redefur Register/
I hereby notify the CFEC that the SRA has accepted my Bid to permanently relinquish my Southeast Salmon Purse Seine Entry Permit # I request the CFEC: (1) not to renew my
above-identified entry permit; and (2) not to authorize any transfer of my entry permit. DATED this day of, 2011.
(Permit Holder/Bidder) SUBSCRIBED AND SWORN TO before me this day of, 2011.
Notary Public, State of
My commission expires:
Appendix D to § 600.1107—Conditional Relinquishment of Southeast Salmon Purse Seine Entry Permit [as 16.43.150(i)]
Upon satisfaction of the conditions that the Southeast Revitalization Association (SRA) accepts my bid and that NMFS agrees to pay my full bid amount to me, the SRA may submit this executed Conditional Relinquishment of Southeast Salmon Purse

Seine Entry Permit to the Commercial Fisheries Entry Commission.

I fully understand this relinquishment of my permanent entry permit #

under AS 16.43.150(i) is permanent, and I will not be able to reinstate the permit.

DATED this day of _, 2011.

(Permit Holder/Bidder)

SUBSCRIBED AND SWORN TO before me this ____ day of ___ ____, 2011.

Notary Public, State of My commission expires:

Magnuson-Stevens Fishery **Conservation and Management Act** Provisions; Fisheries of the **Northeastern United States: Annual Catch Limits and Accountability** Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Availability of proposed fishery management plan amendments; request for comments.

SUMMARY: NMFS announces that the Mid-Atlantic Fishery Management

Council (Council) has submitted an omnibus amendment containing the following amendments to implement annual catch limits (ACLs) and accountability measures (AMs) for Council managed resources: Amendment 13 to the Atlantic Mackerel, Squids, and Butterfish FMP; Amendment 3 to the Atlantic Bluefish FMP; Amendment 2 to the Spiny Dogfish FMP; Amendment 15 to the Summer Flounder, Scup, and Black Sea Bass FMP; Amendment 16 to the Surfclam and Ocean Quahog FMP, and Amendment 3 to the Tilefish FMP. These amendments, hereafter referred to as the Omnibus Amendment, have been submitted for review by the Secretary of Commerce (Secretary) for conformance with the FMPs, FMP amendments, the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), and other applicable laws. In turn, as part of the Secretarial review process, NMFS is requesting comments on the Omnibus Amendment from the public.

DATES: Comments must be received on or before July 22, 2011.

ADDRESSES: You may submit comments, identified by RIN 0648-BA23, by any one of the following methods:

- Electronic Submissions: Submit all electronic public comments via the Federal eRulemaking Portal http:// www.regulations.gov.
 - Fax: (978) 281-9135.
- Mail and hand delivery: Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope: Comments on Mid-Atlantic ACL/AM Omnibus Amendment.

Instructions: All comments received are a part of the public record and will generally be posted to http:// www.regulations.gov without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

NMFS will accept anonymous comments (enter N/A in the required fields, if you wish to remain anonymous). You may submit attachments to electronic comments in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

Copies of the draft Omnibus Amendment document, including the Environmental Assessment and Regulatory Impact Review (EA/RIR) and other supporting documents for the Omnibus Amendment are available

from Dr. Christopher M. Moore, Executive Director, Mid-Atlantic Fishery Management Council, Suite 201, 800 North State Street, Dover, DE 19901. The draft Omnibus Amendment, as submitted to NMFS by the Council, is also accessible via the Internet at http://www.nero.noaa.gov.

FOR FURTHER INFORMATION CONTACT: Michael Ruccio, Fishery Policy Analyst, (978) 281-9104.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Act requires that each Regional Fishery Management Council submit any FMP amendment it prepares to NMFS for review and approval, disapproval, or partial approval. The Magnuson-Stevens Act also requires that NMFS, upon receiving an FMP amendment, publish a notice in the Federal Register that the amendment is available for public review and comment.

Background

The Magnuson-Stevens Fishery Conservation and Management Reauthorization Act of 2006 (MSRA) amended the Magnuson-Stevens Act to include new requirements for ACLs and AMs and the formal incorporation of scientific advice provided to Regional Fishery Management Councils from their respective Scientific and Statistical Committees (SSCs).

The Council conducted public scoping and development of the Omnibus Amendment in 2009 and 2010. The development process included several meetings of the full Council, joint meetings with the Council and Atlantic States Marine Fisheries Commission, the Council's SSC and its scientific uncertainty subcommittee, the Omnibus Amendment Fishery Management Action Team, and public hearings. Now, the Council has submitted the Omnibus Amendment for Secretarial review, approval as needed, and implementation. The Omnibus Amendment is necessary to bring all Council FMPs into compliance with the requirements of the Magnuson-Stevens Act. The intent is to establish a comprehensive framework for all Council FMPs to more formally receive and utilize scientific recommendations in the establishment of annual catch levels, to establish a system to derive ACLs with AM backstops from that scientific advice, and to establish processes for revisiting and modifying the measures that would be established by the respective FMP amendments so that overfishing is prevented, stocks are rebuilt, and Optimum Yield (OY) may be achieved for all managed stocks.

If approved by NMFS, this amendment would establish Acceptable Biological Catch (ABC) control rules for use by the Council's SSC in recommending ABC to the Council; a risk policy for use in conjunction with the ABC control rules to inform the SSC of the Council's preferred tolerance for the risk of overfishing a stock; ACLs for all Council-managed stocks except Loligo and Illex squids, which are exempt from the ACL/AM requirements due to annual life cycles; comprehensive AMs for all established ACLs; descriptions of the process to review ACL and AM performance; and establishment of processes to modify the measures to be implemented through the Omnibus Amendment.

Public comments are being solicited on the Council's Omnibus Amendment and its incorporated documents through the end of the comment period stated in this notice of availability. A proposed rule that would implement the Omnibus Amendment's measures if approved, will be published in the Federal Register for public comment, following NMFS's evaluation of the proposed rule under the procedures of the Magnuson-Stevens Act. Public comments on the proposed rule must be received by the end of the comment period provided in this notice of availability of the Omnibus Amendment to be considered in the approval/disapproval decision on the amendment. All comments received by July 22, 2011, whether specifically directed to the Omnibus Amendment or the proposed rule, will be considered by NMFS in the approval/disapproval decision on the Omnibus Amendment. In reviewing, approving, and implementing Council-recommended amendment actions, NMFS is constrained to approval, disapproval, or partial approval only.

Comments received after the specified date will not be considered in the decision to approve, partially approve, or disapprove the Omnibus Amendment. To be considered, comments must be received by close of business on the last day of the comment period; that does not mean postmarked or otherwise transmitted by that date.

Authority: 16 U.S.C. 1801 et seq.

Dated: May 17, 2011,

Margo Schulze-Haugen,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service. [FR Doc. 2011–12665 Filed 5–23–11; 8:45 am]

Western Pacific Pelagic Fisheries; American Samoa Longline Gear Modifications To Reduce Turtle Interactions

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of fishery ecosystem plan amendment; request for comments.

SUMMARY: NMFS announces that the Western Pacific Fishery Management Council (Council) proposes to amend the Fishery Ecosystem Plan for Pelagic Fisheries of the Western Pacific Region (FEP). If approved by the Secretary of Commerce, Amendment 5 would establish gear configuration requirements for the U.S. pelagic longline fishery based in American Samoa. The proposed action is intended to reduce interactions between the fishery and Pacific green sea turtles, which will enable American Samoa longline fishing vessels to continue operations, while providing for the longterm survival, recovery, and sustainability of Pacific green sea turtle populations.

DATES: Comments on Amendment 5, including an environmental assessment, must be received by July 22, 2011.

ADDRESSES: Copies of Amendment 5, including an environmental assessment, identified by 0648–AY27, are available from http://www.regulations.gov, or the Council, 1164 Bishop St., Suite 1400, Honolulu, HI 96813, tel 808–522–8220, fax 808–522–8226, http://www.wpcouncil.org. Comments on the amendment, including the environmental assessment, may be sent to either of the following addresses:

- Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal http://www.regulations.gov; or
- Mail: Mail written comments to Michael D. Tosatto, Regional Administrator, NMFS, Pacific Islands Region (PIR), 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814–4700.

Instructions: Comments must be submitted to one of the above two addresses to ensure that the comments are received, documented, and considered by NMFS. Comments sent to

any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted to http://www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the commenter may be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter "N/ A" in the required name and organization fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word or Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT:

Adam Bailey, NMFS PIR Sustainable Fisheries Division, 808–944–2248.

SUPPLEMENTARY INFORMATION: Pelagic fisheries in the U.S. western Pacific are managed under the FEP, developed by the Council, and approved and implemented by NMFS. The Council prepared Amendment 5 to address pelagic fishing concerns in American Samoa, and submitted the amendment to NMFS for review under the Magnuson-Stevens Fishery Conservation and Management Act.

The pelagic longline fishery based in American Samoa is predominantly composed of longline vessels over 40 ft (12 m) in length. Longline vessels set 30–50 miles (48–80 km) of monofilament main line and around 3,000 hooks per day. In 2010, 26 vessels made a total of 4,328 sets, and landed about 222,400 albacore (most destined for the Pago Pago cannery), and smaller amounts of skipjack, yellowfin and bigeye tunas. The fishery also takes wahoo, oilfish, blue marlin, blue sharks, and other pelagic fish.

The American Samoa longline fishery occasionally interacts with (hooks or entangles) Pacific green sea turtles (Chelonia mydas), which are listed as threatened under the Endangered Species Act. Most of the interactions occur in near-surface waters, that is, shallower than 100 m, and most injuries to green sea turtles are fatal. To reduce these interactions, the Council proposes to amend the FEP to require longline fishermen to use a suite of gear configurations designed to ensure that longline hooks are set to fish at a depth of 100 meters or deeper, away from the primary turtle habitat.

This action would require fishermen on the large vessels (Classes B, C, and D) to use float lines that are at least 30 meters long, and maintain a distance of
