Title: Correction of Misreported Chemical Substances on the TSCA Inventory; EPA ICR No. 1741.06, OMB No. 2070-0145.

ICR Status: This is a request to renew an existing approved collection that is scheduled to expire on April 30, 2011. Under 5 CFR 1320.10, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Section 8(b) of the Toxic Substances Control Act (TSCA) requires EPA to compile and keep current an Inventory of Chemical Substances in Commerce, which is a listing of chemical substances manufactured, imported, and processed for commercial purposes in the United States. The purpose of the Inventory is to define, for the purpose of TSCA, what chemical substances exist in U.S. commerce. Since the Inventory thereby performs a regulatory function by distinguishing between existing chemicals and new chemicals, which TSCA regulates in different ways, it is imperative that the Inventory be accurate.

However, from time to time, EPA or respondents discover that substances have been incorrectly described by the original reporting company. Reported substances have been unintentionally misidentified as a result of simple typographical errors, the misidentification of substances, or the lack of sufficient technical or analytical capabilities to characterize fully the exact chemical substances. EPA has developed guidelines (45 FR 50544, July 29, 1980) under which incorrectly described substances listed in the
