

(\$0.22), landing the full FY 2010 quota of 15 million lb (5,443.11 mt), (and also the FY 2011 quota under Alternative 1) would yield \$3.300 million in fleet revenue. Applying the same approach, revenue would be expected to increase to \$4.400 million under the proposed action (Alternative 2), and \$6.898 million under Alternative 3. The quota level under Alternative 2 will allow the highest level of harvest of spiny dogfish while taking into account scientific uncertainty about the stock. Although the level of increased revenue for small entities will be less than under Alternative 3, Alternative 2 is more likely to prevent overfishing of the spiny dogfish resource and promote a more stable stream of commercial landings and revenues over the long term.

*Small Entity Compliance Guide*

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as “small entity compliance guides.” The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. As part of this rulemaking process, a letter to permit holders that also serves as small entity compliance guide (guide) was prepared and will be sent to all holders of permits issued for the spiny dogfish fishery. In addition, copies of this final rule and guide (i.e., permit holder letter) are available from the Northeast Regional Administrator (see

**[Docket No. 110223162-1295-02]**

**RIN 0648-XA184**

**Fisheries Off West Coast States; West Coast Salmon Fisheries; 2011 Management Measures; Correction**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Final rule; correcting amendment.

**SUMMARY:** NMFS established fishery management measures for the 2011 ocean salmon fisheries off Washington, Oregon, and California and the 2012 salmon seasons opening earlier than May 1, 2012. The final rule published on May 4, 2011, included an incorrect area description for minimum size requirements for the commercial salmon fishery. This action corrects the incorrect language.

**DATES:** Effective June 7, 2011.

**FOR FURTHER INFORMATION CONTACT:** Peggy Busby at 206-526-4323.

**SUPPLEMENTARY INFORMATION:** A final rule published May 4, 2011 (76 FR 25246), describes annual management measures for managing the harvest of salmon in the area managed by the Pacific Fishery Management Council (Council). This correcting amendment revises a table in that rule to make it consistent with the text of the rule and the Council’s recommendations.

**Need for Correction**

In the final rule regarding 2011 salmon management measures (76 FR 25246, May 4, 2011), Section 1, part B on page 25251 consists of a table of Minimum Size for salmon caught in the commercial fishery. There are two errors in this table, rendering it inconsistent with the rule text and the Council’s recommendations for the 2011 salmon management measures, as adopted at their April 2011 meeting. The corresponding text describing the fishing area and geographic boundaries in Section 1, part A, is correct as published on May 4, and is consistent with the Council’s recommendations for the 2011 management measures for the salmon fishery. In the table, the area listed as “Cape Falcon to Horse Mt.” is corrected to read “Cape Falcon to OR/CA Border.” The area listed as “Horse Mt. to US-Mexico Border” is corrected to read “OR/CA Border to U.S./Mexico Border.” The table here replaces the table in 76 FR 25246, Section 1:

**B. Minimum Size (Inches) (See C.1)**

Area (when open)	Chinook		Coho		Pink
	Total length	Head-off	Total length	Head-off	
North of Cape Falcon, OR .....	28.0	21.5	16.0	12.0	None.
Cape Falcon to OR/CA Border .....	28.0	21.5	.....	.....	None.
OR/CA Border to U.S./Mexico Border .....	27.0	20.5	.....	.....	None.

Metric equivalents: 28.0 in = 71.1 cm, 27.0 in = 68.6 cm, 21.5 in = 54.6 cm, 20.5 in = 52.1 cm, 16.0in = 40.6 cm, and 12.0 in = 30.5 cm.

**Classification**

The Assistant Administrator for Fisheries, NOAA (AA) finds good cause under 5 U.S.C. 553(b)(B), to waive the requirement for prior notice and opportunity for additional public comment for this action as notice and comment would be unnecessary and contrary to the public interest. Notice and comment are unnecessary and contrary to the public interest because this action simply makes the above-referenced table consistent with the text in the original final rule and the Council's recommended action. This correction does not affect the results of analyses conducted to support management decisions in the salmon fishery nor change the total catch of salmon. The correction eliminates an inconsistency between the table, and the

text and the Council's recommendation, and therefore eliminates any confusion that the inconsistency might create for the public. If this rule is not implemented immediately, the public will have incorrect information regarding the geographic area and boundaries for the salmon fishery, which will cause confusion and will be inconsistent with the Council's recommendation and with the analytical documents for this rulemaking. No aspect of this action is controversial and no change in operating practices in the fishery is required.

For the same reasons, pursuant to 5 U.S.C. 553(d), the AA finds good cause to waive the 30-day delay in effective date. If this rule is not implemented immediately, the public will have incorrect information regarding the geographic area and boundaries for the

salmon fishery, which will cause confusion and will be inconsistent with the Council's recommendation and with the analytical documents for this rulemaking.

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are inapplicable.

This final rule is exempt from review under Executive Order 12866.
