Fruit Crops. No changes in those requirements as a result of this action are anticipated. Should any changes become necessary, they would be submitted to OMB for approval.

This action imposes no additional reporting or recordkeeping requirements on either small or large Oregon-Washington fresh pear handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/MarketingOrdersSmallBusinessGuide.* Any questions about the compliance guide should be sent to Laurel May at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) The 2011–2012 fiscal period begins on July 1, 2011, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable pears handled during such fiscal period; (2) this action decreases the assessment rate for assessable fresh winter pears beginning with the 2011–2012 fiscal period; (3) handlers are aware of this action which was unanimously recommended by the Committee at a public meeting and is similar to other assessment rate actions issued in past years; and (4) this interim rule provides a 60-day comment period, and all comments timely received will be considered prior to finalization of this rule.

List of Subjects in 7 CFR Part 927

Marketing agreements, Pears, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 927 is amended as follows:

PART 927—PEARS GROWN IN OREGON AND WASHINGTON

■ 1. The authority citation for 7 CFR part 927 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. In § 927.236, the introductory text and paragraph (b) are revised to read as follows:

§ 927.236 Fresh pear assessment rate.

On and after July 1, 2011, the following base rates of assessment for fresh pears are established for the Fresh Pear Committee:

* * * * *

(b) $0.471 per 44-pound net weight standard box or container equivalent for any or all varieties or subvarieties of fresh pears classified as ''winter''; and

* * * * *

Dated: August 19, 2011.

[Doc. # AMS–CN–11–0026; CN–11–002]

Cotton Board Rules and Regulations: Adjusting Supplemental Assessment on Imports

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Agricultural Marketing Service (AMS) is amending the Cotton Board Rules and Regulations by updating the value assigned to imported cotton for the purpose of calculating supplemental assessments collected for use by the Cotton Research and Promotion Program. An amendment is required to adjust the supplemental assessment and to ensure that assessments collected on imported raw cotton and the cotton content of imported cotton-containing products are the same as assessments collected on domestically produced cotton. In addition, AMS is updating the textile trade conversion factors used to determine the raw fiber equivalents of imported cotton-containing products and expanding the number of Harmonized Tariff Schedule (HTS) statistical reporting numbers from the current 706 to 2,371 to assess all imported cotton and cotton-containing products.

DATES: *Effective Date:* September 30, 2011.

FOR FURTHER INFORMATION CONTACT: Shethir M. Riva, Chief, Research and Promotion Staff, Cotton and Tobacco Programs, AMS, USDA, Stop 0224, 1400 Independence Ave., SW., Room 2635–S, Washington, DC 20250–0224, telephone (540) 361–2726, facsimile (202) 690–1718, or e-mail at *Shethir.Riva@ams.usda.gov.*

SUPPLEMENTARY INFORMATION:

Executive Order 12866

The Office of Management and Budget has waived the review process required by Executive Order 12866 for this action.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect.

The Cotton Research and Promotion Act (7 U.S.C. 2101–2118) (Act) provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 12 of the Act, any person subject to an order may file with the Secretary of Agriculture (Secretary) a petition stating that the order, any provision of the plan, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such person is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule on the petition. The Act provides that the District Court of the United States in any district in which the person is an inhabitant, or has his principal place of business, has jurisdiction to review the Secretary's ruling, provided a complaint is filed within 20 days from the date of the entry of ruling.

Background

Import Assessment

Amendments to the Act were enacted by Congress under Subtitle G of Title XIX of the Food, Agriculture, Conservation, and Trade Act of 1990

(Pub. L. 101–624, 104 Stat. 3909, November 28, 1990). These amendments contained two provisions that authorized changes in the funding procedures for the Cotton Research and Promotion Program.

These provisions are: (1) The authority to assess imported cotton and cotton products; and (2) the termination of the right of cotton producers to demand a refund of assessments.

As amended, the Cotton Research and Promotion Order (7 CFR part 1205) (Order) was approved by cotton producers and importers voting in a referendum held July 17–26, 1991, and the amended Order was published in the **Federal Register** on December 10, 1991, (56 FR 64470). A proposed rule implementing the amended Order was published in the **Federal Register** on December 17, 1991, (56 FR 65450). Implementing rules were published on July 1 and 2, 1992, (57 FR 29181) and (57 FR 29431), respectively.

This rule increases the value assigned to imported cotton in the Cotton Board Rules and Regulations (7 CFR 1205.510(b)(2)). The total value of assessments levied is determined using a two-part assessment. The first part of the assessment is levied on the weight of cotton imported at a rate of $1 per 500-pound bale of cotton or $1 per 226.8 kilograms of cotton. The second part of the assessment—known as the supplemental assessment—is levied at a rate of five-tenths of one percent of the value of imported raw cotton or the cotton content of imported cotton-containing products. The supplemental assessment is combined with the per bale equivalent to determine the total value and assessment of the imported cotton or imported cotton-containing products.

Section 1205.510(b)(2) of the Cotton Research and Promotion Rules and Regulations provides for the calendar year weighted average price received by U.S. farmers for Upland cotton to represent the value of domestically produced cotton, imported raw cotton and the cotton content of imported cotton-containing products. Use of the same weighted average price ensures that assessments paid on domestically produced cotton and assessments on imported cotton are the same. The source of price statistics is *Agricultural Prices,* a publication of the National Agricultural Statistics Service (NASS) of the Department of Agriculture.

The current value of imported cotton as published in the **Federal Register** (74 FR 32400) for the purpose of calculating assessments on imported cotton is $0.010880 per kilogram. Using the weighted average price received by U.S. farmers for Upland cotton for the calendar year 2010, the new value of imported cotton is $0.012665 per kilogram.

An example of the complete assessment formula and how the figures are obtained is as follows:

One bale is equal to 500 pounds.

One kilogram equals 2.2046 pounds.

One pound equals 0.453597 kilograms.

One Dollar Per Bale Assessment Converted to Kilograms

A 500-pound bale equals 226.8 kg. (500 × .453597).

$1 per bale assessment equals $0.002 per pound or 0.2 cents per pound (1/500) or $0.004409 per kg or 0.4409 cents per kg. (1/226.8).

Supplemental Assessment of 5/10 of One Percent of the Value of the Cotton Converted to Kilograms

The 2010 calendar year weighted average price received by producers for Upland cotton is $0.749 per pound or $1.651 per kg. (0.749 × 2.2046).

Five tenths of one percent of the weighted average price in kilograms equals $0.008256 per kg. (1.651 × .005).

Total Assessment

The total assessment per kilogram of raw cotton is obtained by adding the $1 per bale equivalent assessment of $0.004409 per kg. and the supplemental assessment $0.008256 per kg., which equals $0.012665 per kg.

The current assessment on imported cotton is $0.01088 per kilogram of imported cotton. The new assessment is $0.012665, an increase of $0.001785 per kilogram. This increase reflects the increase in the average weighted price of Upland Cotton Received by U.S. Farmers during the period January through December 2010. The Import Assessment Table in section 1205.510(b)(3) indicates the conversion factors used to estimate cotton equivalent quantities and the total assessment per kilogram due for each HTS number subject to assessment. Since the weighted average price of cotton that serves as the basis of the supplemental assessment calculation has changed, total assessment rates reported in this table have been revised.

Conversion Factors

USDA's Economic Research Service (ERS) regularly publishes textile trade data which includes estimates of the amount of cotton contained in imported cotton products. The raw cotton equivalent is the estimated weight of the cotton fiber in the garment adjusted for waste that occurs in spinning, weaving, and cutting. To estimate raw cotton equivalents, ERS uses a set of cotton textile trade conversion factors. The Agricultural Marketing Service (AMS) currently uses a subset of these conversion factors to estimate cotton equivalents contained in cotton textile products imported into the U.S., which serve as the basis for collecting cotton import assessments for the Cotton Research and Promotion Program.

ERS periodically evaluates how technology-driven improvements in textile production efficiencies—reductions in yarn waste—impacts the total quantity of raw cotton consumed in the production of various textile products. Such an evaluation was conducted initially in 1989 shortly after the U.S. adopted the international system of harmonized tariff codes, again in 2000, and most recently in 2009. The 2009 evaluation of conversion factors, which was based on two published studies,[1] concluded that technological advancements in textile production processes have significantly changed since the current conversion factors were established. Furthermore, factors used to convert imported textile products into raw cotton bale-equivalent quantities were revised. Results of the ERS study were published in *Cotton and Wool Outlook,* October 13, 2009.[2]

An analysis of these cotton trade conversion factors for a subset of cotton textile imports on which cotton import assessments are collected revealed that the differences between the current conversion factors and revised conversion factors represent an approximate 4.7 percent reduction in cotton (177 million kilogram) or $1.93 million less in assessments (177 million kilograms * $0.01088/kilogram = $1.93 million). Therefore, AMS adopts the revised and expanded textile trade conversion factors in the Import Assessment Table that appears in section 1205.510(b)(3)(ii) in the regulations to reflect updated textile technologies and to more accurately estimate the amount of cotton contained

in cotton-containing imports. This will assure a more fair and accurate assessment of imported cotton-containing products.

HTS Codes

In a 2010 report, ERS determined that the current set of HTS codes used by AMS for research and promotion assessment purposes accounted for 89 percent of the total U.S. cotton product imports leaving 11 percent (442 million kilograms) of imported cotton products unassessed. By expanding AMS' list to include 2,371 HTS codes and using the current assessment rate of $0.01088 per kilogram, the Cotton Research and Promotion Program could have collected approximately $4.81 million more in 2009. Based on these findings, the Board requested that AMS take necessary steps to publish its annual import assessment update with updated conversion factors and to increase the number of HTS codes from 706 to 2,371 so that the program collects close to 100 percent on imported cotton and cotton-containing products, as it does with the domestic producer assessment. AMS is expanding the list of HTS codes included in 7 CFR part 1205 to include all HTS codes for cotton and cotton-containing products for the collection of import assessments.

Summary of Comments

A proposed rule was published on June 3, 2011, with a comment period of June 3, 2011, through July 5, 2011 (76 FR 32088). AMS received 12 comments from individuals and various organizations representing segments of the cotton or manufacturing industry. Eight comments came from those supporting the proposed rule, including one from the Cotton Board who administers the Cotton Research and Promotion Program. AMS received three opposing comments and one comment from an individual who took no position but questioned parts of the proposed rule. All comments received are available for public inspection at Cotton and Tobacco Programs, AMS, USDA, Stop 0224, 1400 Independence Ave., SW., Room 2635–S, Washington, DC 20250–0224 during regular business hours. Comments may also be found at *http://www.regulations.gov.*

Overall, the comments were favorable in support of both the proposed changes and the Cotton Research and Promotion Program.

Of the commenters, two commenters opposed the proposed rule, but believed that the Cotton Research and Promotion Program has merit and numerous benefits. The commenters expressed concerned over the proposed increase in the cotton assessment and argued that it would burden companies. The commenters referenced the volatility of the cotton market and increases in cotton prices witnessed over the past 12–18 months, and they objected to any revised assessment that would result in an increase in the amount of fees that are paid by importers under the Cotton Research and Promotion Program. In addition, one individual stated that this is not an appropriate time to pass along additional fees or cost to consumers given the burdens of unemployment and suggested decreasing the producers assessment to coincide with the current importer fee. Section 1205.510, ''Levy of assessments'', provides ''the rate of the supplemental assessment on imported cotton will be the same as that levied on cotton produced within the United States.'' In addition, section 1205.510 provides that the 12-month average of monthly weighted average prices received by U.S. farmers will be used as the value of imported cotton for the purpose of levying the supplemental assessment on imported cotton. AMS used the 2010 price statistics found in *Agricultural Prices,* a publication of the National Agricultural Statistics Service of the Department of Agriculture, to calculate the average weighted price and convert it to arrive at the new rate of 1.2665 cents per kilogram. Therefore, AMS has made no changes to the proposed rule based on these comments.

Four organizations encouraged USDA to streamline the process for annually calculating the value of cotton and ensure that the value is calculated at approximately the same time each year. AMS is currently exploring possible options to streamline the process.

AMS received a comment questioning the proposed list of HTS codes and identified some examples of proposed codes that are categorized in the HTS as containing only man-made fibers. The commenter surmised that if no cotton is contained in these HTS codes, then the codes should not be assessed the cotton fee or have a conversion factor.

The proposed rule contained all HTS codes identified by ERS in its 2009 study as containing some cotton. AMS in turn uses these HTS codes for assessment purposes. While the HTS codes noted by the commenter are indeed HTS codes classified by the International Trade Commission as being man-made fiber products, they are not considered 100 percent man-made fibers and, therefore, are estimated to contain small percentages of other fibers, like cotton. This would also hold true for mostly cotton fiber products, as not all codes labeled as cotton products are considered 100 percent cotton. In fact, only about 11 percent of the total textile codes noted is considered 100 percent cotton.

According to ERS, the goal of the estimation process established by ERS is to determine the accumulated quantities of raw fiber contained in both imported and exported textile products and how these quantities change over time. While it is possible for an individual textile product—or even a particular shipment within a given textile product code—to contain a larger (or smaller) percentage of an individual fiber than estimated by ERS, the purpose is to estimate the most common and average fiber makeup of each textile HTS code.

It is the responsibility of the Cotton Board to collect assessments on cotton and cotton-containing products. ERS concluded that products classified with man-made fiber HTS codes are estimated to contain other fibers, including cotton, and conversion factors have been calculated to determine the average amount. The Cotton Research and Promotion Program will used the amount of cotton to calculate the assessment.

AMS agrees that there is a possibility of select import products identified as containing cotton actually being composed of 100 percent man-made fibers. The Cotton Research and Promotion regulations in section 1205.336 provides for a remedy. If an importer has paid assessments and can prove that such assessment was made on fiber other than Upland cotton, the importer has the right to request and receive a reimbursement from the Cotton Board.

Regulatory Flexibility Act and Paperwork Reduction Act

In accordance with the Regulatory Flexibility Act (RFA) [5 U.S.C. 601–612], AMS examined the economic impact of this rule on small entities. The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such action so that small businesses will not be unduly or disproportionately burdened. The Small Business Administration defines, in 13 CFR part 121, small agricultural producers as those having annual receipts of no more than $750,000 and small agricultural service firms (importers) as having receipts of no more than $7,000,000. An estimated 13,000 importers are subject to the rules and regulations issued pursuant to the Cotton Research and Promotion Order. Most are considered small entities as defined by the Small Business Administration.

This final rule only affects importers of cotton and cotton-containing products, and it raises the assessments paid by the importers under the Cotton Research and Promotion Order. The current assessment on imported cotton is $0.01088 per kilogram, which is equivalent to 1.088 cents per kilogram, of imported cotton. The new assessment is $.012665 which is equivalent to 1.2665 cents per kilogram and was calculated based on the 12-month average of monthly weighted average prices received by U.S. cotton farmers. Section 1205.510, ''Levy of assessments'', provides ''the rate of the supplemental assessment on imported cotton will be the same as that levied on cotton produced within the United States.'' In addition, section 1205.510 provides that the 12-month average of monthly weighted average prices received by U.S. farmers will be used as the value of imported cotton for the purpose of levying the supplemental assessment on imported cotton. AMS used the 2010 price statistics found in *Agricultural Prices,* a publication of the National Agricultural Statistics Service of the Department of Agriculture, to calculate the average weighted price and convert it to arrive at the new rate of 1.2665 cents per kilogram as detailed in the Background section.

Under the Cotton Research and Promotion Program, assessments are used by the Cotton Board to finance research and promotion programs designed to increase consumer demand for Upland cotton within the United States and international markets. In 2010, producer assessments totaled $46.5 million and importer assessments totaled $38.2 million. According to the Cotton Board, should the volume of cotton products imported into the U.S. remain at the same level in 2011, one could expect the increased importer assessment to generate approximately $10.8 million.

Importers with line-items appearing on U.S. Customs and Border Protection documentation with value of the cotton contained therein results of an assessment of two dollars ($2.00) or less will not be subject to assessments. In addition, imported cotton and products may be exempt from assessment if the cotton content of products is U.S. produced, cotton other than Upland, or imported products that are eligible to be labeled as 100 percent organic under the National Organic Program (7 CFR part 205) and who is not a split operation.

There are no Federal rules that duplicate, overlap, or conflict with this rule.

In compliance with Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act (PRA) (44 U.S.C. Chapter 35*)* the information collection requirements contained in the regulation that needed to be amended have been previously approved by OMB and were assigned control number 0581–0093. This rule does not result in a change to the information collection and recordkeeping requirements previously approved.

List of Subjects in 7 CFR Part 1205

Advertising, Agricultural research, Cotton, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble 7 CFR part 1205 is amended as follows:

PART 1205—COTTON RESEARCH AND PROMOTION

■ 1. The authority citation for part 1205 continues to read as follows:

Authority: 7 U.S.C. 2101–2118.

■ 2. In § 1205.510, paragraph (b)(2) and the table in paragraph (b)(3)(ii) are revised to read as follows:

§ 1205.510 Levy of assessments.

* * * * *

(b) * * *

(2) The 12-month average of monthly weighted average prices received by U.S. farmers will be calculated annually. Such weighted average will be used as the value of imported cotton for the purpose of levying the supplemental assessment on imported cotton and will be expressed in kilograms. The value of imported cotton for the purpose of levying this supplemental assessment is 1.2665 cents per kilogram.

[FR Doc. 2011–22159 Filed 8–30–11; 8:45 am]

BILLING CODE 3410–02–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2011–0910; Directorate Identifier 2011–NM–151–AD; Amendment 39–16797; AD 2011–18–15]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Model DHC–8–400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

There have been three in-service reports of cracked barrel nuts found at the front spar locations of the wing-to-fuselage attachment joints. Additionally, three operators have reported finding a loose washer in the barrel nut assembly. Failure of the barrel nuts could compromise the structural integrity of the wing-to-fuselage attachments.

* * * * *

The unsafe condition could result in separation of the wing from the airplane during flight. This AD requires actions that are intended to address the unsafe condition described in the MCAI.

DATES: This AD becomes effective September 15, 2011.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of September 15, 2011.

We must receive comments on this AD by October 17, 2011.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Aziz Ahmed, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone (516) 228–7329; fax (516) 794–5531.

SUPPLEMENTARY INFORMATION:

Discussion

Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued Canadian Emergency Airworthiness Directive CF–2011–24, dated July 21, 2011 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

There have been three in-service reports of cracked barrel nuts found at the front spar locations of the wing-to-fuselage attachment joints. Additionally, three operators have reported finding a loose washer in the barrel nut assembly. Failure of the barrel nuts could compromise the structural integrity of the wing-to-fuselage attachments.

Preliminary investigation determined that these cracks are due to hydrogen embrittlement.

This [TCCA airworthiness] directive mandates an initial and repetitive [torque checks to determine if the bolt pre-load is correct and, if necessary], detailed inspection of the barrel nuts [and cradle for cracking, pitting, and corrosion; and replacement of hardware if necessary].

The unsafe condition could result in separation of the wing from the airplane during flight.

Relevant Service Information

Bombardier has issued Alert Service Bulletin A84–57–25, dated July 20, 2011. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of This AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all pertinent information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between the AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have required different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a Note within the AD.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because failure of the wing-to-fuselage attachments could result in separation of the wing from the airplane during flight. Therefore, we determined that notice and opportunity for public
