

mailing) to be 5 hours per recall campaign. Assuming an average of 3 distributors per equipment item, (which is a liberal estimate given that many equipment manufacturers do not use independent distributors) the total number of burden hours associated with this third party notification burden is approximately 1,350 hours per year (90 recalls × 3 distributors × 5 hours).

As for the burden linked with a manufacturer's preparation of and notification concerning its reimbursement for pre-notification remedies, consistent with previous estimates (*see* 69 FR 11477 (March 10, 2004)), we continue to estimate that preparing a plan for reimbursement takes approximately 8 hours annually, and that an additional 2 hours per year is spent tailoring the plan to particular defect and noncompliance notifications to NHTSA and adding tailored language about the plan to a particular safety recall's owner notification letters. In sum, these required activities add an additional 2,700 annual burden hours ((175 manufacturers × 8 hours) + (650 recalls × 2 hours)).

In summary, the total burden associated with the defect and noncompliant information collection and reporting requirements we continue to estimate at 21,350 hours per year.

As explained earlier, the Act and part 573 also contain numerous information collection requirements specific to tire recall and remedy campaigns, as well as a statutory and regulatory reporting requirement that anyone that knowingly and intentionally sells or leases a defective or noncompliant tire notify NHTSA of that activity.

Manufacturers are required to include specific information relative to tire disposal in the notifications they provide NHTSA concerning identification of a safety defect or noncompliance with FMVSS in their tires, as well as in the notifications which they issue to their dealers or other tire outlets participating in the recall campaign. *See* 49 CFR 573.6(c)(9). We continue to estimate that there will be about 10 tire recall campaigns per year, and that inclusion of this additional information will require an additional two hours of effort beyond the subtotal above associated with non-tire recall campaigns. This additional effort consists of one hour for the NHTSA notification and one hour for the dealer notification for a total of 20 burden hours (10 tire recalls a year × 2 hours per recall).

Manufacturer owned or controlled dealers are required to notify the manufacturer and provide certain information should they deviate from

the manufacturer's disposal plan. Consistent with previous analysis, we continue to ascribe zero burden hours to this requirement since to date no such reports have been provided and our original expectation that dealers would comply with manufacturers' plans has proven true.

Accordingly, we estimate 20 burden hours a year will be spent complying with the tire recall campaign requirements found in 49 CFR 573.6(c)(9).

And, as we have yet to receive a single report of a defective or noncompliant tire being intentionally sold or leased in the fourteen years since this rule was proposed, our previous estimate of zero burden hours remains unchanged with this notice.

In summary, our previous estimate of 21,370 total burden hours associated with this approved information collection stands.

Estimated Number of Respondents

NHTSA receives reports of defect or noncompliance from roughly 175 manufacturers per year. Again, this figure fluctuates from year to year, but we do not have a basis at this juncture to suspect this annual figure will change significantly. Accordingly, we estimate that there will continue to be approximately 175 manufacturers per year filing defect or noncompliance reports and completing the other information collection responsibilities associated with those filings.

We discussed above that we have yet to receive a single report filed pursuant to 49 CFR 573.10. This information collection requirement, to reiterate, requires anyone who sells or leases a defective or noncompliant tire, with knowledge of that tire's defectiveness or noncompliance, to report that sale or lease to NHTSA. Given the lack of filing history over many years, we estimate that there will continue to be zero reports filed and therefore zero respondents as to this requirement.

In summary, we estimate that there will be a total of 175 respondents per year associated with OMB No. 2127-0004.
