SUPPLEMENTARY INFORMATION:

Subject of Challenge Competition: The "Reporting Device Adverse Events Challenge" asks multi-disciplinary teams to develop an application that facilitates the reporting of adverse events related to medical devices, whether implanted or used in the hospital, clinic, or home. The application would make it easy for patients to report adverse events to their provider, support the download of information from EMR or PHR systems to populate the adverse event report and provide high quality data, capture useful information including patient demographics and device data that is easily accessible to all stakeholders (patients, providers, manufacturers, and researchers) using current technologies including PC-based browsers, mobile phones, and tablets, and leverage NwHIN standards and services including transport, content, and vocabularies.
