

the most essential project that could be undertaken for most stations and would have been scored accordingly. Now that all transmitters have completed the transition to digital, the focus may shift to some of the other eligible purposes such as translators, studio and production equipment, and master control equipment. But what equipment specifically is most essential may vary from station to station. Just to name one example, local production equipment can be a high priority especially if it produces an areas' only local news or if the station has been historically active in producing local programming. In addition to being a subjective score, the critical need score is also relative in the sense that each application is scored in comparison to other applications in the competition. These various factors explain why a similar application may receive a different critical need score in different years of this program.

VI. Award Administration Information

A. Award Notices

The Agency generally notifies applicants whose projects are selected for awards by faxing an award letter. The Agency follows the award letter with a grant agreement that contains all the terms and conditions for the grant. A copy of the standard agreement is posted on the RUS Web site at http://www.rurdev.usda.gov/UTP_DTVResources.html. An applicant must execute and return the grant agreement, accompanied by any additional items required by the grant agreement.

B. Administrative and National Policy Requirements
