ENVIRONMENTAL PROTECTION AGENCY

[FRL-9297-2; Docket ID No. EPA-HQ-ORD-2009-0398]

Draft Toxicological Review of Methanol (Non-Cancer) in Support of Summary Information on the Integrated Risk Information System (IRIS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public comment period and listening session.

SUMMARY: EPA is announcing a 60-day public comment period and listening session for the external review draft human health assessment titled, "Toxicological Review of Methanol (Non-Cancer): In Support of Summary Information on the Integrated Risk Information System (IRIS)" (EPA/635/R-11/001). The draft assessment was prepared by the National Center for Environmental Assessment (NCEA) within the EPA Office of Research and Development (ORD). EPA is releasing this draft assessment solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. This draft assessment has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination.

In January 2010, EPA released an external peer review draft IRIS Toxicological Review for methanol (EPA/635/R-09/013), containing both

cancer and non-cancer analyses, and requested that the Science Advisory Board conduct a review of this human health assessment. Following a report from the National Toxicology Program, EPA placed the external peer review of the draft IRIS Methanol Toxicological Review on hold. The National Toxicology Program report recommended that pathology reviews be carried out to resolve differences of opinion in the diagnoses of certain tumors reported in a Ramazzini Institute methanol research study, which was cited and used to support some of the conclusions in the draft IRIS assessment. As a result, EPA and the National Institute of Environmental Health Sciences plan to jointly sponsor an independent Pathology Working Group (PWG) review of select studies conducted at the Institute. EPA is today releasing the draft IRIS Methanol Toxicological Review (Non-Cancer) for public comment while continuing to hold the cancer assessment that was previously released in January 2010. The data and studies used in the draft IRIS Methanol Toxicological Review (Non-Cancer) are unrelated to the tumor diagnoses being re-examined by the PWG. The information, analyses and conclusions of the draft assessment announced in this notice are identical to the non-cancer portions of the draft assessment previously released in January 2010. Comments relevant to the non-cancer methanol assessment that were received during the previous public comment period for the joint cancer and non-cancer assessment will be considered along with new comments.

An EPA listening session will be held on May 26, during the public comment period for this draft assessment. The purpose of the listening session is to allow all interested parties to present scientific and technical comments on the draft IRIS health assessment to EPA and other interested parties attending the listening session. EPA welcomes the comments that will be provided to the Agency by the listening session participants. The comments will be considered by the Agency as it revises the draft assessment after the external peer review. EPA will compile a list of meeting participants, including the name, principal affiliation, and sponsor of each person attending or calling in to the meeting. The list of listening session participants as well as presentations and written materials given to NCEA will be made a part of the public record.

After public review and comment, an EPA contractor will hold a meeting of expert panelists for independent external peer review of this draft

assessment. The public comment period and external peer review meeting are separate processes that provide opportunities for all interested parties to comment on the assessment. The external peer review meeting, to be scheduled at a later date, will be open to the public and announced in the **Federal Register**. Public comments submitted during the public comment period will be provided to the external peer reviewers before the panel meeting and considered by EPA in the disposition of public comments. Public comments received after the public comment period closes will not be submitted to the external peer reviewers and will only be considered by EPA if time permits.

DATES: The public comment period begins April 18, 2011, and ends June 17, 2011. Comments should be in writing and must be received by EPA by June 17, 2011.

The listening session on the draft assessment for methanol will be held on May 26, beginning at 9 a.m. and ending at 4 p.m., Eastern Time. Interested parties who wish to attend the listening session should register no later than May 19. If you wish to present at the listening session, indicate in your registration that you would like to make oral comments and provide the length of your presentation. To register to speak and/or listen send an e-mail to IRISListeningSession@epa.gov (subject line: Methanol Listening Session); call Christine Ross at 703-347-8592; or fax a registration request to 703-347-8689. Please reference the "Methanol Listening Session" and include your name, title, affiliation, sponsor information, full address and contact information. Indicate if you will need audio-visual equipment (e.g., laptop computer and slide projector). In general, each presentation should be no more than 30 minutes. If, however, there are more requests for presentations than the allotted time allows, then the time limit for each presentation will be adjusted. A copy of the agenda for the listening session will be available at the meeting. If no speakers have registered by May 19, the listening session will be cancelled, and EPA will notify those registered of the cancellation.

SUPPLEMENTARY INFORMATION:

I. Information About IRIS

EPA's IRIS is a human health assessment program that evaluates quantitative and qualitative risk information on effects that may result from exposure to chemical substances found in the environment. Through the IRIS Program, EPA provides the highest quality science-based human health assessments to support the Agency's regulatory activities. The IRIS database contains information for more than 540 chemical substances that can be used to support the first two steps (hazard identification and dose-response evaluation) of the risk assessment process. When supported by available data, IRIS provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic noncancer health effects and cancer assessments. Combined with specific exposure information, government and private entities use IRIS to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.
