This rule section governs interconnection of private land mobile radio service stations with the public switched telephone network as follows:

(1) Pursuant to 47 CFR section 90.477(a), licensees of interconnected land stations must maintain as part of their station records a detailed description of how interconnection is accomplished.

(2) Pursuant to 47 CFR section 90.477(b)(2) and (d)(2), at least one licensee participating in any cost sharing arrangement for telephone service must maintain cost sharing records, the costs must be distributed at least once a year, and a report of the distribution must be placed in the licensee's station records and made available to participants in the sharing arrangement and the Commission upon request.

(3) Pursuant to 47 CFR 90.477(d)(3), licensees in the Industrial/Business Pool and those licensees who establish eligibility pursuant to 90.20(a)(2), other than persons or organizations charged with specific fire protection activities,

persons or organizations charged with specific forestry-conservation activities, or medical emergency systems in the 450–470 MHz band, and who seek to connect within 120 km (75 miles) of 25 cities specified in 90.477(d)(3), must obtain the consent of all co-channel licensees located both within 120 km of the center of the city, and with 120 km of the interconnected base station transmitter. Consensual agreements must specifically state the terms agreed upon and a statement must be submitted to the Commission indicating that all co-channel licensees have consented to the use of interconnection.

In a December 1998 *Report and Order* in WT Docket Nos. 98–20 and 96–188, the Commission consolidated, revised and streamlined the Commission's rules governing the licensing application procedures for radio services licensed by the Commission's Wireless Telecommunications Bureau in order to fully implement the Universal Licensing System (ULS). As a result of the ULS rule conversions in connection with this information collection, 47 CFR 90.477(a), interconnected systems now file all information (100 percent) electronically via ULS. Pursuant to 47 CFR 90.477(d)(3), interconnected systems were changed to reflect NAD83 coordinates

Title: Satellite Delivery of Network Signals to Unserved Households for Purposes of the Satellite Home Viewer Act.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 848 respondents; 250,000 responses.

Estimated Time per Response: 0.50 hours.

Frequency of Response: Recordkeeping requirement; On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is the Satellite Home Viewer Act, 17 U.S.C. 119.

Total Annual Burden: 125,000 hours.

Total Annual Cost: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: On November 23, 2010, the Commission's Office of Engineering and Technology, released a Report and Order, Measurement Standards for Digital Television Signals

Pursuant to the Satellite Home Viewer Extension and Reauthorization Act of 2004, ET Docket No. 06-94; FCC 10-195. The Report and Order adopted rules establishing measurement procedures for determining the strength of a digital broadcast television (DTV) signal at any specific location. These procedures will be used for determining whether households are eligible to receive distant DTV network signals retransmitted by satellite carriers, pursuant to the provisions of the Satellite Television Extension and Localism Act of 2010 (STELA). This Report and Order implements DTV signal measurement procedures proposed in the Commission's Notice of Proposed Rulemaking (SHVERA NPRM) and Further Notice of Proposed Rulemaking (STELA FNRPM) in this proceeding with minor modifications.

Therefore, the information collection requirements that require approval by the Office of Management and Budget (OMB) are as follows:

47 CFR 73.686(e) describes the procedures for measuring the field strength of digital television signals. These procedures will be used to determine whether a household is eligible to receive a distant digital network signal from a satellite television provider, largely rely on existing, proven methods the Commission has already established for measuring analog television signal strength at any individual location, as set forth in Section 73.686(d) of the existing rules, but include modifications as necessary to accommodate the inherent differences between analog and digital TV signals. The new digital signal measurement procedures include provisions for the location of the measurement antenna, antenna height, signal measurement method, antenna orientation and polarization, and data recording.

Therefore, satellite and broadcast industries making field strength measurements shall maintain written records and include the following information: (a) A list of calibrated equipment used in the field strength survey, which for each instrument specifies the manufacturer, type, serial number and rated accuracy, and the date of the most recent calibration by the manufacturer or by a laboratory. Include complete details of any instrument not of standard manufacture; (b) a detailed description of the calibration of the measuring equipment, including field strength meters, measuring antenna, and connecting cable; (c) for each spot at the measuring site, all factors which may affect the recorded field, such as topography,

height and types of vegetation, buildings, obstacles, weather, and other local features; (d) a description of where the cluster measurements were made; (e) time and date of the measurements and signature of the person making the measurements; (f) for each channel being measured, a list of the measured value of field strength (in units of dB) after adjustment for line loss and antenna factor) of the five readings made during the cluster measurement process, with the median value highlighted.
