

Agency: National Oceanic and Atmospheric Administration (NOAA).
 Title: Reporting of Sea Turtle Entanglements in Fixed Gear Fisheries.
 OMB Control Number: 0648-0496.
 Form Number(s): NA.

Type of Request: Regular submission (extension of a current information collection with revisions).

Number of Respondents: 59.

Average Hours per Response:

Telephone calls and written reports, 1 hour; interviews, 30 minutes.

Burden Hours: 99.

Needs and Uses: This notice is for extension, with revisions, of a current information collection.

This collection of information involves sea turtles becoming accidentally entangled in active or discarded fixed fishing gear or marine debris. These entanglements may prevent the recovery of endangered and threatened sea turtle populations. National Marine Fisheries Service (NMFS) Northeast Region (Maine to Virginia) has established the Sea Turtle Disentanglement Network to promote reporting and increase successful disentanglement of sea turtles. This Network is made up of sea turtle stranding network organizations, as well as federal, state, and municipal agencies. NMFS relies on the Network and on opportunistic reports from fishermen and recreational boaters for information about entangled turtles. The information provided will help NMFS better assess the threat of sea turtle entanglement in vertical line from fixed gear fisheries (lobster, whelk/conch, crab, fish trap, gill net), discarded gear and marine debris. Our understanding of the prevalence and nature of sea turtle entanglement in fixed gear fisheries is necessary to ensure sea turtles are being conserved and protected, as mandated by the Endangered Species Act of 1973, as amended (ESA).

Affected Public: Individuals or households; not for profit institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Alaska Region Bering Sea & Aleutian Islands (BSAI) Crab Economic Data Reports.

OMB Control Number: 0648-0518.

Form Number(s): NA.

Type of Request: Regular submission (renewal with revisions of a current information collection).

Number of Respondents: 132.

Average Hours per Response: Catcher vessel and catcher/processor economic data reports (EDRs), 37 hours; stationary floating processor and shoreside processor EDRs, 48 hours; EDR certifications only, 1 hour; verification of data, 8 hours.

Burden Hours: 4,534.

Needs and Uses: The National Marine Fisheries Service (NMFS) manages the crab fisheries in the waters off the coast of Alaska under the Fishery Management Plan (FMP) for the Bering Sea and Aleutian Islands (BSAI) Crab. The Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.* (Magnuson-Stevens Act) mandated the Secretary of Commerce to implement the Crab Rationalization Program (CR Program) for the BSAI Management Area (BSAI) crab fisheries. The CR Program allocates BSAI crab resources among harvesters, processors, and coastal communities and monitors the "economic stability for harvesters, processors, and coastal communities." The Magnuson-Stevens Act provides specific guidance on the CR Program's mandatory EDR used to assess the efficacy of the CR Program. Data from the EDR will directly contribute to ongoing evaluation of potential anti-trust and anti-competitive practices in the crab industry.

Affected Public: Business or other for-profit organizations.

Frequency: Annually.

Respondent's Obligation: Mandatory.
