

approximately 3,000 residential addresses per month in Puerto Rico and refer to the survey as the PRCS.

In January 2006, the Census Bureau implemented ACS data collection for the entire national population by including a sample of 20,000 GQ facilities and a sample of 200,000 residents living in GQ facilities in the 50 states and the District of Columbia along with the annual household sample. A sample of 100 GQs and 1,000 GQ residents was also selected for participation in the PRCS.

Starting with the June 2011 mail panel, the Census Bureau increased the annual sample size for the ACS to 3,540,000 households (or 295,000 households per month) in the 50 states and the District of Columbia.

The primary need for continued full implementation of the ACS is to provide comparable data at the census tract and block group level. These data are needed by federal agencies and others to provide assurance of long-form type data availability since the elimination of the long form from the 2010 Census.

State and local governments are becoming more involved in administering and evaluating programs traditionally controlled by the federal government. This devolution of responsibility is often accompanied by federal funding through block grants. The data collected via the ACS will be useful not only to the federal agencies but also to state, local, and tribal governments in planning, administering, and evaluating programs.

The ACS provides more timely data for use in area estimation models that provide estimates of various concepts for small geographic areas. In essence, detailed data from national household and GQ surveys (whose samples are too small to provide reliable estimates for states or localities) can be combined with data from the ACS to create reliable estimates for small geographic areas.

We will also continue to examine the operational issues, research the data quality, collect cost information and make recommendations in the future for this annual data collection. Data users can use information from this survey to help evaluate the ACS program and to give feedback to the Census Bureau to help in our evaluations.

Affected Public: Households or individuals.

Frequency: The ACS is conducted monthly. Respondents are asked to give only a one-time response.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13 U.S.C., Sections 141, 193, and 221.
