BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2011-0053]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The NRC invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* Notice of Enforcement Discretion (NOEDs) for Operating Power Reactors and Gaseous Diffusion Plants (GDP) (NRC Enforcement Policy).

2. *Current OMB approval number:* 3150-0136.

3. *How often the collection is required:* On occasion.

4. *Who is required or asked to report:* Nuclear power reactor licensees and

gaseous diffusion plant certificate holders.

5. *The number of annual respondents:* Approximately 11.

6. *The number of hours needed annually to complete the requirement or request:* 1,705.

7. *Abstract:* The NRC's Enforcement Policy addresses circumstances in which the NRC may exercise enforcement discretion. A specific type of enforcement discretion is designated as a NOED and relates to circumstances which may arise where a nuclear power plant licensee's compliance with a Technical Specification Limiting Condition for Operation or other license conditions would involve: (1) An unnecessary plant shutdown; (2) performance of testing, inspection, or system realignment that is inappropriate for the specific plant conditions; or (3) unnecessary delays in plant startup without a corresponding health and safety benefit. Similarly, for a gaseous diffusion plant, circumstances may arise where compliance with a Technical Safety Requirement or other condition would unnecessarily require a total plant shutdown, or, compliance would unnecessarily place the plant in a condition where safety, safeguards, or security features were degraded or inoperable.

A licensee or certificate holder seeking the issuance of a NOED, must document the safety basis for the request, including: An evaluation of the safety significance and potential consequences of the proposed request, a description of proposed compensatory measures, a justification for the duration of the request, the basis for the licensee's or certificate holder's conclusion that the request does not have a potential adverse impact on the public health and safety, that there will be no adverse consequences to the environment, and any other information the NRC staff deems necessary before the NRC staff makes a decision whether to exercise discretion.

In addition, the NRC's Enforcement Policy includes a provision allowing licensees to voluntarily adopt fire protection requirements contained in the National Fire Protection Association Standard 805, "Performance Based Standard for Fire Protection for Light Water Reactor Electric Generating Plants, 2001 Edition" (NFPA 805). Licensees who wish to implement the risk-informed process in NFPA 805 must submit a letter of intent (LOI) to the NRC. Licensees who wish to withdraw from the NFPA 805 risk-informed process must submit a letter of retraction.

Submit, by July 5, 2011, comments that address the following questions:

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
