

policy statement in Docket No. PL04–10–000 and Order No. 664 in September 2005. The burden estimate for the FERC–520 in this request is based on recent Commission experience and the actual number of FERC–520 filings made between 2008 and 2010.

The number of informational applications has increased steadily from 87 in 2004 to 335 in 2010. The Commission began to separate the FERC–520 filings by type of application in its OMB clearance estimates in 2008 because the number of each type of application filed had been changing significantly. Breaking the data out by type of filing allows these changes to be easily seen. The last OMB clearance package divided the FERC–520 filings only into two categories: full and informational filings. Decreases in the number of full and informational applications has necessitated the separate tracking and reporting of three types of possible applications and the burden hours each imposes. Therefore, this OMB clearance package adds Notice of Change filings, further breaking down the categories of FERC–520 to capture, convey and begin to analyze all types of FERC–520s.

The decrease in the number of FERC–520 applications may be due to directors retaining their positions longer because of the slow economy. The number of FERC–566 filings increased by 44% because in December 2007 FERC sent out notices to those who were expected to file a FERC–566 but did not during previous reporting years.

There is a change in the annual cost estimates since the last submission in 2008 due mainly to a decrease in the number of FERC–520 filers. However, the per-hour cost estimate for each collection has increased since 2008 because the Commission is using an updated salary estimate.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4)

training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
