

the likely success of the Petition for Waiver has been demonstrated, based upon DOE having granted a waiver for similar products design, it is in the public interest to have similar products tested and rated for energy consumption on a comparable basis." 73 FR at 1215. Moreover, Carrier's SMMSi products will increase system efficiency, reduce national energy usage, and benefit end users in the United States.

Confidential Information

Carrier makes no request to DOE regarding the confidential treatment of any information contained in this Petition for Waiver and Application for Interim Waiver.

Conclusion

Carrier respectfully requests that DOE grant a waiver and interim waiver from existing test procedures applicable to Carrier's SMMSi VRF multi-split systems and to apply the alternate testing procedures described above until such time as a representative test procedure is developed and adopted for such products. Otherwise, Carrier will not be able to compete effectively in the United States VRF market.

Given that Carrier would like to introduce its SMMSi product line in March 2011 and that DOE's regulations contemplate a decision on Carrier's Application for Interim Waiver within 15 business days, 10 CFR 431.401(e), Carrier would greatly appreciate a timely response to this letter request. To that end, we would be happy promptly to answer any questions that you might have and to provide you with any needed additional information.

Carrier certifies that all manufacturers listed above in Section V of this request have been notified by letter of this petition and application.

Sincerely,
Carrier Corporation,
Dr. John Galbraith,
VP for RCS Engineering.
