SUPPLEMENTARY INFORMATION:

I. Abstract

The BC-170, Census Employment Inquiry, is used to collect information such as personal data and work experience from job applicants. The BC-170 is used throughout the census and intercensal periods for surveys, special censuses, decennial census pretests, and dress rehearsals. Applicants completing the form for a census related position are applying for temporary jobs in office and field positions (clerks, enumerators, crew leaders, supervisors). In addition, as an option to the OF-612, Optional Application for Federal Employment, the BC-170 may be used when applying for temporary/permanent office and field positions (clerks, field representatives, supervisors) on a recurring survey in one of the Census Bureau's 12 Regional Offices (ROs) throughout the United States. This form is completed by job applicants at the time they are tested. Selecting officials review the information shown on the form to evaluate an applicant's eligibility for employment. During the

decennial census, the BC-170 is intended to expedite hiring and selection in situations requiring large numbers of temporary employees for assignments of a limited duration.

The use of this form is limited to only situations that involve special, one-time or recurring survey operations at one of the ROs and/or which require the establishment of a temporary office. The form has been demonstrated to meet our recruitment needs for field workers and requires significantly less burden than the Office of Personnel Management (OPM) Optional Forms that are available for use by the public when applying for Federal positions. Over the next three years, we expect to recruit approximately 61,500 applicants for census jobs (*i.e.*, one-time censuses, special censuses and decennial pretests and dress rehearsals), which would equate to a significant reduction in the required paperwork and public burden, as compared to other Federal application forms.

The bulk of the proposed changes to the form are related to standardizing the information collected across the three variations of the forms which we currently utilized and to collect additional applicant data to facilitate the processing of the application.

II. Method of Collection

We collect this information at the time of testing for temporary and permanent positions. Potential employees being tested complete a four-page paper application at the time of testing.
