

Africa using one or more of the five designated phytosanitary measures listed in § 319.56–4(b). The specific measures that we would require for apricot, sweet cherry, and plumcot fruit imported from South Africa are as follows:

- The fruit must be imported as a commercial consignment, as defined in § 319.56–2.
- Each consignment of fruit must be accompanied by a phytosanitary certificate issued by the national plant protection organization of South Africa. For apricots and plumcots only, the phytosanitary certificate must include an additional declaration stating that the fruit was inspected and found free of cinch bug (*Macchiademus diplopterus*).
- Apricots and plumcots must be cold treated for fruit flies (*Ceratitidis* spp.) and false codling moth (*Thaumatotibia leucotreta*) in accordance with 7 CFR part 305.
- Sweet cherries must be cold treated for the Mediterranean fruit fly (*Ceratitidis capitata*) in accordance with 7 CFR part 305.
- Each consignment of fruit is subject to inspection upon arrival in the United States.

Therefore, in accordance with § 319.56–4(c), we are announcing the availability of our pest risk analysis for public review and comment.

Based on the findings detailed in our risk management document, we are also updating the Plant Protection and Quarantine (PPQ) Treatment Manual.¹ As noted above, apricots, sweet cherries, and plumcots imported into the continental United States from South Africa would be required to undergo cold treatment in accordance with 7 CFR part 305. In § 305.2, paragraph (b) states that approved treatment schedules are set out in the PPQ Treatment Manual. Section 305.3 sets out a process for adding, revising, or removing treatment schedules in the PPQ Treatment Manual. In that section, paragraph (a) sets out the process for adding, revising, or removing treatment schedules when there is no immediate need to make a change. The circumstances in which an immediate need exists are described in § 305.3(b)(1).

In accordance with § 305.3(a)(1), we are providing notice that we have determined that it is necessary to revise treatment schedule T107–e, which

provides a cold treatment schedule intended to prevent the spread of false codling moth and Natal fruit fly (*Ceratitidis rosa*) via the interstate movement or importation of apricot, grape, nectarine, peach, and plum fruit. Our risk management document states that apricots and plumcots must be treated for false codling moth and Natal fruit fly, as well as the Mediterranean fruit fly and the Bezzi fruit fly (*Ceratitidis quinaria*), using treatment schedule T107–e. The risk management document further states that although T107–e is not specifically approved for the Mediterranean or the Bezzi fruit fly, APHIS considers it to be an adequate treatment for both because it is more stringent than any other cold treatment approved for fruit flies. Moreover, although the hybrid plumcot is not listed among commodities that this treatment is approved for, its parent fruits, plum and apricot, are. APHIS has concluded, therefore, that plumcots can be effectively treated in accordance with T107–e to protect against the spread of false codling moth and of other species of fruit fly in addition to Natal fruit fly. Therefore, we have determined that treatment schedule T107–e can include plumcots among the commodities to which the treatment may be applied and the Mediterranean and the Bezzi fruit fly among the pests it is intended to eliminate.

The pest risk analysis may be viewed on the Regulations.gov Web site or in our reading room (see **ADDRESSES** above for a link to Regulations.gov and information on the location and hours of the reading room). You may request paper copies of the pest risk analysis by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the subject of the pest risk analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the import status of fresh apricot, sweet cherry, and plumcot fruit from South Africa and the change to the PPQ Treatment Manual. If the overall conclusions of the analysis and the Administrator's determination of risk remain unchanged following our consideration of the comments, then we will authorize the importation of fresh apricot, sweet cherry, and plumcot fruit from South Africa into the continental United States, subject to the requirements specified in the risk management document. We will also issue a new version of the PPQ Treatment Manual incorporating the changes to treatment schedule T107–e discussed above.

Authority: 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 25th day of May 2011.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-11-P

DEPARTMENT OF AGRICULTURE

Grain Inspection, Packers and Stockyards Administration

Designation for the State of Georgia and State of Montana Areas

AGENCY: Grain Inspection, Packers and Stockyards Administration, USDA.

ACTION: Notice.

SUMMARY: GIPSA is announcing the designation of the Georgia Department of Agriculture (Georgia) and the Montana Department of Agriculture (Montana) to provide official services under the United States Grain Standards Act, as amended (USGSA).

DATES: *Effective Date:* July 1, 2011.

ADDRESSES: William A. Ashley, Acting Branch Chief, Quality Assurance and Designation Branch, Compliance Division, GIPSA, USDA, STOP 3604, Room 1647-S, 1400 Independence Avenue, SW., Washington, DC 20250-3604.

FOR FURTHER INFORMATION CONTACT: William A. Ashley, 202-720-8262 or *William.A.Ashley@usda.gov*.

Read Applications: All applications and comments will be available for public inspection at the office above during regular business hours (7 CFR 1.27(c)).

SUPPLEMENTARY INFORMATION: In the January 4, 2011, **Federal Register** (76 FR 317), GIPSA requested applications for designation to provide official services in the geographic areas presently serviced by the Georgia Department of Agriculture (Georgia) and the Montana Department of Agriculture (Montana). Applications were due by February 3, 2011.

Georgia and Montana were the sole applicants for designation to provide official services in these areas. As a result, GIPSA did not ask for additional comments.

GIPSA evaluated all available information regarding the designation criteria in section 7(f)(1) of the USGSA (7 U.S.C. 79(f)) and determined that Georgia and Montana are qualified to provide official services in the geographic area specified in the January 4, 2011, **Federal Register** for which they applied. This designation action to provide official services in these specified areas is effective July 1, 2011 and terminates on June 30, 2014.

Interested persons may obtain official services by contacting this agency at the following telephone numbers:

Official agency	Headquarters location and telephone	Designation start	Designation end
Georgia	Atlanta, GA (229) 386-3141 Additional Location: Tifton, GA	7/1/2011	6/30/2014.
Montana	Helena, MT (406) 761-2141 Additional Locations: Great Falls and Plentywood, MT	7/1/2011	6/30/2014.
