SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the vision requirements in 49 CFR 391.41(b)(10), which applies to drivers of CMVs in interstate commerce, for a two-year period if it finds “such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.” The

procedures for requesting an exemption (including renewals) are set out in 49 CFR part 381.

Exemption Decision

This notice addresses 32 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. FMCSA has evaluated these 32 applications for renewal on their merits and decided to extend each exemption for a renewable two-year period. They are the following:

Daniel F. Albers
John A. Bridges
Eddie M. Brown
Edwin L. Bupp
Clifford D. Carpenter
Duane C. Conway
Brian W. Curtis
Roger D. Davidson, Sr.
Robin C. Duckett
Marco A. Esquivel
Tomie L. Estes
Raymond L. Herman
Jesse R. Hillhouse, Jr.
Billy R. Holdman
Ray C. Johnson
Terry R. Jones
Randall H. Keil
James J. Mitchell
Andrew M. Nurnberg
Kenneth R. Pedersen
Joshua R. Perkins
Eligio M. Ramirez
Victor C. Richert
Craig R. Saari
Jerry L. Schroder
Gerald J. Shamlu
William C. Smith
Larry D. Steiner
Scott C. Teich
Anthony T. Truiolo
Gregory A. VanLue
Kevin W. Wunderlin

The exemptions are extended subject to the following conditions: (1) That each individual has a physical examination every year (a) By an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the standard in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provides a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retains a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official. Each exemption

will be valid for two years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. In accordance with 49 U.S.C. 31136(e) and 31315, each of the 32 applicants has satisfied the entry conditions for obtaining an exemption from the vision requirements (63 FR 66226; 64 FR 16517; 66 FR 41656; 68 FR 19598; 68 FR 33570; 68 FR 44837; 70 FR 17504; 70 FR 25878; 70 FR 30997; 70 FR 41811; 72 FR 27624; 72 FR 28093; 72 FR 39879; 72 FR 40362; 72 FR 52419; 74 FR 20523; 74 FR 26461; 74 FR 34630; 74 FR 41971). Each of these 32 applicants has requested renewal of the exemption and has submitted evidence showing that the vision in the better eye continues to meet the standard specified at 49 CFR 391.41(b)(10) and that the vision impairment is stable. In addition, a review of each record of safety while driving with the respective vision deficiencies over the past two years indicates each applicant continues to meet the vision exemption standards. These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each renewal applicant for a period of two years is likely to achieve a level of safety equal to that existing without the exemption.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by October 3, 2011.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed,

subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 32 individuals from the vision requirement in 49 CFR 391.41(b)(10). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the qualifications, experience, and medical condition of each applicant for an exemption from the vision requirements. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Issued on: August 19, 2011.

Associate Administrator Office of Policy.

SUPPLEMENTARY INFORMATION:

I. Background

The purpose of this advisory bulletin is to remind all owners and operators of gas and hazardous liquid pipelines, particularly those with facilities located in offshore and inland areas, about the serious safety-related issues that can result from the passage of hurricanes. That includes the potential for damage to offshore platforms and pipelines and onshore pumping stations, compressor stations, and terminals.

Operators of gas and hazardous liquid pipelines have a general obligation to identify any conditions that can adversely affect the operation of their pipelines and to take appropriate corrective measures upon discovering such conditions. Specifically, § 192.613 of the gas pipeline safety regulations states that “[e]ach operator shall have a procedure for continuing surveillance of its facilities to determine and take appropriate action concerning * * * unusual operating and maintenance conditions,” and that “[i]f a segment of pipeline is determined to be in unsatisfactory condition but no immediate hazard exists, the operator
