NUCLEAR REGULATORY COMMISSION

[NRC-2011-0096]

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of issuance and availability of Draft Regulatory Guide, DG-1197, "Inservice Inspection of Prestressed Concrete Containment Structures with Grouted Tendons."

FOR FURTHER INFORMATION CONTACT: Herman Graves, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: (301) 251-3307 or e-mail to Madhumita.Sircar@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), titled, "Inservice Inspection of Prestressed Concrete Containment Structures with Grouted Tendons," is temporarily identified by its task number, DG-1197, which should be mentioned in all related correspondence.

DG-1197, proposed Revision 2 of Regulatory Guide 1.90, describes an approach that the staff of the NRC considers acceptable for use in developing an appropriate surveillance program for prestressed concrete containment structures with grouted tendons. The purpose of this guide is to provide recommendations for inservice inspection (ISI) of containments and quality standards that should be maintained when portland cement grout is used for the corrosion protection of prestressing steel.

The recommendations described in this draft regulatory guide are an approach acceptable to the NRC staff for satisfying the requirements of General Design Criterion (GDC) 53, "Provisions for Containment Testing and Inspection," as specified in Appendix A, "General Design Criteria for Nuclear Power Plants," to Title 10, Part 50, "Domestic Licensing of Production and

Utilization Facilities," of the Code of Federal Regulations (10 CFR part 50). Among the specific requirements of GDC 53 are that the containment be designed to permit (1) appropriate periodic inspection of all important areas and (2) an appropriate surveillance program.

II. Further Information

The NRC staff is soliciting comments on DG-1197. Comments may be accompanied by relevant information or supporting data, and should mention DG-1197 in the subject line.

ADDRESSES: Please include Docket ID NRC-2011-0096 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site, <http://www.regulations.gov>. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.
