SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The VTL Standard for Marine Terminals (29 CFR part 1917) specifies two collection of information (paperwork) requirements. The purpose of each of these requirements is to provide the workers with safe work practices when using VTLs.

Paragraph (j)(2) of 1917.71 requires the employer to develop, implement, and maintain a written plan for transporting vertically connected containers in the terminal. The transport plan helps ensure the safety of terminal employees and enhances productivity. Paragraph (k)(2) of 1917.71 requires that the written transport plan include the safe work zone and procedures to ensure that employees are not in the zone when a VTL is in motion.

Written plans give employers, workers, and OSHA compliance officers assurance that VTLs are safe to use and provide the compliance officers with an efficient means to assess employer compliance with the Standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary

for the proper performance of the Agency's functions, including whether the information is useful;

- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Vertical Tandem Lifts for Marine Terminals (29 CFR part 1917). OSHA is proposing to increase the existing burden hour estimate for the collection of information requirements specified by the Standard from 80 to 2,040 hours, a total increase of 1,960 hours. The increase in the burden hours is the result of the Agency estimating that more establishments are using VTLs. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Vertical Tandem Lifts (VTLs) in Marine Terminals (29 CFR Part 1917).

OMB Number: 1218-0260.

Affected Public: Business or other for-profits; Not-for-profit organizations; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 1,020.

Frequency of Response: On occasion.

Average Time per Response: The average time is 4 hours for employers to generate, develop, and maintain a written plan for transporting vertically coupled containers in a terminal.

Estimated Total Burden Hours: 2,040.

Estimated Cost (Operation and Maintenance): \$0.
