Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

In accordance with Part 235 of Title 49 of the Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by a document dated April 22, 2011, the National Railroad Passenger Corporation (Amtrak) has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of a signal system. FRA assigned the petition Docket Number FRA-2011-0041.

Amtrak seeks approval of the proposed decrease of the limits of Hart Interlocking, milepost 32.7 on Amtrak's Springfield Line, Northeast Division East in Hartford, Connecticut. The proposed decrease of limits consists of moving the 2S signal on the siding south to the clearance point of the No. 12 switch adjacent to the 1S signal that is on track number 1; eliminating the 3S signal and making the No. 32 power-operated switch a hand-operated switch, which will be outside of the decreased interlocking limits.

BILLING CODE 4910-06-P

Federal Railroad Administration

[Docket Number FRA-2010-0174]

Petition for Modification of Single Car Air Brake Test Procedures

In accordance with Part 232 of Title 49 of the Code of Federal Regulations (CFR), this document provides the public notice that by a document dated November 19, 2010, the Port Authority Trans-Hudson Corporation (PATH) has requested the Federal Railroad

Administration (FRA) grant a modification of the single car air brake test procedures as prescribed in 49 CFR 232.305(a). FRA assigned the request Docket Number FRA-2010-0174.

PATH operates a fleet of 25 flat cars in consist with revenue cars utilized as locomotives in "work" trains, where the friction brakes operate in conjunction with the RT2 system of straight air brake employed on PATH cars. The single car air brake test described in Association of American Railroads (AAR) S-486 (incorporated by reference in 49 CFR 232.305) is intended for freight cars with automatic brake systems that are significantly different than the RT2 system utilized by PATH. As such, PATH believes that a brake system inspection and testing procedure similar to that performed on PATH MU locomotives is required since a conventional AAR S-486 single car air brake test cannot be performed on these flat cars.

PATH requests a modification to the single car air brake test procedure required in 49 CFR 232.305 by the adoption of "Procedure for the Inspection/Testing of PATH Flat Cars" (05/04/11 revision), Docket Number FRA-2010-0174-0004.1; and "Procedure for the Inspection/Testing of PATH Flat Cars Addendum Brake Rigging Inspection and Slack Adjustment" (05/04/11), Docket Number FRA-2010-0174-0005.1.

Copies of these documents and the petition, as well as any written communications concerning the petition, is available for review online at <http://www.regulations.gov> and in person at the Department of Transportation's Docket Operations Facility, 1200 New Jersey Avenue, SE., W12-140, Washington, DC 20590.
