

level set in 1978, to a level of 0.15 µg/m<sup>3</sup>. To provide increased protection against Pb-related welfare effects, the EPA revised the secondary NAAQS to be identical in all respects to the revised primary NAAQS. The EPA also established new criteria for siting ambient Pb monitors and new data collection requirements. The EPA determined that the pre-existing ambient Pb monitoring network was inadequate for determining whether many areas are meeting the revised Pb NAAQS. Monitors meeting the new network siting requirements were to begin operation January 1, 2010.

The process for designating areas following promulgation of a new or revised NAAQS is contained in CAA section 107(d) (42 U.S.C. 7407).

The CAA requires the EPA to complete the initial designation process within 2 years of promulgating a new or revised NAAQS. If the Administrator has insufficient information to make these designations, the EPA has the authority to extend the designation process by up to 1 year. In light of the new monitoring network, the EPA is completing the Pb designations in two rounds. In the first round, published on November 16, 2010, the EPA designated as "nonattainment" 16 areas as violating the 2008 Pb NAAQS based on data from the pre-2010 monitoring network. For all other areas, the EPA extended the deadline for designations by up to 1 year so that data from the newly deployed monitors can be considered in making appropriate designation decisions. States previously submitted air quality recommendations including appropriate boundaries within 1 year of promulgation of the NAAQS (tribes are not required to submit recommendations, but the EPA encourages their participation in the designations process), as required by the CAA. They were given an opportunity to update their recommendation letters for those remaining areas for our consideration in the second round of designations by December 15, 2010. By no later than 120 days prior to promulgating designations, the EPA is required to notify states or tribes of any intended modification to an area designation or boundary recommendation that the EPA deems necessary. On or about June 15, 2011, the EPA notified states and tribes of its intended area designations for the 2008 Pb NAAQS. States and tribes now have an opportunity to demonstrate why they believe a modification proposed by the EPA may be inappropriate. In these responses, the EPA has encouraged states and tribes to provide comments and additional information for

consideration by the EPA in finalizing designations. The EPA intends to make final designation determinations for the 2008 Pb NAAQS by October 14, 2011.

#### IV. Internet Web Site for Rulemaking Information

The EPA has also established a Web site for this rulemaking at <http://www.epa.gov/leaddesignations>. The Web site includes the EPA's State and tribal designation recommendations, information supporting the EPA's preliminary designation decisions, as well as the rulemaking actions and other related information that the public may find useful.

Dated: June 15, 2011.

## DEPARTMENT OF HOMELAND SECURITY

### Federal Emergency Management Agency

#### 44 CFR Part 67

[Docket ID FEMA-2011-0002; Internal Agency Docket No. FEMA-B-1197]

#### Proposed Flood Elevation Determinations

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Proposed rule.

**SUMMARY:** Comments are requested on the proposed Base (1% annual-chance) Flood Elevations (BFEs) and proposed BFE modifications for the communities listed in the table below. The purpose of this proposed rule is to seek general information and comment regarding the proposed regulatory flood elevations for the reach described by the downstream and upstream locations in the table below. The BFEs and modified BFEs are a part of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, these elevations, once finalized, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents in those buildings.

**DATES:** Comments are to be submitted on or before September 19, 2011.

**ADDRESSES:** The corresponding preliminary Flood Insurance Rate Map (FIRM) for the proposed BFEs for each community is available for inspection at the community's map repository. The respective addresses are listed in the table below.

You may submit comments, identified by Docket No. FEMA-B-1197, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-4064, or (e-mail) [luis.rodriguez1@dhs.gov](mailto:luis.rodriguez1@dhs.gov).

**FOR FURTHER INFORMATION CONTACT:** Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-4064, or (e-mail) [luis.rodriguez1@dhs.gov](mailto:luis.rodriguez1@dhs.gov).

**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA) proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Comments on any aspect of the Flood Insurance Study and FIRM, other than the proposed BFEs, will be considered. A letter acknowledging receipt of any comments will not be sent.

*National Environmental Policy Act.* This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

*Regulatory Flexibility Act.* As flood elevation determinations are not within the scope of the Regulatory Flexibility

Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

*Executive Order 12866, Regulatory Planning and Review.* This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866, as amended.

*Executive Order 13132, Federalism.* This proposed rule involves no policies that have federalism implications under Executive Order 13132.

*Executive Order 12988, Civil Justice Reform.* This proposed rule meets the applicable standards of Executive Order 12988.

**List of Subjects in 44 CFR Part 67**

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

**PART 67—[AMENDED]**

1. The authority citation for part 67 continues to read as follows:

**Authority:** 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

**§ 67.4 [Amended]**

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Flooding source(s)	Location of referenced elevation**	*Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)		Communities affected
		Effective	Modified	
<b>Kane County, Illinois, and Incorporated Areas</b>

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### 50 CFR Part 17

[Docket No. FWS-R6-ES-2011-0036; MO 92210-0-0008]

#### Endangered and Threatened Wildlife and Plants; 90-Day Finding on a Petition To List the Utah Population of the Gila Monster as an Endangered or a Threatened Distinct Population Segment

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of a 90-day petition finding.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), announce a

90-day finding on a petition to list the Utah population of the Gila monster (*Heloderma suspectum*) as an endangered or a threatened distinct population segment (DPS) under the Endangered Species Act of 1973, as amended (Act), and to designate critical habitat. Based on our review, we find that the petition does not present substantial information indicating that listing the Utah population of the Gila monster may be warranted, because the population does not constitute a DPS, and is therefore not a listable entity under the Act. Therefore, we are not initiating a status review in response to this petition. However, we ask the public to submit to us any new information that becomes available concerning the status of, or threats to, the Gila monster or its habitat at any time.

**DATES:** The finding announced in this document was made on June 21, 2011.

**ADDRESSES:** This finding is available on the Internet at <http://www.regulations.gov> at Docket Number [FWS-R6-ES-2011-0036]. Supporting documentation we used in preparing this finding is available for public inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Utah Ecological

Services Office, 2369 West Orton Circle, Suite 50, West Valley City, UT 84119. Please submit any new information, materials, comments, or questions concerning this finding to the above address.

#### FOR FURTHER INFORMATION CONTACT:

Larry Crist, Field Supervisor, Utah Ecological Services Office (see **ADDRESSES**), by telephone (801-975-3330) or by facsimile (801-975-3331). If you use a telecommunications device for the deaf (TDD), please call the Federal Information Relay Service (FIRS) at 800-877-8339.

#### SUPPLEMENTARY INFORMATION:

##### Background

Section 4(b)(3)(A) of the Act (16 U.S.C. 1531 *et seq.*) requires that we make a finding on whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information indicating that the petitioned action may be warranted. We are to base this finding on information provided in the petition, supporting information submitted with the petition, and information otherwise available in our files. To the maximum extent practicable, we are to make this finding within 90 days of our receipt of the petition, and publish our notice of
