Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

Select Agent Distribution Activity: Request for Select Agent (OMB Control

No. 0920-0591 exp. 2/28/2011)—Reinstatement without change—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC), officially established as a substructure on July 9, 2010.

Background and Brief Description

The Centers for Disease Control and Prevention is requesting a three year extension to continue data collection under the Select Agent Distribution Activity. The form used for this activity is currently approved under OMB Control No. 0920-0591. The purpose of this data collection is to provide a systematic and consistent mechanism to review requests that come to CDC for Select Agents. The term select agents is used to describe a limited group of viruses, bacteria, rickettsia, and toxins that have the potential for use as agents of bioterrorism, inflicting significant morbidity and mortality on susceptible populations.

In light of current terrorism concerns and the significant NIH grant monies

directed toward Select Agent research, CDC receives hundreds of requests for Select Agents from researchers. The approximately 900 applicants are required to complete an application form in which they identify themselves and their institution, provide a Curriculum Vitae or biographical sketch, a summary of their research proposal, and sign indemnification and material transfer agreement statements. In this request, CDC is requesting approval for approximately 450 hours; no change from the currently approved burden. The only correction to this data collection request is updating the name of the National Center on the application form. A user fee will be collected to recover costs for materials, handling and shipping (except for public health laboratories). The cost to the respondent will vary based on which agent is requested.

Estimate of Annualized Burden Hours

Respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Researcher	900	1	30/60

Dated: May 31, 2011.
Daniel Holcomb,
Reports Clearance Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

Acting Reports Clearance Officer, 1600 Clifton Road, MS D-74, Atlanta, GA 30333 or send an e-mail to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Study of Comprehensive Cancer Control and Tobacco Control Program Partnerships — New — Division of Cancer Prevention and Control, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Tobacco use remains the leading preventable cause of death in the United States, causing over 443,000 deaths each year and resulting in an annual cost of more than \$96 billion in direct medical expenses. According to the latest Report of the Surgeon General (2010), "How Tobacco Causes Disease," damage from tobacco smoke is immediate. Inhaling the over 7,000 chemicals and compounds in tobacco smoke causes immediate and long-term damage and leads to disease, including cancer, and death. The only proven strategy for reducing the risk of tobacco-related morbidity and mortality is to never smoke, or to quit if tobacco use has been initiated.

In 1999, CDC's Office on Smoking and Health (OSH) established the National Tobacco Control Program (NTCP) to encourage coordinated, national efforts to reduce tobacco-related morbidity and mortality. The NTCP provides funding and technical support to Tobacco Control Programs (TCPs) in all 50 states, the District of Columbia, seven tribal support centers, eight U.S. territories or jurisdictions, and six national networks. NTCP awardees implement evidence-

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-5960 or send comments to Daniel Holcomb, CDC
