to identify new scientific opportunities by applying innovative tools to the field of mixtures research. Additionally, the workshop should provide opportunities for development of collaborations and foster multidisciplinary interactions among the mixtures scientific community. The workshop will bring together experts from multiple disciplines including, but not limited to, exposure assessment, risk assessment, biostatistics, toxicology, biology, regulatory science, and epidemiology.

Information Requested

DEPT and the NTP request information on the challenges and potential solutions in mixtures research. Responses to any or all of the questions below are invited from interested individuals/groups, including, but not limited to, the environmental health research community, health

professionals, educators, policy makers, industry, and the public.

- What are the underlying scientific knowledge gaps for assessing the effects of mixtures on human health?
- What are the scientific issues encountered in performing risk assessments of mixtures that can be addressed by new research?
- What types of scientific data (*e.g.*, mechanistic, epidemiological) are needed to address these underlying knowledge gaps?
- What are the new technologies and innovative approaches that could be leveraged to address these underlying knowledge gaps?

All responses to information requested in this RFI are optional. The information collected will be analyzed and considered for use in the further development of the workshop. The summarized data (without identifiers) may appear in future reports. Although the NIH will provide safeguards to prevent the release of identifying information, there is no guarantee of confidentiality. This RFI is for planning purposes only and shall not be construed as a solicitation for applications or as an obligation on the part of the Government. The Government will not pay for the preparation of any information submitted or for the Government's use of that information. Acknowledgement of receipt of responses will be provided through the Web site (<http://ntp.niehs.nih.gov/go/rfjmix>), but respondents will not be notified of the Government's assessment of the information received. No basis for claims against the Government shall arise as a result of responses to this RFI, or in the Government's use of such information as part of its evaluation process.

Dated: February 28, 2011.

Linda S. Birnbaum,

Director, National Institute of Environmental Health Sciences and National Toxicology Program.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day-11-11BH]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under

review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

The Division of Behavior Surveillance (DBS) Gulf States Population Survey—New—Public Health Surveillance Program Office (PHSPO), Office of Surveillance, Epidemiology, and Laboratory Services (OSELs), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

On April 20, 2010, the BP Deepwater Horizon oil rig exploded in the Gulf of Mexico spilling more than 4.9 million barrels of oil into the Gulf. The lives and livelihoods of persons residing in the Gulf coastal communities were affected by this event due to loss of work, disruption in the fishing and tourism industries, and the effect on the physical environment in which they live.

An ongoing public health concern following the spill is the effect on the mental and behavioral health of populations living in and around the Gulf region and access to the mental health services required to meet that need.

On October 7, 2010 the Office of Management and Budget (OMB) granted emergency clearance (OMB control # 0920-0868, expiration date April 30, 2011) to CDC's Public Health Surveillance Program Office (PHSPO), Division of Behavioral Surveillance (DBS) to conduct a survey to monitor the mental and behavioral health status of this affected population. Data collection for the DBS Gulf States Population Survey began on December 14, 2010 and will continue monthly for a one-year period. No data were collected from October 2010 to December 13, 2010, because the sampling and data collecting contracts had not been awarded.

Using the existing capacity and infrastructure of the Behavioral Risk Factor Surveillance System (BRFSS), DBS implemented a standalone survey designed to monitor mental and behavioral health indicators in the adult population in selected coastal counties affected by the oil spill. The survey includes health related questions taken
