Discussion

On October 1, 2007 (72 FR 55864), the NRC published a final rule that amended its regulations to include jurisdiction over discrete sources of radium-226, accelerator-produced radioactive materials, and discrete sources of naturally occurring radioactive material, as required by the Energy Policy Act of 2005, which was signed into law on August 8, 2005 (NARM Rule). In order to clarify those discrete sources of radium-226 under military control that are subject to NRC regulation, as interpreted in the statement of considerations to the NARM Rule, on July 8, 2011 (76 FR 40282), the NRC published for public comment the proposed draft RIS 2011-XX; NRC Regulation of Military Operational Radium-226. On August 29, 2011, the NRC received a request from the U.S. Department of Defense (DoD) for a meeting with the NRC staff and an extension of the comment period. In response to the request for DoD, the NRC has decided to reopen the comment period for an additional 75 days. The NRC staff will schedule the public meeting for a date that has yet to be determined. Notice of this public meeting will be provided through the NRC's Web site.

Dated at Rockville, Maryland, this 8th day of September 2011.

For the Nuclear Regulatory Commission.

Deputy Director, Decommissioning and Uranium Recover Licensing Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs.

DEPARTMENT OF ENERGY

10 CFR Part 431

RIN 1904-AC62

Efficiency and Renewables Advisory Committee, Appliance Standards Subcommittee, Negotiated Rulemaking Subcommittee/Working Group for Low-Voltage Dry-Type Distribution Transformers

AGENCY: Department of Energy, Office of Energy Efficiency and Renewable Energy.

ACTION: Notice of open meeting.

SUMMARY: This document announces an open meeting of the Negotiated Rulemaking Working Group for Low-Voltage Dry-Type Distribution Transformers (hereafter "LV Group"). The LV Group is a working group within the Appliance Standards Subcommittee of the Efficiency and Renewables Advisory Committee (ERAC). The purpose of the LV Group is to discuss and, if possible, reach consensus on a proposed rule for regulating the energy efficiency of distribution transformers, as authorized by the Energy Policy Conservation Act (EPCA) of 1975, as amended, 42 U.S.C. 6313(a)(6)(C) and 6317(a). A separate Working Group on Liquid-Immersed and Medium-Voltage Dry Type Distribution Transformers is being convened to discuss and, if possible, reach consensus on a proposed rule for regulating the energy efficiency of medium-voltage and liquid-immersed transformers, as authorized by the Energy Policy Conservation Act (EPCA) of 1975, as amended, 42 U.S.C. 6313(a)(6)(C) and 6317(a) [FR Doc. 2011-19263].

DATES: Wednesday, September 28, 2011, 9 a.m.-5 p.m.

ADDRESSES: Department of Energy, Forrestal Building, 1000 Independence Avenue, SW., Room 8E-089, Washington, DC 20585. Please arrive at least 30 minutes early for building entry requirements. Please view the Public Participation section for more information.

FOR FURTHER INFORMATION CONTACT: John Cymbalsky, U.S. Department of Energy, Office of Building Technologies (EE-2J), 1000 Independence Avenue, SW., Washington, DC 20585-0121. Telephone: (202) 287-1692. E-mail: John.Cymbalsky@ee.doe.gov.

SUPPLEMENTARY INFORMATION:

Background: The Department of Energy has decided to use the negotiated rulemaking process to develop proposed energy efficiency standards for distribution transformers. The primary reasons for using the negotiated rulemaking process for developing a proposed Federal standard is that stakeholders strongly support a consensual rulemaking effort and DOE believes such a regulatory negotiation process will be less adversarial and better suited to resolving the complex technical issues raised by this rulemaking. An important virtue of negotiated rulemaking is that it allows expert dialog that is much better than traditional techniques at getting the facts and issues right and will result in a proposed rule that will effectively reflect Congressional intent.

A regulatory negotiation will enable DOE to engage in direct and sustained dialog with informed, interested, and affected parties when drafting the proposed regulation that is then presented to the public for comment. Gaining this early understanding of all parties' perspectives allows DOE to address key issues at an earlier stage of the process, thereby allowing more time for an iterative process to resolve issues. A rule drafted by negotiation with informed and affected parties is more likely to maximize benefits while minimizing unnecessary costs than one conceived or drafted without the opportunity for sustained dialog among interested and expert parties. DOE anticipates that there will be a need for fewer substantive changes to a proposed rule developed under a regulatory negotiation process prior to the publication of a final rule.

To the maximum extent possible, consistent with the legal obligations of the Department, DOE will use the consensus of the advisory committee or subcommittee as the basis for the rule the Department proposes for public notice and comment.

Membership: The Members of the LV Group were chosen from nominations submitted in response to the Department of Energy's call for nominations published in the **Federal Register** on Friday, August 12, 2011 [FR Doc. 2011-20541]. The selections are designed to ensure a broad and balanced array of stakeholder interests and

expertise on the negotiating working group for the purpose of developing a rule that is legally and economically justified, technically sound, fair to all parties, and in the public interest. All meetings are open to all stakeholders and the public, and participation by all is welcome within boundaries as required by the orderly conduct of business. Considerations are still being made for additional membership, but the current Members of the LV Group are as follows:

- Tim Ballo (Earthjustice).
- Scott Beck (Lakeview Metals).
- Eric Petersen (AK Steel).
- Gary Fernstrom (PG&E).
- Andrew DeLaski (ASAP).
- Robin Roy (NRDC).
- Steve Nadel (ACEEE).
- Eduardo Robles (Eaton).
- Robert Greeson (Federal Pacific).
- Vijay Tendulkar (ONYX Power).
- Chad Kennedy (Schneider).
- John Caskey (NEMA).
- Millure David (Metglas).
- John Cymbalsky (U.S. Department of Energy).

• Mark Stoering (Xcel Energy).

Purpose of the Meeting: To launch the process of seeking consensus on a proposed rule for setting standards for the energy efficiency of low-voltage dry type distribution transformers, as authorized by the Energy Policy Conservation Act (EPCA) of 1975, as amended, 42 U.S.C. 6313(a)(6)(C) and 6317(a).

Tentative Agenda: The meeting will start at 9 a.m. and will conclude at 5 p.m. on Wednesday, September 28, 2011, in room 8E-089 at DOE's, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.
