

D of the CAA will not in-and-of itself create any new regulations but simply disapproves certain state requirements for inclusion into the SIP.

H. Executive Order 13211, Actions That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA, Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through the Office of Management and Budget, explanations when the Agency decides not to use available and applicable voluntary consensus standards. EPA believes that this action is not subject to requirements of Section 12(d) of NTTAA because application of those requirements would be inconsistent with the CAA.

J. Executive Order 12898: Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, February 16, 1994) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA lacks the discretionary authority to address environmental justice in this proposed action. In reviewing SIP submissions, EPA's role is to approve or disapprove state choices, based on the criteria of the CAA. Accordingly, this action merely proposes to disapprove certain state requirements for inclusion into the SIP under section 110 and subchapter I, part D of the CAA and will not in-and-of itself create any new

requirements. Accordingly, it does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898.

K. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 19, 2011. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements.

Dated: June 28, 2011.

A. Stanley Meiburg,

Acting Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart L—Georgia

- 2. Section 52.578 is amended by adding paragraph (d), to read as follows:

§ 52.578 Control strategy: Sulfur oxides and particulate matter.

* * * * *

(d) *Disapproval.* EPA is disapproving portions of Georgia's Infrastructure SIP for the 2006 24-hour PM_{2.5} NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

Approval and Promulgation of Air Quality Implementation Plan; North Carolina; Disapproval of Interstate Transport Submission for the 2006 24-Hour PM_{2.5} Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to disapprove the portion of North Carolina's September 21, 2009, submission which was intended to meet the requirement to address interstate transport for the 2006 24-hour fine particulate matter (PM_{2.5}) national ambient air quality standards (NAAQS). Additionally, EPA is responding to comments received on EPA's January 26, 2011, proposed disapproval of the aforementioned portion of North Carolina's September 21, 2009, submission. On September 21, 2009, the State of North Carolina, through the North Carolina Department of Environment and Natural Resources (NC DENR), provided a letter to EPA certifying that North Carolina's state implementation plan (SIP) meets the interstate transport requirements with regard to the 2006 24-hour PM_{2.5} NAAQS. Specifically, the interstate transport requirements under the Clean Air Act (CAA or Act) prohibit a state's emissions from significantly contributing to nonattainment or interfering with the maintenance of the NAAQS in any other state. The effect of today's action will be the promulgation of a Federal Implementation Plan (FIP) for North Carolina no later than two years from the date of disapproval. The proposed Transport Rule, when final, is the FIP that EPA intends to implement for North Carolina.

DATES: *Effective Date:* This rule will be effective August 19, 2011.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2010–1015. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy

form. Publicly available docket materials are available either electronically through <http://www.regulations.gov> or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303-8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30 excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: For information regarding the North Carolina SIP, contact Mr. Zuri Farnvalo, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303-8960. Mr. Farnvalo's telephone number is (404) 562-9152; *e-mail address:* farnvalo.zuri@epa.gov. For information regarding the PM_{2.5} interstate transport requirements under section 110(a)(2)(D)(i), contact Mr. Steven Scofield, Regulatory Development Section, at the same address above. Mr. Scofield's telephone number is (404) 562-9034; *e-mail address:* scofield.steve@epa.gov.

- I. Background
- II. EPA's Responses to Comments
- III. Final Action
- IV. Statutory and Executive Order Reviews

I. Background

Upon promulgation of a new or revised NAAQS, sections 110(a)(1) and (2) of the CAA require states to address basic SIP requirements, including emissions inventories, monitoring, and modeling to assure attainment and maintenance for that NAAQS. On December 18, 2006, EPA revised the 24-hour average PM_{2.5} primary and secondary NAAQS from 65 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) to 35 $\mu\text{g}/\text{m}^3$, thus states were required to provide submissions to address section 110(a)(1) and (2) of the CAA (infrastructure SIPs) for this revised NAAQS. North Carolina provided its infrastructure submission for the 2006 PM_{2.5} NAAQS on September 21, 2009. On January 26, 2011, EPA proposed to disapprove the portion of North Carolina's September 21, 2009, infrastructure submission related to interstate transport (i.e., 110(a)(2)(D)(i)(I) for the 2006 PM_{2.5}

NAAQS. See 76 FR 4592. A summary of the background for this final action is provided below.

Section 110(a)(2) lists the elements that infrastructure SIPs must address, as applicable, including section 110(a)(2)(D)(i), which pertains to interstate transport of certain emissions. States were required to provide submissions to address the applicable 110(a)(2) infrastructure requirements, including section 110(a)(2)(D)(i), by September 21, 2009.¹

On September 25, 2009, EPA issued a guidance entitled "Guidance on SIP Elements Required Under Sections 110(a)(1) and (2) for the 2006 24-Hour Fine Particle (PM_{2.5}) National Ambient Air Quality Standards (NAAQS)" (herein after referred to as "EPA's 2009 Guidance"). EPA developed the EPA's 2009 Guidance to make additional recommendations to states for making submissions to meet the requirements of section 110, including 110(a)(2)(D)(i) for the revised 2006 24-hour PM_{2.5} NAAQS.

As identified in the EPA's 2009 Guidance, the "good neighbor" provisions in section 110(a)(2)(D)(i) require each state to submit a SIP that prohibits emissions that adversely affect another state in the ways contemplated in the CAA. Section 110(a)(2)(D)(i) contains four distinct requirements related to the impacts of interstate transport. Specifically, the SIP must prevent sources in the state from emitting pollutants in amounts which will: (1) Contribute significantly to nonattainment of the NAAQS in other states; (2) interfere with maintenance of the NAAQS in other states; (3) interfere with provisions to prevent significant deterioration of air quality in other states; or (4) interfere with efforts to protect visibility in other states.

In the EPA's 2009 Guidance, EPA explained that submissions from states pertaining to the "significant contribution" and "interfere with maintenance" requirements in section 110(a)(2)(D)(i)(I) must contain adequate provisions to prohibit air pollutant emissions from within the state that contribute significantly to nonattainment or interfere with maintenance of the NAAQS in any other state. EPA described a number of considerations for states for providing an adequate demonstration to address interstate transport requirements in the EPA's 2009 Guidance. First, EPA noted

¹The rule for the revised PM_{2.5} NAAQS was signed by the Administrator and publically disseminated on September 21, 2006. Because EPA did not prescribe a shorter period for 110(a) SIP submittals, the submittals for the 2006 24-hour NAAQS were due on September 21, 2009, three years from the September 21, 2006, signature date.

that the state's submission should explain whether or not emissions from the state contribute significantly to nonattainment or interfere with maintenance of the NAAQS in any other state and, if so, address the impact. EPA stated that the state's conclusion should be supported by an adequate technical analysis. Second, EPA recommended the various types of information that could be relevant to support the state's submission, such as information concerning emissions in the state, meteorological conditions in the state and the potentially impacted states, monitored ambient concentrations in the state, and air quality modeling. Third, EPA explained that states should address the "interfere with maintenance" requirement independently which requires an evaluation of impacts on areas of other states that are meeting the 2006 24-hour PM_{2.5} NAAQS, not merely areas designated nonattainment. Lastly, EPA explained that states could not rely on the Clean Air Interstate Rule (CAIR) to comply with CAA section 110(a)(2)(D)(i) requirements for the 2006 24-hour PM_{2.5} NAAQS because CAIR does not address this NAAQS. CAIR, promulgated by EPA on May 12, 2005 (See 70 FR 25162), required states to reduce emissions of sulfur dioxide and nitrogen oxides that significantly contribute to, and interfere with maintenance of the 1997 PM_{2.5} NAAQS and/or ozone in any downwind state. CAIR was intended to provide states covered by the rule with a mechanism to satisfy their CAA section 110(a)(2)(D)(i)(I) obligations to address significant contribution to downwind nonattainment and interference with maintenance in another state with respect to the 1997 ozone and PM_{2.5} NAAQS. Many states adopted the CAIR provisions and submitted SIPs to EPA to demonstrate compliance with the CAIR requirements in satisfaction of their 110(a)(2)(D)(i)(I) obligations for those two pollutants.

EPA was sued by a number of parties on various aspects of CAIR, and on July 11, 2008, the U.S. Court of Appeals for the District of Columbia Circuit (DC Circuit or Court) issued its decision to vacate and remand both CAIR and the associated CAIR FIPs in their entirety. *North Carolina v. EPA*, 531 F.3d 836 (DC Circuit, July 11, 2008). However, in response to EPA's petition for rehearing, the Court issued an order remanding CAIR to EPA without vacating either CAIR or the CAIR FIPs. *North Carolina v. EPA*, 550 F.3d 1176 (DC Circuit, December 23, 2008). The Court thereby left CAIR in place in order to "temporarily preserve the

environmental values covered by CAIR” until EPA replaces it with a rule consistent with the Court’s opinion. *Id.* at 1178. The Court directed EPA to “remedy CAIR’s flaws” consistent with its July 11, 2008, opinion, but declined to impose a schedule on EPA for completing that action. *Id.*

In order to address the judicial remand of CAIR, EPA has proposed a new rule to address interstate transport pursuant to section 110(a)(2)(D)(i), the “Federal Implementation Plans to Reduce Interstate Transport of Fine Particulate Matter and Ozone” (Transport Rule).² As part of the proposed Transport Rule, EPA specifically examined the section 110(a)(2)(D)(i) requirements that emissions from sources in a state must not “significantly contribute to nonattainment” and “interfere with maintenance” of the 2006 24-hour PM_{2.5} NAAQS by other states. The modeling performed for the proposed Transport Rule shows that North Carolina significantly contributes to nonattainment or interferes with maintenance of the 2006 24-hour PM_{2.5} NAAQS in downwind areas. EPA has now completed the modeling for the final Transport Rule and, as indicated by the technical support documents for this action, North Carolina in fact contributes to downwind nonattainment in another state or interferes with maintenance of the 2006 24-hour PM_{2.5} NAAQS in another state.

On September 21, 2009, the State of North Carolina, through NC DENR, provided a letter to EPA certifying that the North Carolina SIP meets the interstate transport requirements with regard to the 2006 24-hour PM_{2.5} NAAQS.³ Specifically, North Carolina certified that its current SIP adequately addresses the elements of CAA section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM_{2.5} NAAQS. CAA section 110(a)(2)(D)(i)(I) requires that implementation plans for each state contain adequate provisions to prohibit air pollutant emissions from sources within a state from significantly contributing to nonattainment in or

interfering with maintenance of the NAAQS (in this case the 2006 24-hour PM_{2.5} NAAQS) in any other state. On January 26, 2011, EPA proposed to disapprove the portion of North Carolina’s September 21, 2009, submission related to interstate transport for the 2006 24-hour PM_{2.5} NAAQS because EPA made the preliminary determination that North Carolina’s September 21, 2009, submission does not meet the requirements of section 110(a)(2)(D)(i)(I) of the CAA for this NAAQS. This action is finalizing EPA’s disapproval of North Carolina’s September 21, 2009, submission with regard to section 110(a)(2)(D)(i)(I) of the CAA for the 2006 24-hour PM_{2.5} NAAQS. *See* EPA’s January 26, 2011, proposed disapproval rulemaking at 76 FR 4592 for further information on EPA’s rationale for this final action.

II. EPA’s Responses to Comments

EPA received two sets of adverse comments on the January 26, 2011, proposed rulemaking to disapprove the portion of North Carolina’s September 21, 2009, infrastructure submission on the interstate transport requirements of sections 110(a)(2)(D)(i)(I) of the CAA for the 2006 24-hour PM_{2.5} NAAQS. A full set of the comments provided by NC DENR and the Georgia Environmental Protection Division (hereinafter referred to as “the Commenters”) are provided in the docket for this final action. As a general matter, the comments overlapped on some issues, and as a result, EPA has organized the response to comments by issue. In addition, EPA acknowledges Georgia’s comments regarding SIP processing in general. As Georgia is aware, EPA is considering improvements to the SIP process and appreciates Georgia’s comments in that regard.

For the most part, the Commenters oppose EPA’s proposed disapproval action for the interstate portion of North Carolina’s September 21, 2009, infrastructure submission for the 2006 24-hour PM_{2.5} NAAQS. The comments fall generally into the following categories: (1) States’ inability to rely on CAIR to satisfy the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS; (2) apparent lack of guidance from EPA on how states should meet the requirements; (3) concerns regarding the procedure of taking action to disapprove North Carolina’s submittal; (4) acknowledgement of states’ efforts and air quality conditions; and (5) concerns related to the Transport Rule. A summary of the comments and EPA’s responses are provided below.

States’ Inability to Rely on CAIR to Satisfy the 110(a)(2)(D)(i)(I) Requirements for the 2006 24-Hour PM_{2.5} NAAQS

Comment 1: The Commenters express concern with EPA’s proposed disapproval and assert that states should be able to rely on CAIR to address the transport requirements in section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM_{2.5} NAAQS. The Commenters explain that the Court left CAIR in place and opine that states should be able to rely on emissions reductions from CAIR to address transport. One Commenter also mentions that “[t]he Court did not impose a schedule on EPA for completing the Transport Rule; therefore, states have no assurances that EPA will ever replace the CAIR rule. Since there is no guarantee that the Transport Rule will be promulgated in a timely manner, states cannot rely on the reductions in the proposed Transport Rule and must rely on the CAIR reductions, which are permanent and enforceable.”

Response 1: As discussed in EPA’s 2009 Guidance, states cannot rely on the CAIR rule for the submission for the 2006 24-hour PM_{2.5} NAAQS because CAIR does not address this NAAQS, and was never intended to address this NAAQS. CAIR was originally put in place to address the 1997 8-hour ozone and PM_{2.5} NAAQS. In order to adequately address the requirements of section 110(a)(2)(D)(i)(I), states can only rely on permanent emission reductions to address transport for the 2006 24-hour PM_{2.5} NAAQS, and must include an appropriate technical demonstration.

Apparent Lack of Guidance From EPA on How States Should Meet the Requirements

Comment 2: Both Commenters note that that 110(a)(2) infrastructure SIPs for the 24-hour PM_{2.5} NAAQS were due September 21, 2009, but EPA’s guidance was not released to the states until September 25, 2009.

Response 2: While EPA’s 2009 Guidance regarding the 110(a)(2) infrastructure SIPs for the 2006 24-hour PM_{2.5} NAAQS was released on September 25, 2009, this guidance did not establish new requirements beyond those already required by section 110(a)(2)(D)(i)(I) of the CAA. Relevant portions of section 110(a)(2) require, as follows, “Each [implementation plan submitted by a State under this chapter] shall * * * contain adequate provisions—(i) prohibiting, consistent with the provisions of this subchapter, any source or other type of emissions activity within the State from emitting

² See “Federal Implementation Plans to Reduce Interstate Transport of Fine Particulate Matter and Ozone; Proposed Rule,” 75 FR 45210 (August 2, 2010).

³ North Carolina’s September 21, 2009, certification letter also explained that North Carolina’s current SIP sufficiently addresses other requirements of section 110(a)(2) for the 2006 24-hour PM_{2.5} NAAQS; however, today’s final rulemaking only relates to the section 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS. EPA will address the other section 110(a)(2) requirements for the 2006 24-hour PM_{2.5} NAAQS in relation to North Carolina’s SIP in a rulemaking separate from today’s final rulemaking.

any air pollutant in amounts which will—contribute significantly to nonattainment in, or interfere with maintenance by, any other State with respect to any such national primary or secondary ambient air quality standard * * *” States are statutorily obligated to address the requirements of section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM_{2.5} NAAQS. This above-quoted provision provides States with the requirement.

Comment 3: The Commenters express concern about communication in the SIP process. The Commenters go on to say that “[e]ven though EPA’s guidance was released only a short time later, EPA Region 4 gave absolutely no indication to its co-regulators that there would be a fatal flaw with the submittal.” The commenter further states that, “it wasn’t until a year later that states were informed via an e-mail on August 27, 2010, that ‘All Region 4 states submitted complete infrastructure SIPs for the 2006 PM_{2.5} NAAQS, and our intention is to disapprove the 110(a)(2)(D)(i)(I) portion of those unless it is withdrawn by the state.’”

Response 3: EPA disagrees with the Commenters’ assertion that they were initially notified in an August 27, 2010, e-mail about EPA’s expectations and concerns with states’ submissions reliance on CAIR to meet the requirements for section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM_{2.5} NAAQS. As was explained above, North Carolina’s obligation stems from the CAA. As is EPA’s practice, EPA reminded the States on a number of occasions of the interstate transport obligations in 110(a)(2)(D)(i)(I). In addition to the informal reminders (via e-mail and teleconferences, among other avenues), EPA’s January 2011 proposal served as a formal, legal notification and provided for a formal opportunity for public comment.

Although EPA reminded states of EPA’s expectations and concerns with states’ reliance on CAIR to meet the requirements for section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM_{2.5} NAAQS in an August 27, 2010, e-mail, EPA formally notified states of the expectations and concerns in the EPA’s 2009 Guidance. Specifically, EPA noted that SIP submissions that relied on CAIR for satisfying the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS would be inadequate, as CAIR did not address this NAAQS. EPA’s proposed disapproval of the portion of North Carolina’s September 21, 2009, submission did not occur until January 2011, which was over a year after EPA’s notification (through the release of the EPA’s 2009 Guidance) of any states’

deficiency for meeting the 110(a)(2)(D)(i)(I) requirement for the 2006 24-hr PM_{2.5} NAAQS had that state relied on CAIR. Thus, North Carolina had notification and an opportunity to provide supplemental information between the release of EPA’s 2009 Guidance and EPA’s proposed disapproval action in January 2011.

Comment 4: One Commenter raises concerns with EPA treating its 2009 Guidance as “binding” and suggests that this action is contrary to statements made by EPA in support of EPA and states being “co-regulators.”

Response 4: EPA disagrees with the Commenter’s assertion that the proposed disapproval is contrary to EPA treating the states as co-regulators. As was explained earlier, EPA has regular contact with its state co-regulators. With regard to the proposed disapproval action, EPA corresponded with North Carolina regarding the September 21, 2009, submittal prior to the proposed disapproval. In the past several months, EPA has corresponded with North Carolina on a number of occasions regarding other SIP revisions and EPA’s consideration of those revisions—as is EPA’s typical practice to support the co-regulator relationship.

Further, EPA notes that the January 26, 2011, proposed disapproval of North Carolina’s September 21, 2009, submission as it relates to satisfying the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS is based on EPA’s determination that North Carolina did not provide adequate information to demonstrate compliance with the requirements of section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM_{2.5} NAAQS for North Carolina. No new requirements were introduced in EPA’s 2009 Guidance. This guidance simply provided additional clarifications but the CAA requirements existed long before North Carolina’s September 21, 2009, deadline for a SIP submission.

Comment 5: One Commenter mentions that “EPA has not stated the amount of reduction they believe is needed to satisfy the transport requirements. Not only is this a situation where EPA moves the finish line (by releasing guidance AFTER the due date), the finish line isn’t even knowable (because EPA refuses to inform the states how much reduction is enough to satisfy the requirements). EPA seems to say that it has to be whatever the final Transport Rule says, even though there is no final Transport Rule.”

Response 5: EPA disagrees with this comment. As was explained earlier, the state obligation stems from the CAA itself. As co-regulators, EPA makes

efforts to assist states in submitting approvable revisions—and EPA took such action with EPA’s 2009 Guidance. States had an opportunity to conduct their own analyses regarding interstate transport. Section 110(a)(2) requires that the state’s submission contain adequate provisions prohibiting emissions from the state that contribute significantly to nonattainment of or interfere with maintenance of the NAAQS in any other state. In order to ensure compliance with the CAA’s mandate of “adequate” provisions, the state’s SIP revision must be supported by an adequate technical analysis, including, but not limited to, information concerning emissions in the state, meteorological conditions in the state and the potentially impacted states, monitored ambient concentrations in the state and the potentially impacted states, the distance to the nearest area that is not attaining the NAAQS in another state, and air quality modeling. EPA appreciates that North Carolina has initiated the process of such an analysis (which is included in North Carolina’s comment letter).

Comment 6: One Commenter notes EPA’s statement in the January 26, 2011, proposed disapproval where the Agency states: “* * * without an adequate technical analysis EPA does not believe that states can sufficiently address the section 110(a)(2)(D)(i)(I) requirement for the 2006 PM_{2.5} NAAQS.” The Commenter mentions that they, and possibly other states, were precluded from providing the necessary technical analysis by EPA because EPA did not release the guidance until after the SIP submission deadline. Further, the Commenter notes that EPA did not provide specific criteria for the technical analysis in the EPA’s 2009 Guidance, and mentions that “[h]ad EPA provided adequate criteria for an approvable SIP in a timely manner, it is likely that [the state] would have been able to submit an approvable SIP by the statutory deadline.” The Commenter included a technical analysis as part of their comments on the proposal.

Response 6: EPA does not agree with the Commenter’s assertions. As was explained earlier, the SIP submission requirement is identified in the CAA. In addition, States were alerted that a technical analysis that involved modeling and permanent, enforceable emission reductions could be used to make an adequate demonstration to satisfy the 110(a)(2)(D)(i)(I) requirement for the 1997 PM_{2.5} and ozone NAAQS when EPA promulgated CAIR in 2005. Due to the legal status of CAIR, states relying on CAIR as permanent were taking a risk given EPA’s proposed Transport Rule and the court decision

on CAIR. Further, states were officially informed that the 110(a)(2)(D)(i)(I) requirement for the 2006 24-hour PM_{2.5} NAAQS could not be satisfied by reliance on CAIR (since that rule did not consider the 2006 24-hour PM_{2.5} NAAQS) when EPA released EPA's 2009 Guidance. The submittal by North Carolina relied on CAIR and it did not include an adequate technical analysis—despite EPA's efforts to alert states that mere reliance on CAIR, on its own, would not meet the CAA requirements.

Consistent with section 110 of the CAA and implementing regulations at 40 CFR part 51, and as a general matter, "adequate technical analyses" are a cornerstone of ensuring that SIP revisions are approvable. EPA has addressed the timing of information in previous comments, but to underscore that point, EPA alerted states formally upon the release of the EPA's 2009 Guidance that CAIR could not be used to meet the 110(a)(2)(D)(i)(I) requirement for the 2006 PM_{2.5} NAAQS. In addition, there are formal SIP revision requirements described in 40 CFR part 51, subpart F. EPA does not agree that North Carolina's comments on the January 2011 disapproval proposal may be considered a "SIP revision;" nonetheless, EPA did review the comments as was described above. Further information regarding the path forward following today's action is described below.

Upon disapproval of North Carolina's submittal, EPA has a legal obligation, pursuant to the Act, to promulgate a FIP. Section 110(a)(1) of the Act requires states to submit SIPs that meet certain requirements within three years of promulgation of a NAAQS. These SIPs are required to contain, among other things, adequate provisions "prohibiting, consistent with the provisions of this subchapter, any source or other type of emissions activity within the state from emitting any air pollutant in amounts which will—(I) contribute significantly to nonattainment in, or interfere with maintenance by, any other state with respect to any such national primary or secondary ambient air quality standard." Section 110(a)(1) gives the Administrator authority to prescribe a period shorter than three years for the states to adopt and submit such SIPs, but does not give the Administrator authority to lengthen the time allowed for submission.

Section 110(c)(1) of the Act, in turn, requires EPA to promulgate FIPs if EPA has found that the state has failed to make a required submission or if EPA has disapproved a state submission or

found it to be incomplete. Specifically, section 110(c)(1) requires EPA to promulgate a FIP within two years after the Administrator "(A) finds that a state has failed to make a required submission or finds that the plan or plan revision submitted by the state does not satisfy the minimum criteria established under subsection (k)(1)(A) of this section or (B) disapproves a state implementation plan submission in whole or in part." The Act uses mandatory language, finding that EPA *shall* promulgate a FIPs at any time within 2 years after the actions identified 110(c)(1)(A) or 110(c)(1)(B) have occurred. EPA's legal obligation to promulgate FIPs arises when those actions occur without regard to the underlying reason for the underlying state SIP deficiency. The obligation to promulgate a FIP must be discharged by EPA unless two conditions are met: (1) The state corrects the deficiency; and (2) the Administrator approves the plan or plan revision, before the Administrator promulgates the FIP.

Under this statutory scheme, EPA has authority and an obligation to promulgate a FIP to correct a SIP deficiency if the actions identified in section 110(c)(1)(A) or (B) have been taken, and the two conditions identified in 110(c)(1) have not been met. The question of whether EPA has authority to promulgate any particular FIP, therefore, must be considered on a state specific basis.

EPA disagrees with the Commenter's suggestion that the rule is inconsistent with the CAA because it does not give states time to develop, submit and receive EPA approval of SIPs before the FIP goes into effect. Section 110(a)(2) calls on states to submit SIPs that contain adequate provisions prohibiting the emissions proscribed by section 110(a)(2)(D)(i)(I). However, when EPA has not received such SIP submission or has disapproved a SIP submission, it has an obligation created by section 110(c)(1) to promulgate a FIP that meets the requirements of section 110(a)(2)(D)(i)(I). EPA does not believe it has authority to adjust the deadlines established in the Act in order to give states additional time, after promulgation of the Transport Rule, to submit SIPs that comply with section 110(a)(2)(D)(i)(I). EPA does not believe it has authority to alter the statutory requirement that it promulgate FIPs within two years of making a finding of failure to submit. EPA sought to discharge this duty with respect to the states covered by CAIR for the PM_{2.5} NAAQS by promulgating CAIR; however, the Court found that rule unlawful and not sufficiently related to

the statutory mandate of section 110(a)(2)(D)(i)(I). For this reason, EPA does not believe it could argue that the CAIR FIPs completely discharged its duty to promulgate FIPs with respect to the states whose section 110(a)(2)(D)(i)(I) SIPs are disapproved.

EPA is following the SIP process established in the statute. The 110(a) SIPs for the 2006 PM_{2.5} standard were due in 2009. In each case, states were given the full 3 years to meet the requirement. The Transport Rule provides the FIP to fulfill the requirement that was unmet by the states through SIPs. EPA is required to promulgate a FIP within 2 years of a state's failure to have an approved SIP. States were in fact given the first chance to fulfill the requirement of Section 110(a)(2)(D)(i)(I). EPA's action is subsequent to the State's opportunity to first fulfill the requirement.

EPA has made every attempt to smooth the transition between the requirements of CAIR and those of the forthcoming Transport Rule. For future requirements, EPA will also make every effort to address transition issues. However, EPA cannot ignore its statutory obligations and therefore cannot ensure that no new requirements will be placed on the sources being regulated by this action. Every time a NAAQS is revised, there is a statutory obligation for states to submit SIPs to address certain CAA requirements. If states fail to meet the deadlines or submit incomplete or inadequate SIPs, EPA must act to ensure that the requirements are put into place.

Even though EPA is issuing a FIP, the State still has the opportunity to submit a SIP that can tailor requirements to the specific needs and concerns of the State in order to meet the applicable state budgets. Prior to this action, states had ample time under the provisions of the CAA to develop and submit approvable SIPs and did not. No state affected by the Transport Rule has submitted a SIP to replace the emission reductions that were required by CAIR, despite the *North Carolina* opinion issued in December 2008 that clearly said CAIR did not adequately address 110(a)(2)(D)(i)(I). While the remand left CAIR in place and states and sources were required to continue to comply with it, states had the opportunity to develop replacement measures to ensure that 110(a)(2)(D)(i)(I) components of their SIPs would continue to be fulfilled in the future.

Objection to the Use of Disapproval Actions for States' Implementation Plans

Comment 7: Two Commenters express concerns about EPA's proposed disapproval and indicate that EPA had an obligation to use section 110(k)(5) of the CAA. One Commenter states: "EPA continues to be resistant to exploring a legislative approach to fixing some of the SIP issues, yet the correct process under the existing Clean Air Act to appropriately address this issue is not being used." The Commenter goes on to state: "Section 110(k) requires that when EPA finds a plan to be inadequate, EPA shall (1) require the state to revise the plan, (2) notify the state of the inadequacy, and (3) may establish reasonable deadlines not to exceed 18 months." Additionally, the Commenter mentions that in their opinion, "The proposed disapproval completely ignores #1 and #3 and only partially satisfies #2. Regarding #2, the EPA proposal simply states EPA's position that the SIP is inadequate, but fails to notify us 'of the inadequacy.'" The Commenter asserts that "* * * EPA still has failed to provide any specificity on what is required of a state to submit an approvable SIP," and mentions that "These Clean Air Act requirements are not discretionary, and that 'EPA must comply with the provisions of Section 110(k)(5) by providing a reasonable period of time to allow [the state] to satisfy the inadequacy and sufficient and timely instructions on what is required to revise the plan instead of relying on a theoretical FIP as the sole remedy.'" The Commenter concludes by stating that "EPA may not take final action on this proposal until it complies with Section 110(k)(5) of the Clean Air Act."

Response 7: The issues raised in this comment are also addressed by Response 6, above. To further clarify what is included in Response 6, North Carolina's September 21, 2009, submission relating to section 110(a)(2)(D)(i)(I) for the 2006 PM_{2.5} NAAQS is being disapproved pursuant to sections 110(k)(2) and (3) of the CAA, not section 110(k)(5). Section 110(k)(5) is applicable to SIPs that have been federally-approved, and are subsequently found to be substantially inadequate. This is not the case for North Carolina's September 21, 2009, submission relating to section 110(a)(2)(D)(i)(I) for the 2006 PM_{2.5} NAAQS as the September 21, 2009, submission was provided to EPA for a new requirement that was triggered by the promulgation of the 24-hour PM_{2.5} NAAQS in 2006. EPA is required under

section 110(k)(3) to act upon a state submittal with an approval or disapproval, within the time period designated under section 110(k)(2). With this action, EPA is disapproving North Carolina's September 21, 2009, submission relating to section 110(a)(2)(D)(i)(I), because EPA has made the determination that the North Carolina SIP does not satisfy these requirements for the 2006 PM_{2.5} NAAQS. North Carolina's submission is inadequate for its failure to meet the statutory requirements of 110(a)(2)(D)(i)(I) as noted above. The State can correct the deficiency by submitting a transport SIP that meets the provisions of the forthcoming Transport Rule or otherwise eliminates significant contribution and interference with maintenance. See Response to Comment 6.

Comment 8: One Commenter expresses concern about EPA's statement in the January 26, 2011, proposed disapprovals regarding the Agency not taking action on some elements of the states' 2006 24-hour PM_{2.5} infrastructure submissions, and notes the Agency's statutory timeframe for taking action on SIP submissions. Specifically, the Commenter cites the following statement from EPA's January 26, 2011, proposed rule: "[t]herefore, EPA is proposing to disapprove those provisions which relate to the 110(a)(2)(D)(i)(I) demonstration and to take no action on the remainder of the demonstration at this time." The Commenter mentions that EPA is "clearly in violation of Clean Air Act Section 110(k)(2)" by not taking action on the remainder of the states' submissions.

Response 8: In this action, EPA is disapproving certain elements of the State's submission related to the requirements under section 110(a)(2)(D)(i)(I). EPA has also determined that these elements are severable from the rest of the submission. Comments on elements that are not being addressed here are not relevant to this action. As noted herein, EPA intends to act on those elements in a subsequent action. See Response to Comment 6 for additional information.

Comment 9: One Commenter indicates that EPA could use section 110(k)(4) to conditionally approve the states' implementation plans for the transport requirements related to the 2006 24-hour PM_{2.5} NAAQS in anticipation of the promulgation of the final Transport Rule, "[a]ssuming EPA adequately addresses modeling and emissions inventory concerns raised during the comment period * * *"

Response 9: EPA does not agree that the use of 110(k)(4) for a conditional approval is appropriate in this circumstance. Conditional approvals may be used to approve a plan revision based on a written commitment of the State to adopt specific enforceable measures by a date certain, but not later than 1 year after the date of approval of the plan revision. If the State does not adopt specific enforceable measures within a year, the conditional approval automatically converts to a disapproval. The forthcoming Transport Rule is an action that is being promulgated from EPA and not the State, so it is unclear what "condition" the State would be responsible for satisfying by relying on the final promulgation of the Transport Rule. Further, as the Commenter implies, use of 110(k)(4) is optional. See Response to Comment 6 for additional information.

Acknowledgement of States' Efforts and Air Quality Conditions

Comment 10: Both Commenters mention innovative air pollution control strategies that states have implemented to reduce emissions, and seem to indicate that the adoption of those strategies, in-and-of itself, complies with the interstate transport provisions of section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM_{2.5} NAAQS. The Commenters opine that state laws and rules have resulted in enormous reductions of pollutants that are key pollutants to interstate transport.

Response 10: EPA agrees that states have implemented innovative air pollution control strategies that have provided significant reductions in emissions, and the Agency commends states for their efforts. However, today's action relates to whether North Carolina has provided an adequate technical analysis and emissions reductions to show compliance with the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS for North Carolina. It is EPA's final determination that North Carolina's September 21, 2009, submission does not provide an adequate technical analysis and emissions reductions for this determination and thus EPA is disapproving the portion of North Carolina's September 21, 2009, submission as it relates to the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS for North Carolina.

Concerns Related to the Transport Rule

Comment 11: One Commenter expresses concern regarding EPA's statement in the January 26, 2011, proposed disapproval regarding the

modeling used to support the proposed Transport Rule, and the findings in relation to whether states significantly contribute to nonattainment or interfere with maintenance of the 2006 24-hour PM_{2.5} NAAQS in downwind areas. The Commenter states that “based on 2007–2009 monitoring data, all of these areas are currently meeting the 2006 24-hour PM_{2.5} NAAQS” and expresses concern that EPA did not note the area’s status with regard to the 2006 24-hour PM_{2.5} NAAQS in the proposal. The Commenter goes on to say “we noted in our official comments on the proposed Transport Rule, EPA had numerous errors in the modeling inputs and failed to ensure that the model performance was acceptable. This may explain the disparity between EPA’s modeling results and the real world monitors.”

Response 11: Today’s action relates to whether the State provided an adequate technical analysis and emissions reductions to show compliance with the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS for North Carolina, and is not based on the attainment status of North Carolina areas. North Carolina did not provide an adequate technical analysis to EPA to demonstrate compliance with the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS. With regard to the Commenter’s concern about the forthcoming Transport Rule, EPA notes that the Agency received numerous comments on the proposed Transport Rule and is considering those comments as it works toward promulgation of a final Transport Rule. All comments on the Transport Rule will be addressed in that context.

Comment 12: Both Commenters assert that EPA’s proposed finding of significant contribution for the proposed Transport Rule is based on an inaccurate emissions inventory, fails to take into account all of the reductions required by the state rules already in effect, and contains numerous other errors that only compound these problems.

Response 12: EPA received numerous comments on the proposed Transport Rule and is considering those comments as it works toward promulgation of a final Transport Rule. All comments on the Transport Rule will be addressed in that context.

III. Final Action

EPA is taking final action to disapprove the portion of North Carolina’s September 21, 2009, submission, relating to section 110(a)(2)(D)(i)(I), because EPA has made the determination that North Carolina SIP does not satisfy the requirements for

the 2006 24-hour PM_{2.5} NAAQS. Although EPA is taking final action to disapprove the portion of North Carolina’s September 21, 2009, submission relating to section 110(a)(2)(D)(i)(I), EPA acknowledges the State’s efforts to address this requirement in its September 21, 2009, submission. Unfortunately, the submittal relies on CAIR and without an adequate technical analysis EPA does not believe that states can adequately address the section 110(a)(2)(D)(i)(I) requirement for the 2006 PM_{2.5} NAAQS. The purpose of the Transport Rule that EPA is developing and has proposed is to respond to the remand of CAIR by the Court and address the section 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM_{2.5} NAAQS for the affected states. In today’s action, EPA is not taking any disapproval action on the remaining elements of the submission, including other section 110(a)(2) infrastructure elements, and specifically the section 110(a)(2)(D)(i)(II) portion regarding interference with measures required in the applicable SIP for another state designed to prevent significant deterioration of air quality and protect visibility but instead will act on those provisions in a separate rulemaking.

Under section 179(a) of the CAA, final disapproval of a submittal that addresses a requirement of a Part D Plan (42 U.S.C. sections 7501–7515) or is required in response to a finding of substantial inadequacy as described in section 7410(k)(5) (SIP call) starts a sanctions clock. Section 110(a)(2)(D)(i)(I) provisions (the provisions being disapproved in today’s notice) were not submitted to meet requirements for Part D, and therefore, no sanctions will be triggered. This final action triggers the requirement under section 110(c) that EPA promulgate a FIP no later than 2 years from the date of the disapproval unless the State corrects the deficiency, and the Administrator approves the plan or plan revision before the Administrator promulgates such FIP. The proposed Transport Rule, when final, is the FIP that EPA intends to implement to satisfy the 110(a)(2)(D)(i)(I) requirement for North Carolina for the 2006 24-hr PM_{2.5} NAAQS.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to act on state law as

meeting federal requirements and does not impose additional requirements beyond those imposed by state law.

A. Executive Order 12866, Regulatory Planning and Review

This action is not a “significant regulatory action” under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to review under the Executive Order.

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, because this SIP disapproval under section 110 and subchapter I, part D of the CAA will not in-and-of itself create any new information collection burdens but simply disapproves certain state requirements for inclusion into the SIP. Burden is defined at 5 CFR 1320.3(b).

C. Regulatory Flexibility Act (RFA)

The RFA generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small governmental jurisdictions. For purposes of assessing the impacts of today’s rule on small entities, small entity is defined as: (1) A small business as defined by the Small Business Administration’s regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today’s final rule on small entities, I certify that this action will not have a significant impact on a substantial number of small entities. This rule does not impose any requirements or create impacts on small entities. This SIP disapproval under section 110 and subchapter I, part D of the CAA will not in-and-of itself create any new requirements but simply disapproves certain state requirements for inclusion into the SIP. Accordingly, it affords no opportunity for EPA to fashion for small entities less burdensome compliance or reporting requirements or timetables or exemptions from all or part of the rule.

The fact that the CAA prescribes that various consequences (e.g., higher offset requirements) may or will flow from this disapproval does not mean that EPA either can or must conduct a regulatory flexibility analysis for this action. Therefore, this action will not have a significant economic impact on a substantial number of small entities. EPA continues to be interested in the potential impacts of this proposed rule on small entities and welcome comments on issues related to such impacts.

D. Unfunded Mandates Reform Act

This action contains no Federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for state, local, or tribal governments or the private sector. EPA has determined that the disapproval action does not include a federal mandate that may result in estimated costs of \$100 million or more to either state, local, or tribal governments in the aggregate, or to the private sector. This action disapproves pre-existing requirements under state or local law, and imposes no new requirements. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, result from this action.

E. Executive Order 13132, Federalism

Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” “Policies that have federalism implications” is defined in the Executive Order to include regulations that have “substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.”

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, because it merely disapproves certain state requirements for inclusion into the SIP and does not alter the relationship or the distribution of power and responsibilities established in the CAA. Thus, Executive Order 13132 does not apply to this action.

F. Executive Order 13175, Coordination with Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP EPA is disapproving would not apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it because it is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997). This SIP disapproval under section 110 and subchapter I, part D of the CAA will not in-and-of itself create any new regulations but simply disapproves certain state requirements for inclusion into the SIP.

H. Executive Order 13211, Actions that Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA, Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through the Office of Management and Budget, explanations when the Agency decides not to use available and applicable voluntary consensus standards. EPA believes that this action is not subject to requirements of Section 12(d) of NTTAA because application of those

requirements would be inconsistent with the CAA.

J. Executive Order 12898: Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, February 16, 1994) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA lacks the discretionary authority to address environmental justice in this proposed action. In reviewing SIP submissions, EPA’s role is to approve or disapprove state choices, based on the criteria of the CAA. Accordingly, this action merely proposes to disapprove certain state requirements for inclusion into the SIP under section 110 and subchapter I, part D of the CAA and will not in-and-of itself create any new requirements. Accordingly, it does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898.

K. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 19, 2011. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements.

Dated: June 28, 2011.

A. Stanley Meiburg,

Acting Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart II—North Carolina

■ 2. Section 52.1781 is amended by adding paragraph (g), to read as follows:

§ 52.1781 Control strategy: Sulfur oxides and particulate matter.

* * * * *

(g) *Disapproval.* EPA is disapproving portions of North Carolina's Infrastructure SIP for the 2006 24-hour PM_{2.5} NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

Approval of Air Quality Implementation Plans; Indiana and Ohio; Disapproval of Interstate Transport State Implementation Plan Revision for the 2006 24-hour PM_{2.5} NAAQS

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to its authority under the Clean Air Act (CAA), EPA is taking final action to disapprove the

portions of submittals by the Indiana Department of Environmental Management (IDEM) and the Ohio Environmental Protection Agency (Ohio EPA) that pertain to requirements in the CAA to address interstate transport for the 2006 24-hour fine particle (PM_{2.5}) National Ambient Air Quality Standards (NAAQS). EPA is not, however, currently taking action on the remainder of the State Implementation Plan (SIP) submittals from IDEM and Ohio EPA concerning other basic or "Infrastructure" elements required under the CAA. The proposed rule associated with this final action was published on February 4, 2011. The effect of this action will be an obligation for EPA to promulgate a Federal Implementation Plan (FIP) for Indiana and Ohio no later than two years from the date of disapproval. The Transport Rule, when final, is the FIP that EPA intends to implement for Indiana and Ohio.

DATES: This final rule is effective on August 19, 2011.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA-R05-OAR-2009-0805. All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly-available only in hard copy. Publicly-available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy at the U.S. Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Andy Chang at (312) 886-0258 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Andy Chang, Environmental Engineer, Attainment Planning and Maintenance Section, Air Programs Branch (AR-18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-0258, chang.andy@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is the background for this action?

II. What is our response to comments received on the notice of proposed rulemaking?

III. What action is EPA taking?

IV. Statutory and Executive Order Reviews

I. What is the background for this action?

Section 110(a)(1) of the CAA requires states to submit basic or "Infrastructure" SIPs to address a new or revised NAAQS within three years after promulgation of such standards, or within such shorter period as EPA may prescribe. As provided by section 110(k)(2) of the CAA, within twelve months of a determination that a submitted SIP is complete under 110(k)(1) of the CAA, the Administrator shall act on the plan. As authorized in section 110(k)(3) of the CAA, where portions of the state submittals are severable, within that twelve-month period EPA may approve the portions of the submittals that meet the requirements of the CAA, take no action on certain portions of the submittals, and disapprove the portions of the submittals that do not meet the requirements of the CAA. When the deficient provisions are not severable from all of the submitted provisions, EPA must propose disapproval of the submittals, consistent with section 110(k)(3) of the CAA.

Section 110(a)(2) of the CAA lists the elements that such new Infrastructure SIPs must address, as applicable, including section 110(a)(2)(D)(i), which pertains to interstate transport of certain emissions, also known as the CAA "good neighbor" provisions.

On December 18, 2006, EPA revised the 24-hour average PM_{2.5} primary and secondary NAAQS from 65 micrograms per cubic meter (µg/m³) to 35 µg/m³ (see, 71 FR 61144).¹ On September 25, 2009, EPA issued its "Guidance on SIP Elements Required Under Sections 110(a)(1) and (2) for the 2006 24-Hour Fine Particle (PM_{2.5}) National Ambient Air Quality Standards (NAAQS)" (2009 Guidance). EPA developed the 2009 Guidance for States making submissions to meet the requirements of section 110, including 110(a)(2)(D)(i) for the revised 2006 24-hour PM_{2.5} NAAQS.

As identified in the 2009 Guidance, the "good neighbor" provisions in section 110(a)(2)(D)(i) require each state to submit a SIP that prohibits emissions that adversely affect another state in the

¹ The rule for the revised PM_{2.5} NAAQS was signed by the Administrator and publically disseminated on September 21, 2006. Because EPA did not prescribe a shorter period for 110(a) SIP submittals, these submittals for the 2006 24-hour PM_{2.5} NAAQS were due on September 21, 2009, three years from the September 21, 2006 signature date.
