Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Profiles of Fish Processing Plants in Alaska (title shortened from the 60-day notice).

OMB Control Number: None.

Form Number(s): NA.

Type of Request: Regular submission (request for review of a new information collection).

Number of Respondents: 186.

Average Hours per Response: Initial and follow-up telephone calls, 6 minutes; surveys, 30 minutes.

Burden Hours: 95.

Needs and Uses: This request is for review of a new information collection.

Workers come from many places inside and outside Alaska to work seasonally in its fish processing facilities. As a result, the population of an Alaska community with a fish processing plant can increase significantly during peak processing seasons. However, very limited information is available in a consolidated location or format about these fish processing facilities. The National Marine Fisheries Service's Alaska Fisheries Science Center proposes to obtain such basic information, as an accurate number of individuals employed at each processing facility during the months of operation, the peak number of workers for processing various species by season, the ethnicity of processing workers, types of lodging and other accommodations and activities available for processing workers, whether or not the company provides meals for the processing workforce in a company galley, the interactions between seasonal processing workers and permanent residents of the community, and the history of the fish processing facility in the community. This type of information is important when attempting to forecast the possible social impacts of fishing regulations on communities which have an onshore fish processing facility.

This project would produce "processor profiles", short narrative descriptions of all the onshore fish processing plants in the state of Alaska that will augment and update existing community profiles.

Affected Public: Business or other for-profit organizations.

Frequency: One time.

Respondent's Obligation: Voluntary.

OMB Desk Officer:

OIRA_Submission@omb.eop.gov.

Frontseating Service Valves from the People's Republic of China: Preliminary Results of the 2008-2010 Antidumping Duty Administrative Review and Partial Rescission of Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: In response to requests from interested parties, the Department of Commerce ("the Department") is conducting an administrative review of the antidumping duty order on frontseating service valves ("FSVs") from the People's Republic of China ("PRC"), covering the period October 22, 2008 through March 31, 2010.

We have preliminarily determined that the mandatory respondents in this administrative review have made sales in the United States at prices below normal value ("NV") during the period of review ("POR"). None of the remaining respondents provided evidence that they are separate from the state-controlled entity. As a result, they are considered part of the PRC entity. If these preliminary results are adopted in the final results of review, we will instruct U.S. Customs and Border Protection ("CBP") to assess antidumping duties on entries of subject merchandise during the POR for which the importer-specific assessment rates are above *de minimis*.

We invite interested parties to comment on these preliminary results. Parties who submit comments are requested to submit with each argument a summary of the argument. We intend to issue the final results no later than 120 days from the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("the Act").

DATES: *Effective Date:* May 9, 2011.
