Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 et seq.

Dated: March 8, 2011.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service. IFR Doc. 2011–5697 Filed 3–11–11: 8:45 aml

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XA123

Marine Mammals; File No. 15616

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit.

SUMMARY: Notice is hereby given that Craig Matkin, North Gulf Oceanic Society, Homer, AK, has been issued a permit to conduct research on marine mammals.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713–2289; fax (301)713–0376; and Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802–1668; phone (907) 586–7221; fax (907) 586–7249.

FOR FURTHER INFORMATION CONTACT: Tammy Adams or Kristy Beard, (301) 713–2289.

SUPPLEMENTARY INFORMATION: On January 5, 2011, notice was published in the Federal Register (76 FR 542) that a request for a permit to conduct research on marine mammals had been submitted by the above-named applicant. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 et seq.), and the regulations governing the taking and

importing of marine mammals (50 CFR part 216).

The permit allows harassment of marine mammals during conduct of research in Alaskan waters, including southeast Alaska, Prince William Sound, the Kenai Peninsula, the Eastern Aleutian Islands, and the Bering Sea. The purpose of the research is to maintain a long-term killer whale (Orcinus orca) monitoring program in Alaskan waters that was initiated over 25 years ago. In addition, the permit holder will examine movements of other non-endangered cetacean species along the North Gulf Coast of Alaska in relation to U.S. Navy testing activities. The research activities include photoidentification, passive acoustic recording, biopsy sampling, tagging with barbed darts and suction cups, and collecting samples of marine mammal carcasses from sites of killer whale predation.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Dated: March 9, 2011.

Tammy C. Adams,

Acting Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service. [FR Doc. 2011–5849 Filed 3–11–11; 8:45 am]

BILLING CODE 3510-22-P

DEPARTMENT OF ENERGY

Notice of Availability of Draft Waste Incidental to Reprocessing Evaluation for the Vitrification Melter at the West Valley Demonstration Project for West Valley, New York

AGENCY: Office of Environmental Management, U.S. Department of Energy.

ACTION: Notice of availability.

SUMMARY: The Department of Energy (DOE) announces the availability of a draft evaluation which shows that the vitrification melter (used to vitrify waste from reprocessing of spent nuclear fuel and certain treatment material) at the West Valley Demonstration Project (WVDP), located at the Western New York Service Center in West Valley, New York, is waste incidental to reprocessing and thus is not high-level radioactive waste (HLW) and may be managed and disposed of offsite as low-level waste (LLW). DOE prepared the draft evaluation pursuant to DOE

Manual 435.1-1, Radioactive Waste Management. DOE is consulting with the Nuclear Regulatory Commission (NRC) before finalizing this evaluation. Although it is not required by DOE Manual 435.1-1, DOE is making the draft evaluation available for public and state review and comment during the NRC consultative review period. DOE will make its final evaluation and determination as to whether the vitrification melter is HLW, or is waste incidental to reprocessing which can be managed and disposed of as LLW, after consideration of any public, state, and NRC comments on this draft evaluation.

DATES: The comment period will end April 28, 2011. Comments received after that time will be considered to the extent practicable.

ADDRESSES: The draft waste evaluation is available on the Internet at http:// apps.em.doe.gov/wvdp/, and is publicly available for review at the following locations: U.S. Department of Energy, Public Reading Room, 1000 Independence Avenue, SW., Washington, DC 20585, phone: (202) 586-5955, or fax: (202) 586-0575; and U.S. DOE, West Valley Demonstration Project Public Reading Room located at the Town of Concord Hulbert Library, 18 Chapel St., Springville, New York 14141, phone: (716) 592-7742. Written comments should be submitted to: Mr. Daniel Sullivan, U.S. Department of Energy, West Valley Demonstration Project, 10282 Rock Springs Road, West Valley, New York 14171-9799. Alternatively, comments may also be filed electronically by e-mail to melter@wv.doe.gov or by fax at (716) 942-4703.

FOR FURTHER INFORMATION CONTACT: For further information about this draft waste evaluation, please contact Mr. Daniel Sullivan at the mailing address or Web site listed above.

SUPPLEMENTARY INFORMATION: The vitrification melter is a box structure, approximately 10 feet on each side, with a stainless steel outer structure and an interior lined with refractory materials. It was used to solidify high-level waste which had been generated by commercial reprocessing of spent nuclear fuel at the Western New York Nuclear Service Center in West Valley, New York by Nuclear Fuel Services, Inc. from 1966 through 1972. DOE undertook the solidification activities pursuant to DOE's responsibilities under the West Valley Demonstration Project Act. To solidify the waste, DOE vitrified the waste (combined it at a high temperature with borosilicate glass) and transferred the molten glass-waste mixture into specially developed

stainless steel canisters where the mixture hardened into a solid glass waste form. DOE used the vitrification melter as part of this process, specifically to melt glass frit (material used in making glass) together with reprocessing waste sludge and treatment material (spent ion removal resin).

DOE operated the vitrification melter between 1996 and 2002. In 2002, prior to shut down, the vitrification melter was flushed three times with decontamination solutions and emptied using an evacuated canister process so as to remove key radionuclides to the maximum extent technically and economically practical. After completing this decontamination, a small amount of hardened residual radioactive glass material that could not be removed remained inside the vitrification melter. The vitrification melter with the remaining residual waste was characterized for radioactivity and determined to have radionuclide concentrations that do not exceed concentration limits for Class C low-level waste. It was removed from the vitrification cell in 2004 and is presently safely stored at the West Valley Demonstration Project in a Department of Transportation-certified Industrial Package-2 steel transportation container. DOE plans to further stabilize the vitrification melter waste package by filling the melter and the waste package with cement grout before shipment offsite. It will be disposed of at a suitable off-site low-level waste disposal facility, either the Area 5 Radioactive Waste Management Site at DOE's Nevada National Security Site (NNSS) in Nevada or the Waste Control Specialists Federal Facility Waste Disposal Facility near Andrews, Texas. DOE intends to dispose of the vitrification melter waste package in accordance with applicable waste acceptance criteria using specific waste profile documentation.

DOE Manual 435.1-1, which implements DOE Order 435.1, Radioactive Waste Management, contains a rigorous evaluation process which DOE uses to determine whether or not certain waste from the reprocessing of spent nuclear fuel is incidental to reprocessing and therefore is not high-level waste and can be managed as low-level waste. This process, in relevant part, requires demonstrating that:

(1) Key radionuclides have been removed to the maximum extent that is

technically and economically practical; (2) The waste will be managed to meet safety requirements comparable to the performance objectives set out in 10 Code of Federal Regulations (CFR) Part

61, Subpart C, Performance Objectives; and

(3) The waste will be managed, pursuant to DOE's authority under the Atomic Energy Act of 1954, as amended, and in accordance with the provisions of Chapter IV of DOE Manual 435.1-1, provided the waste will be incorporated in a solid physical form at a concentration that does not exceed the applicable concentration limits for Class C low-level waste as set out in 10 CFR 61.55, Waste Classification.

The draft waste-incidental-toreprocessing evaluation summarizes DOE's analysis and shows that the

vitrification melter:

(1) Has had key radionuclides removed to the maximum extent technically and economically practical;

(2) Will be managed to meet safety requirements comparable to the NRC performance objectives at 10 CFR part 61, subpart C; and

(3) Will be in a solid physical form that does not exceed concentration limits for Class C low-level waste and will be managed and disposed of pursuant to DOE's authority under the Atomic Energy Act of 1954, as amended, and in accordance with applicable provisions of Chapter IV of DOE Manual 435.1-1.

Accordingly, the draft evaluation demonstrates using the wasteincidental-to-reprocessing evaluation process that the West Valley vitrification melter waste package may be managed and disposed of as lowlevel waste. The vitrification melter waste package will meet the applicable waste acceptance criteria for the selected offsite low-level waste disposal facility, either the NNSS Area 5 Radioactive Waste Management Site or the Waste Control Specialists Federal Facility Waste Disposal Facility in Texas. The vitrification melter waste package has been approved for disposal by the NNSS in case a final decision is made to send the waste package to that site for disposal.

 $\overline{\rm DOE}$ is consulting with the NRC before finalizing this evaluation. Although not required by DOE Manual 435.1-1, DOE is making the draft evaluation available for public and state review and comment during the NRC consultative review period. DOE plans to issue a final determination as to whether the vitrification melter is highlevel waste or can be managed and disposed of as low-level waste following review and consultation with the NRC and consideration of public and state comments.

DOE's decision on the disposal site to be used is not within the scope of this draft evaluation. Any DOE decision on

the facility to which the Vitrification Melter waste package would be sent would be made after the final DOE evaluation and determination, following consideration of NRC and public comments on this draft evaluation, and after DOE confers with appropriate State officials in the state where the waste package may be disposed.

Issued in Washington, DC, on March 8,

Frank Marcinowski,

Deputy Assistant Secretary for Technical and Regulatory Support, Office of Environmental Management.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Ultra-Deepwater Advisory Committee

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Ultra-Deepwater Advisory Committee. The Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770) requires that public notice of this meeting be announced in the Federal Register.

DATES: Wednesday, April 6, 2011, 8 a.m.-5 p.m. (CDT). Thursday, April 7, 2011, 8 a.m.-4 p.m. (CDT).

ADDRESSES: Crowne Plaza Hotel, Houston North-Greenspoint, 425 North Sam Houston Parkway East, Houston, Texas 77060.

FOR FURTHER INFORMATION CONTACT:

Elena Melchert, U.S. Department of Energy, Office of Oil and Natural Gas, Washington, DC 20585. Phone: (202) 586-5600.

SUPPLEMENTARY INFORMATION: Purpose of the Committee: The purpose of the Ultra-Deepwater Advisory Committee is to provide advice on the development and implementation of programs related to ultra-deepwater architecture and technology to the Secretary of Energy and provide comments and recommendations and priorities for the Department of Energy Annual Plan per requirements of the Energy Policy Act of 2005, Title IX, Subtitle J, Section 999D.

Tentative Agenda

April 6

7:30 a.m. Registration. 8 a.m.-4:45 p.m. Welcome & Introductions, Opening Remarks, and Discussion of Subcommittee Reports, and Findings regarding the Draft 2011 Annual Plan.

4:45 p.m. Public Comments, if any.
