West Maui Pumped Storage Water Supply, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On April 1, 2011, West Maui Pumped Storage Water Supply, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the West Maui Pumped Storage Project, which would use effluent water from the existing West Maui sewage treatment plant, located near Kaanapali, in Maui County, Hawaii. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed pumped storage project would consist of the following new and existing facilities: (1) A 90-foot-high, 3,800-foot-long lower dam and 50-acre reservoir; (2) a 21,000-foot-long, 57-inch-diameter penstock; (3) a 250-foot-high, 400-foot-long upper dam and 30-acre reservoir; (4) a turnout to supply project effluent water to an existing irrigation system; (5) a powerhouse with two 15-megawatt Francis type pump/generating units; (6) a 9-mile-long, 138-kilovolt transmission line; (7) a 22,000-foot-long road providing access to the penstock and upper dam; and (8) appurtenant facilities. The estimated annual generation of the West Maui Pumped Storage Project would be 110,000 megawatt-hours.
