SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

This guide focuses on terrestrial analyses for licensing new nuclear power stations under the combined licensing process in Title 10 of the Code of Federal Regulations (10 CFR) part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants" and power reactors under 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities." This guide is also useful in identifying the more limited studies and analyses needed for nuclear reactor operating license renewal under 10 CFR Part 54, "Requirements for Renewal of Operating Licenses for Nuclear Power Plants," and portions may also be relevant to nuclear reactor decommissioning.

Dated at Rockville, Maryland, this 5th day of August, 2011.
