In the United States District Court for the Northern District of Texas, Wichita Falls Division

United States of America and State of Texas, Plaintiffs, v. United Regional Health Care System, Defendant.

Case No.: 7:11-cv-00030.

Judge: Reed C. O'Connor.

Filed: Feb. 25, 2011.

Description: Antitrust.

Complaint

The United States of America, acting under the direction of the Attorney General of the United States, and the State of Texas, by and through the Texas Attorney General, bring this civil antitrust action to enjoin defendant United Regional Health Care System ("United Regional") from entering into, maintaining, or enforcing contracts with commercial health insurers that effectively prevent those insurers from contracting with United Regional's competitors, in violation of Section 2 of the Sherman Act, 15 U.S.C. 2, and to remedy the effects of its unlawful conduct. Plaintiffs allege as follows:

I. Nature of the Action

1. United Regional has monopoly power in two relevant product markets in Wichita Falls, Texas and the surrounding area: (1) The sale of general acute-care inpatient hospital services ("inpatient hospital services") to commercial health insurers, and (2) the sale of outpatient surgical services to commercial health insurers. United Regional has an approximately 90% share of the market for inpatient hospital services sold to commercial insurers and a greater than 65% share of the market for outpatient surgical services sold to commercial insurers. All health insurance companies in the relevant geographic market consider United Regional a "must-have" hospital for health plans because it is by far the largest hospital in the region and the only local provider of certain essential services.

2. United Regional has maintained its monopoly power in the relevant markets by entering into contracts with commercial health insurers that exclude United Regional's competitors in the Wichita Falls area from the insurers' health-care provider networks ("exclusionary contracts"). These exclusionary contracts effectively prevent insurers from contracting with hospitals and other health-care facilities
