ENVIRONMENTAL PROTECTION AGENCY

State Program Requirements; Application for Program Revision to the National Pollutant Discharge Elimination System (NPDES) Program; Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA approved Alaska's National Pollutant Discharge Elimination System (NPDES) program application on October 31, 2008 pursuant to section 402 of the Clean Water Act (CWA or "the Act"). The approved State program, called the Alaska Pollutant Discharge Elimination System (APDES), includes an implementation plan that transfers the administration of specific program components from EPA to the Alaska Department of Environmental Conservation (ADEC) in four phases over a three year period from the date of program approval. Phases I-III have been transferred from EPA to ADEC. Transfer of the final phase, Phase IV, is currently scheduled for October 31, 2011. ADEC has made a submission for approval for a one year extension of the transfer of Phase IV of the APDES program, which includes oil and gas, cooling water intakes and dischargers, munitions and all other remaining facilities not previously transferred in Phases I-III. If EPA approves the APDES program revision, Phase IV will transfer to ADEC four years from the date of program approval, or October 31, 2012. Today, EPA is requesting comments on the proposed one year extension and is providing notice of a public hearing and comment period on the proposal. The EPA Region 10 Regional Administrator will either approve or disapprove the APDES program revision after considering all comments received during the public comment period.

DATES: *Comments.* The public comment period on the ADEC submission seeking a one year extension of the transfer of Phase IV will be from the date of publication of this Notice until June 27, 2011. Comments must be received or

SUPPLEMENTARY INFORMATION: Section 402 of the CWA created the NPDES program under which EPA may issue permits for the point source discharge of pollutants to waters of the United States under conditions required by the Act. Section 402 also provides that EPA may approve a State to administer an equivalent state program provided the State has appropriate legal authority and a program sufficient to meet the Act's requirements. The regulatory requirements for state program approval are set forth in 40 CFR part 123, and 40 CFR 123.21 lists the basic elements of an approvable application. The NPDES regulations, 40 CFR 123.62, also set forth procedures for revision of approved state programs.

EPA considers the program revision documents submitted by ADEC to be administratively complete at the time of this notice. EPA will not make a final decision on the APDES program revision until after considering all public comments provided during the public comment period and from the public hearing and completion of government to government Tribal consultations, as requested, with Federally recognized Tribes in Alaska.

EPA's approval of the APDES program application on October 31, 2008 authorized ADEC to assume responsibility for the NPDES program in four phases over three years from the

date of APDES program approval. ADEC currently has permit administration authority for Phases I-III. These three phases cover the following major components: Phase I includes domestic discharges (excluding the bio-solids program), timber harvesting, seafood processing facilities and hatcheries; Phase II includes Federal facilities, stormwater program, pretreatment program, and miscellaneous non-domestic discharges; and Phase III includes mining. The ADEC phasing schedule authorizes the transfer of Phase IV three years from APDES program approval, or October 31, 2011. Phase IV components include oil and gas, cooling water intakes and dischargers, munitions, and all other remaining facilities not previously transferred in Phases I-III.

By letter dated March 14, 2011, ADEC proposed a delay of the Phase IV transfer for one year, or until October 31, 2012. ADEC also submitted a modified APDES program description and a modified Memorandum of Agreement (MOA) related to the APDES program revision. The program description and MOA submissions were modified to incorporate the proposed one year extension of the Phase IV transfer.

The APDES program description provides a narrative description of the scope, structure, coverage, and processes of the APDES program including a description of the ADEC organization and staffing and administrative procedures for the issuance of permits and administrative or judicial procedures for their review. The only changes being proposed to the program description relate to a one year extension for the transfer of the Phase IV program component and to update the Phase IV permit list. The MOA is a document signed by each agency, committing them to specific responsibilities relevant to the administration and enforcement of the APDES program. The MOA provides structure for ADEC's program management and EPA's program oversight. The only changes being proposed to the MOA relate to a one year extension for the transfer of the Phase IV program component. The ADEC Commissioner and the Regional Administrator will sign the modified MOA if the APDES program revision is determined by EPA to be approvable after all comments received during the comment period have been considered.

After close of the comment period and completion of consultations, the Regional Administrator will make a decision to approve or disapprove the APDES program revision based on the

requirements of Section 402 of the CWA and 40 CFR part 123. If the Regional Administrator approves the APDES program revision, the Regional Administrator will so notify ADEC and sign the modified MOA. Notice would be published in the **Federal Register** and EPA would suspend issuance of NPDES permits in Phase IV in accordance with the approved modified schedule to transfer NPDES program authority for Phase IV. If the Regional Administrator disapproves the APDES program revision, the existing Phase IV transfer date (October 31, 2011) will be retained. ADEC will be notified of the reasons for disapproval and of any revisions or modifications to the program revision that are necessary to obtain approval.

Public Hearing Procedures. The public hearing will be conducted in accordance with 40 CFR 124.12 and will provide interested parties with the opportunity to give written and/or oral comments for the official record. The following procedures will be used at the public hearing. (1) The presiding officer shall conduct the hearing in a manner which will allow all interested persons wishing to make oral statements an opportunity to do so; however, the presiding officer may inform attendees of any time limits during the opening statement of the hearing. (2) Any person may submit written statements or documents for the hearing record. (3) The presiding officer may, in his or her discretion, exclude oral testimony if such testimony is overly repetitious of previous testimony or is not relevant to the decision to approve the submitted APDES program revision to change the date for the transfer of Phase IV. (4) The transcript taken at the hearing, together with copies of all submitted statements and documents, shall become a part of the record submitted to the Regional Administrator. (5) The hearing record shall be left open until the deadline for receipt of comments specified at the beginning of this Notice to allow any person time to submit additional written statements or to present views or evidence tending to rebut testimony presented at the public hearing. (6) Hearing statements may be oral or written. Written copies of oral statements are urged for accuracy of the record and for use of EPA and other interested persons. Persons wishing to make oral testimony supporting their written comments are encouraged to give a summary of their points rather than reading lengthy written comments verbatim into the record. All comments related to the proposed program revision received by EPA Region 10 by

the deadline for receipt of comments, or presented at the public hearing, will be considered by EPA before taking final action on the submitted APDES program revision.

Public Comment on the Program Revision. EPA and ADEC encourage public participation in this program revision process. EPA requests the public to review the program revision that ADEC has submitted and provide any comments relevant to the proposed one-year extension for transfer of Phase IV. EPA will consider all comments on the APDES program revision in its decision.

Authority: This action is taken under the authority of Section 402 of the Clean Water Act as amended, 42 U.S.C. 1342. I hereby provide public notice of the State of Alaska APDES program revision in accordance with 40 CFR 123.62.

Dated: May 5, 2011.

Dennis McLerran,

Regional Administrator, Region 10.
