

review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 320,504.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 35.4.

Estimated total annual burden hours: 2,577,280 hours.

Estimated total annual costs: \$140,498,539. This includes an estimated burden cost of \$140,498,539 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

IV. Are there changes in the estimates from the last approval?

There is a decrease of 545,206 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's change in methodology for calculating the number of target housing renovation events to that used in the 2008 Renovation, Repair, and Painting rule analysis. The supporting statement provides additional information. This change is an adjustment.

V. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Title: Contractor Conflicts of Interest.

ICR numbers: EPA ICR No. 1550.09, OMB Control No. 2030-0023.

ICR Status: This ICR is scheduled to expire on May 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA contractors will be required to disclose business relationships and corporate affiliations to determine whether EPA's interests are jeopardized by such relationships. Because EPA has the dual responsibility of cleanup and enforcement and because its contractors are often involved in both activities, it is imperative that contractors are free from conflicts of interest so as not to prejudice response and enforcement

actions. Contractors will be required to maintain a database of business relationships and report information to EPA on either an annual basis or when each work order is issued.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1,138 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 135.

Estimated Number of Respondents: 135.

Frequency of Response: annual.

Estimated Total Annual Hour Burden: 153,626.

Estimated Total Annual Cost: \$9,858,202.20 includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is no change in the hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: April 7, 2011.

Director, Collection Strategies Division.

Title: Federal Implementation Plans under the Clean Air Act for Indian Reservations in Idaho, Oregon, and Washington (Renewal).

ICR number: EPA ICR No. 2020.05, OMB Control No. 2060-0558.

ICR status: This ICR is scheduled to expire on May 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA promulgated Federal Implementation Plans (FIPs) under the Clean Air Act for Indian reservations located in Idaho, Oregon, and Washington in 40 CFR part 49 (70 FR 18074, April 8, 2005). The FIPs in the final rule, also referred to as the Federal Air Rules for Indian Reservations in Idaho, Oregon, and Washington (FARR), include information collection requirements associated with the fugitive particulate matter rule in § 49.126, the woodwaste burner rule in § 49.127; the rule for limiting sulfur in fuels in § 49.130; the rule for open burning in § 49.131; the rules for general open burning permits, agricultural burning permits, and forestry and silvicultural burning permits in §§ 49.132, 49.133, and 49.134; the registration rule in § 49.138; and the rule for non-Title V operating permits in § 49.139. EPA uses this information to manage the activities and sources of air pollution on the Indian reservations in Idaho, Oregon, and Washington. EPA believes these information collection requirements are appropriate because they will enable EPA to develop and maintain accurate records of air pollution sources and their emissions, track emissions trends and changes,
