Proposed Project: Health Information Technology Research Center (HITRC) User Experience Survey Evaluation and Research—0990—New—Office of the National Coordinator for Health Information Technology—ONC.

Abstract: The HITECH Act of 2009 is designed to jumpstart electronic health

record (EHR) adoption and health information exchange (HIE) by establishing the Health Information Technology Extension Program, consisting of a National Health Information Technology Research Center (HITRC) and Regional Extension Centers (RECs). The goals of the HITRC are to provide assistance and support to the 62 RECs, to enable them to fulfill their mission. The goals of the RECs are to promote the national adoption and meaningful use of EHRs by health care providers.

ONC will conduct an evaluation of the usefulness and usability of the HITRC contractor-provided materials and services in supporting the RECs.

This evaluation will provide critical formative feedback to the HITRC, from the REC perspective, about the quality, usefulness, and ease of use of the HITRC products, resources, and services and their ability to adequately support REC needs.

ONC is requesting approval to administer the HITRC User Experience Survey to two types of REC respondents who are customers of the HITRC program: REC frontline service staff (administered quarterly) and managers (administered annually) who draw support from the HITRC. These respondents will be asked to complete an online survey.

Proposed Project: Cross-Site Evaluation of the Minority Serving Institutions' HIV/AIDS Demonstration Initiative and Capacity-building Project (New)—OMB No. 0990-NEW—Office of HIV/AIDS Policy.

Abstract: Although minority populations comprise only 30% of the U.S. population, they account for nearly 65% of the new AIDS cases. As one strategy to address this disparity, the U.S. Department of Health and Human Services Office of HIV/AIDS Policy (OHAP) implemented the Minority

Serving Institutions' (MSI) HIV/AIDS Demonstration Initiative and Capacity-building Project in 7 colleges and universities serving diverse groups of Hispanic, African American, and Native American minority students. This cross-site evaluation of the project will assess changes among students in the 7 colleges over a two-year project period regarding: (1) Awareness and knowledge of risk factors and prevention methods for HIV/AIDS transmission; (2) the occurrence of high-risk behaviors; and (3) access to HIV/AIDS prevention, counseling, testing and referral services. Implementation challenges and lessons learned also will be identified. The data collected in this evaluation will provide information about how to most effectively implement HIV/AIDS interventions at MSIs; and can be used to assist the OHAP and other federal agencies in setting future priorities for HIV/AIDS prevention activities at MSIs, and potentially other educational institutions. The data will be collected through various methods and frequencies, including annual pre and post tests and surveys, and focus groups to MSI students; annual key informant interviews to MSI staff and community partners; and semi-annual outcome data reports and monthly progress reports completed by MSI staff.
