Nature and Extent of Confidentiality:

The Commission is not requesting respondents to submit confidential information to the Commission. Respondents may request that portions of their information remain confidential in accordance with 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) after this comment period in order to obtain the full three year clearance from them. The Commission is reporting a program change increase of 4,000 total annual burden hours and an increase of \$100,000 in annual costs.

On November 14, 2008, the Commission adopted a Second Report and Order and Memorandum Opinion and Order, FCC 08–260, ET Docket No. 04–186 that established rules to allow new and unlicensed wireless devices to operate in the broadcast television spectrum at locations where that spectrum is not being used by licensed services (this unused TV spectrum is often termed television “white spaces”). The rules will allow for the use of unlicensed TV band devices in the unused spectrum to provide broadband data and other services for consumers and businesses.

Subsequently on September 23, 2010, the Commission adopted a Second Memorandum Opinion and Order finalizing the rules to make the unused spectrum in the TV bands available for unlicensed broadband wireless devices. This action resolved on reconsideration certain legal and technical issues in order to provide certainty concerning the rules for operation of unlicensed transmitting devices in the television broadcast frequency bands (unlicensed TV bands devices or “TVBDs”). Resolution of these issues will now allow manufacturers to begin marketing unlicensed communications devices and systems that operate on frequencies in the TV bands in areas where they are not used by licensed services (“TV white spaces”).

In the Second Report and Order the Commission decided to designate one or more database administrator from the private sector to create and operate TV band databases. The TV band database administrators will act on behalf of the

FCC, but will offer a privately owned and operated service. Each database administrator will be responsible for operation of their database and coordination of the overall functioning of the database with other administrators, and will provide database access to TVBDs.

The Commission also decided that operators of venues using unlicensed wireless microphones will be required to register their sites with the Commission which will transmit the information to the database administrators. The registration request must be filed at least 30 days in advance and the requests will be made public to provide an opportunity for public comment or objections.

Federal Communications Commission.
