II. Information Specific to This Document

Two sections of the Clean Air Act govern the establishment and revision of the NAAQS. Section 108 (42 U.S.C. 7408) directs the Administrator to identify and list certain air pollutants and then to issue air quality criteria for those pollutants. The Administrator is to list those air pollutants that in her “judgment, cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare;” “the presence of which in the ambient air results from numerous or diverse mobile or stationary sources;” and “for which * * * [the Administrator] plans to issue air quality criteria * * *” Air quality criteria are intended to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air * * *” 42 U.S.C. 7408(b). Under section 109 (42 U.S.C. 7409), EPA establishes primary (health-based) and secondary (welfare-based) NAAQS for pollutants for which air quality criteria are issued. Section 109(d) requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria. Section 109(d)(2) requires that an independent scientific review committee “shall complete a review of the criteria * * * and the national primary and secondary ambient air quality standards * * * and shall recommend to the Administrator any new * * * standards and revisions of existing criteria and standards as may be appropriate. * * *” Since the early 1980’s, this independent review function has been performed by the Clean Air Scientific Advisory Committee (CASAC).

Presently, EPA is reviewing the NAAQS for Pb.¹ The First Draft ISA was released in early May (76 FR 26284) and reviewed by CASAC at a public meeting announced in a separate notice (76 FR 36120). The document that is the subject

of today’s notice considers the extent to which information and conclusions presented in the First Draft ISA provide support for the development of quantitative assessments of risk and exposure for health and/or welfare effects. This document is available on the EPA’s Technology Transfer Network Web site at http://www.epa.gov/ttn/naaqs/standards/pb/s_pb_index.html. The document is accessible in the “Documents from Current Review” section under “Planning Documents.”

The REA Planning Document has been made available for consultation with CASAC and for public comment. Comments should be submitted to the docket, as described above. The CASAC consultation on this planning document occurred on July 21, 2011. A separate **Federal Register** notice published on June 21, 2011 (76 FR 36120) provided additional details about this meeting and the process for participation. The document that is the subject of today’s notice does not represent and should not be construed to represent any final EPA policy, viewpoint, or determination.
