

panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office.

Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Members of the public can submit comments for a federal advisory committee to consider as it develops advice for EPA. Input from the public to the SAB will have the most impact if it provides specific scientific or technical information or analysis for SAB panels to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comment should contact the Designated Federal Officer directly. *Oral Statements:* In general, individuals or groups requesting an oral presentation at a teleconference will be limited to three minutes. Those interested in being placed on the public speakers list for the September 7, 2011 teleconference should contact Dr. Nugent at the contact information provided above no later than September 1, 2011. *Written Statements:* Written statements should be supplied to the DFO via e-mail at the contact information noted above by September 1, 2011 for the teleconference so that the information may be made available to the Panel members for their consideration. Written statements should be supplied in one of the following electronic formats: Adobe Acrobat PDF, MS Word, MS PowerPoint, or Rich Text files in IBM-PC/Windows 98/2000/XP format. It is the SAB Staff Office general policy to post written comments on the Web page for the advisory meeting or teleconference. Submitters are requested to provide an unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its Web sites. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the SAB Web site. Copyrighted material will not be posted without explicit permission of the copyright holder.

Accessibility: For information on access or services for individuals with disabilities, please contact Dr. Nugent (202) 564-2218 or nugent.angela@epa.gov. To request accommodation of a disability, please contact Dr. Nugent preferably at least ten days prior to the teleconference to give EPA as much time as possible to process your request.

Dated: August 9, 2011.

Needs and Uses: The Commission published a 60-day notice on April 18, 2011 seeking comments from the public (see 76 FR 21739). This current published notice is seeking an

additional 30 days of public comment. The Commission received the previous comments from the 60-day notice and has taken them into account.

The Commission first adopted a public inspection file requirement more than 40 years ago. The public file requirement grew out of Congress' 1960 amendment of Sections 309 and 311 of the Communications Act of 1934. Finding that Congress, in enacting these provisions, was guarding "the right of the general public to be informed, not merely the rights of those who have special interests," the Commission adopted the public inspection file requirement to "make information to which the public already has a right more readily available, so that the public will be encouraged to play a more active part in dialogue with broadcast licensees." In return for their exclusive use of public spectrum, broadcasters must operate and program their stations in the "public interest, convenience and necessity." This means that all stations must be responsive and accountable to their local community of license. The manner in which broadcasters communicate with their communities is a core function of their role as licensees. Specific items in the public file, listed below, include items that provide station information to the public, like ownership reports, contour maps, citizens agreements, EEO reports and quarterly lists of programs that the stations believe addressed important issues in their community. Access to the public inspection file allows the public to monitor a station's public interest performance. The information provided in a station's public file enables citizens to engage in an informed dialog with their local stations or to file complaints or petitions to deny the renewal of a station's license. Comments, complaints, and petitions to deny filed by the viewing public have long been a part of the regulatory and the renewal process. As part of the Commission's license renewal process, the Commission does not routinely monitor every aspect of stations' compliance with Commission rules; rather, it depends on viewers and listeners to provide information about whether stations are meeting their public interest obligations.

The following Information Collection Requirements are part of this collection and have been approved by OMB:

47 CFR 73.3526(a) and 73.3527(a) require that licensees and permittees of commercial and noncommercial educational (NCE) broadcast stations maintain a local public inspection file. The contents of the file vary according to type of service and status. A separate

file shall be maintained for each station for which an application is pending or for which an authorization is outstanding. The public inspection file must be maintained so long as an authorization to operate the station is outstanding.

47 CFR 73.3526(b) and 73.3527(b) require that the public inspection file be maintained at the main studio of the station. An applicant for a new station or change of community shall maintain its file at an accessible place in the proposed community of license or at its proposed main studio.

47 CFR 73.3526(c) and 73.3527(c) require the licensee/permittee to make the file available for public inspection at any time during regular business hours. All or part of this file may be maintained in a computer database as long as a computer terminal is made available to members of the public. Materials in the public file must be made available for review, printing or reproduction upon request.

Licensees that maintain their main studios and public file outside their communities of license are required to mail a copy of "The Public and Broadcasting" to anyone requesting a copy. Licensees shall be prepared to assist members of the public in identifying the documents they may want to be sent to them by mail.

47 CFR 73.3526(d) and 73.3527(d) require an assignor to maintain the public inspection file until such time as the assignment is consummated. At that time, the assignee is required to maintain the file.

47 CFR 73.3526(e) and 73.3527(e) specify the contents of the public inspection files. Separate rule sections not subject to this information collection require the creation and submission to the Commission of many of the items that must be retained in the public inspection file. As such, the burden estimates for creation and submission of these documents are calculated in other information collections. The burden estimates included in this information collection pertain only to making these items publicly available. We have listed below some of the relevant information collections pertaining to the creation and submission of such documents. The documents to be retained in the public inspection files are as follows:

(a) A copy of the current FCC authorization to construct or operate the station, as well as any other documents necessary to reflect any modifications thereto or any conditions that the FCC has placed on the authorization;

(b) A copy of any application tendered for filing with the FCC,

(l) For commercial TV broadcast stations, records sufficient to permit substantiation of the station's certification, in its license renewal application, of compliance with the commercial limits on children's television programming. The records must be placed in the public file quarterly. The FCC Form 398, Children's Television Programming Reports, reflecting efforts made by the licensee during the preceding quarter, and efforts planned for the next quarter, to serve the educational and informational needs of children must be placed in the public file quarterly [Children's Television Programming Report (OMB control number 3060-0754, FCC Form 398)];

(m) For NCE stations, a list of donors supporting specific programs. The list is to be retained for two years from the date of the broadcast of the specific program supported, and will be reserved for sponsors/underwriters of specific programming;

(n) Each applicant for renewal of license shall place in the public file a statement certifying compliance with the pre-filing and post-filing local public notice announcements. These statements shall be placed in the public file within 7 days of the last day of broadcast [Section 73.3580, Local Public Notice of Filing of Broadcast Applications (OMB control number 3060-0031)];

(o) Commercial radio and TV licensees who provide programming to another licensee's station, pursuant to time brokerage agreements, are required to keep copies of those agreements in their public inspection files, with confidential information blocked out where appropriate;

(p) Commercial TV stations must make an election between retransmission consent and must-carry status once every three years. Television stations that fail to make an election will be deemed to have elected must-carry status. This statement must be placed in the station's public inspection file. This rule codifies Section 325(b)(3)(B) of the Communications Act of 1934, as amended [Section 73.1601,

Deletion of Repositioning of Broadcast Signals; Section 76.1617, Initial Must-Carry Notice; and Sections 76.1697 and 76.1708, Principal Headend (OMB control number 3060-0649)];

(r) Commercial radio and TV licensees who have entered into joint sales agreements must place the agreements in the public inspection file, with confidential and proprietary information blocked out where appropriate.

47 CFR 73.1212(e), 73.1943 and 76.1701 require licensees of broadcast stations and every cable television system to keep and permit public inspection of a complete record (political file) of all requests for broadcast and cablecast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the system of such requests, and the charges made, if any, if the request is granted. The disposition includes the schedule of time purchased, when the spots actually aired, the rates charged, and the classes of time purchased. Also, when free time is provided for use by or on behalf of candidates, a record of the free time provided is to be placed in the political file as soon as possible and maintained for a period of two years. 47 CFR 73.1212(e) and 76.1701 also require that, when an entity sponsors broadcast or cablecast material that concerns a political matter or a discussion of a controversial issue of public importance, a list must be maintained in the public file of the system that includes the sponsoring entity's chief executive officers, or members of its executive committee or of its board of directors [Sections 73.1212, 76.1615 and 76.1715, Sponsorship Identification (OMB control number 3060-0174); Section 73.1942, Candidates Rates, 76.206, Candidates Rates, Section 76.1611, Political Cable Rates and Classes of Time (OMB control number 3060-0501)].

The Commission is requesting an extension of this information collection for a three year period from OMB.
