

annually, on a per-state basis, regarding the previous calendar year: (1) The per-minute compensation rate(s) for intrastate traditional TRS, STS and CTS, (2) whether the rate applies to session minutes or conversation minutes, (3) the number of intrastate session minutes for traditional TRS, STS and CTS, and (4) the number of intrastate conversation minutes for traditional TRS, STS, and CTS. Also, STS providers must file a report annually with the Fund administrator and the Commission on their specific outreach efforts directly attributable to the additional compensation approved by the Commission for STS outreach.

In the 2007 TRS Cost Recovery Order, the Commission has assessed the effects of imposing the submission of rate data, and has found that there is no increased administrative burden on businesses with fewer than 25 employees. The Commission recognizes that the required rate data is presently available with the states and the providers of interstate traditional TRS, interstate STS, and interstate CTS, thereby no additional step is required to produce such data.

The Commission therefore believes that the submission of the rate data does not increase an administrative burden on businesses.

television screen throughout the program of the symbol E/I.

47 CFR 73.673 states each commercial television broadcast station licensee must provide information identifying programming specifically designed to educate and inform children to publishers of program guides. Such information must include an indication of the age group for which the program is intended.

These requirements are intended to provide greater clarity about broadcasters' obligations under the Children's Television Act (CTA) of 1990 to air programming "specifically designed" to serve the educational and informational needs of children and to improve public access to information about the availability of these programs. Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality. However, petitioners may request confidential treatment of their information pursuant to 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission adopted a Third Report and Order, PS Docket No. 06-229, FCC 11-6, that requires OMB approval for a new information collection that requires public safety broadband networks to employ the Long Term Evolution (LTE) broadband standard, specifically at least 3GPP Standard E-UTRA Release 8 and associated Evolved Packet Core (EPC). The Third Report and Order further

requires that these networks support certain LTE interfaces. These requirements were designed to ensure that networks operated in this spectrum band are interoperable with one another.

The Third Report and Order also requires each operator of a 700 MHz public safety broadband network to submit a certification to the Commission's Public Safety and Homeland Security Bureau (Bureau), prior to network deployment, that its network will support the required LTE interfaces. This requirement will enable the Bureau to monitor network deployment and ensure that networks are supporting the interfaces necessary to achieve interoperability.

The Commission is seeking OMB approval for this new information collection which requires operators of public safety broadband networks to submit a certification to the Commission.

Accurate maintenance of this data is vital in developing a regulatory framework for this network. Since such a network is vital for public safety and homeland security, its proper operation must be assured.
