

to voice their opinions on the LEDPA decision.

The DEIS is available on the COE Web site at: <http://www.saw.usace.army.mil/Wetlands/Projects/HampsteadBypass> and also available on the NCDOT Web site at: <http://www.ncdot.org/projects/US17HampsteadBypass/>. Any person having difficulty in viewing the document online can contact the COE project manager or the NCDOT project manager for a CD copy of the document.

After distribution and review of the Draft EIS and Final EIS, the Applicant understands that the U.S. Army Corps of Engineers in coordination with the North Carolina Department of Transportation will issue a Record of Decision (ROD) for the project. The ROD will document the completion of the EIS process and will serve as a basis for permitting decisions by Federal and State agencies.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the U.S. Army Corps of Engineers at the address provided. The Wilmington District will periodically issue Public Notices soliciting public and agency comment on the proposed action and alternatives to the proposed action as they are developed.

Dated: September 15, 2011.

## DEPARTMENT OF DEFENSE

### Department of the Army; Corps of Engineers

#### Notice of Intent To Prepare a Draft Environmental Impact Statement for the Puyallup River General Investigation Study, Pierce County, WA

**AGENCY:** Department of the Army, U.S. Army Corps of Engineers, DoD.

**ACTION:** Notice of Intent.

**SUMMARY:** The Seattle District, U.S. Army Corps of Engineers (USACE) will prepare a Draft Environmental Impact Statement (DEIS) pursuant to Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, for a proposed flood-risk management project in the Puyallup River Basin including the Puyallup River downstream of Electron Dam to

Commencement Bay, the Carbon River and the White River downstream of Mud Mountain Dam. This study was requested by Pierce County (the local sponsor), Washington, because of the potential for significant flooding within the Puyallup River Basin.

A DEIS is being prepared because of the potential for impacts on environmental resources, particularly salmonid habitat, and the intense public interest already demonstrated in addressing the flooding problems of the Puyallup, Carbon and White Rivers.

The Puyallup River General Investigation (GI) DEIS for the Puyallup River Basin is being conducted under the authority of Section 209 of the Flood Control Act of 1962, Public Law 87-874. That section authorized a comprehensive study of Puget Sound, Washington, and adjacent waters including tributaries, in the interest of flood control, navigation, and other water uses and related land resources.

**DATES:** Persons or organizations wishing to submit study scoping comments should do so by October 24, 2011.

Public comment may also be made at the study scoping meeting October 6, 2011 in Fife, Washington (see Scoping Meeting). Notification of scoping meeting times and locations will be sent to all agencies, organizations, and individuals on the project mailing list.

**ADDRESSES:** All comments on the proposed project, requests for inclusion on the mailing list and future documents should be sent to: Amanda Ogden, Study Environmental Coordinator, Seattle District, U.S. Army Corps of Engineers, P.O. 3755, Seattle, WA 98124-3755, *Attn:* CENWS-PM-ER; telephone (206) 764-3628; fax (206) 764-4467; or e-mail [Amanda.Ogden@usace.army.mil](mailto:Amanda.Ogden@usace.army.mil).

#### **FOR FURTHER INFORMATION CONTACT:**

General questions concerning the proposed action and the DEIS can be directed to: Amanda Ogden, Study Environmental Coordinator (see **ADDRESSES**) or C.J. Klocow, Project Manager, Seattle District, U.S. Army Corps of Engineers, P.O. 3755, Seattle, WA 98124-3755, *Attn:* CENWS-PM-CP; telephone (206) 764-6073; fax (206) 764-4467; or e-mail [Charles.J.Klocow@usace.army.mil](mailto:Charles.J.Klocow@usace.army.mil).

#### **SUPPLEMENTARY INFORMATION:**

**Background.** The Puyallup River basin encompasses a drainage area of approximately 1,040 square miles. Major tributaries include the Carbon and White Rivers. The Puyallup, Carbon and White Rivers drain the northern flank of Mount Rainier. The study area for the DEIS will be the Puyallup River

downstream of Electron Dam to Commencement Bay, the Carbon River and the White River downstream of Mud Mountain Dam.

The purpose of the Puyallup River GI study is to better identify the problems and opportunities that exist to relieve the potential for flooding, reduce flood risks and to develop a flood-risk management plan that fits Federal law and policy and is within the capability of the local sponsor to support their required share of the total project costs.

This is a single-purpose flood-risk management study. The goal of this project is to identify the National Economic Development (NED) plan, the flood-risk management alternative that provides the maximum net economic benefits. In accordance with USACE policy, minimization of ecosystem, cultural, and socio-economic impacts will be significant project considerations (Reference: ER 1105-2-100, Planning Guidance Notebook). The local sponsor may request the recommendation of a plan other than the NED, the Locally Preferred Plan (LPP).

**Alternatives.** In the reconnaissance phase for the Puyallup River GI study, USACE identified two alternative courses of action for further analysis which are outlined below.

**Alternative 1—No Action:** Allow the current levee system to remain in place without a major system-wide levee system upgrade. Individual jurisdictions would continue to operate, maintain, and repair the existing levees, and dams on the Puyallup River and White River would continue present operations for flood reduction.

**Alternative 2:** Construct a coordinated flood-risk management project that would provide critically needed flood-risk management measures at an affordable cost in a reasonable timeframe and that will subsequently be authorized and implemented.

Pierce County and USACE are in the process of developing an array of structural and nonstructural measures for addressing problems and opportunities and for achieving project objectives. These measures will be presented to the public at several workshops in Pierce County and to resource and Tribal groups and agencies over the course of project development.

Some or all of the measures will be combined to form the range of alternatives. In the DEIS, the preferred alternative will be selected based on screening and evaluation of the range of alternatives.

**Scoping.** Public involvement will be sought during scoping, plan formulation, and preparation of the

DEIS in accordance with NEPA procedures. A public scoping process has been started: (1) To clarify which issues appear to be major public concerns, (2) to identify any information sources that might be available to analyze and evaluate impacts, and (3) to obtain public input and determine acceptability for the range of measures to be included within potential alternatives.

This NOI formally commences the scoping process under NEPA. As part of the scoping process, all affected Federal, state, and local agencies; Tribes; the public; and other interested private organizations, including environmental groups, are invited to comment on the scope of the DEIS. Comments are requested regarding issues of concern, project alternatives, potential mitigation measures, probable significant environmental impacts, and permits or other approvals that may be required by any project.

The following key areas have been identified so far to be analyzed in depth in the DEIS:

1. Flooding characteristics (existing and with any project).
2. Impacts to fish habitat and fisheries resources.
3. Impacts to riparian habitat.
4. Impacts to wetlands.
5. Impacts to cultural resources.
6. Impacts to surrounding communities.
7. Impacts to geomorphic processes.

*Scoping Meeting.* Opportunity to comment on the planned study will also be available at the study scoping meeting which is scheduled for October 6, 2011 at the Fife Community Center, 2111 54th Avenue East, Fife, WA, 98424. The scoping meeting will commence at 4 p.m. with an open house, followed by presentations and a formal hearing at 5:30 pm. Details of the meeting time and location will be announced in the local media. Notices will be sent to all agencies, organizations, and individuals on the mailing list.

*Availability of DEIS.* USACE expects to complete preparation of the DEIS and make it available for public review by the fall of 2013.

Dated: September 15, 2011.

**Bruce A. Estok,**

*Colonel, Corps of Engineers, District Commander.*

## DEPARTMENT OF EDUCATION

**RIN 1894-AA01**

### **Race to the Top Fund Phase 3; Correction**

**AGENCY:** Department of Education.

**ACTION:** Proposed Requirements; Correction.

**SUMMARY:** On September 12, 2011, the Secretary of Education (Secretary) published a notice in the **Federal Register** proposing requirements for Phase 3 of the Race to the Top program (RTT-Phase 3 NPR) (76 FR 56183). The RTT-Phase 3 NPR was incomplete and included minor errors. Through this document, we correct the errors and add the information that was unintentionally omitted. Except as corrected by this notice, the RTT-Phase 3 NPR, including the date by which public comments are due, remains unchanged.

**FOR FURTHER INFORMATION CONTACT:**

Meredith Farace, Implementation and Support Unit, 400 Maryland Avenue, SW., Washington, DC 20202-6200. Telephone: (202) 453-6690 or by e-mail: [phase3comments@ed.gov](mailto:phase3comments@ed.gov).

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

**SUPPLEMENTARY INFORMATION:** We make the following corrections to the RTT-Phase 3 NPR:

On page 56183, third column, under **FOR FURTHER INFORMATION CONTACT**, we correct the telephone to read “(202) 453-6690.”

On page 56184, third column, we correct the paragraph that begins with the words “Under the Race to the Top Phase 3 award process proposed in this notice, eligible applicants” by replacing it with the following two paragraphs:

Additionally, the Department will maintain an emphasis in the Race to the Top Phase 3 awards on promoting science, technology, engineering, and mathematics (STEM) education, consistent with the competitive preference priority in the Race to the Top Phase 1 and Phase 2 competitions. In order to meet this requirement, a State will include in its detailed plan and budget for Phase 3 funding how it will allocate a meaningful share of its Phase 3 award to advance STEM education in the State. To do this, eligible applicants will select from among their Phase 2 application: (1) Activities proposed by the State to meet the competitive preference priority; or (2) activities within one or more of the

four core education reform areas that are most likely to improve STEM education.

Under the Race to the Top Phase 3 award process proposed in this notice, eligible applicants would be limited to Race to the Top Phase 2 finalists that did not receive a Phase 2 award, and those eligible applicants could apply for a proportional share of these funds. Race to the Top Phase 3 funding is not at the level of funding that was available for the Race to the Top Phase 1 and Phase 2 competitions. Accordingly, we are proposing that eligible applicants (1) Select from among the activities they proposed to implement in their Phase 2 applications those activities that will have the greatest impact on advancing their overall statewide reform plans, including activities that are most likely to improve STEM education, (2) use Race to the Top Phase 3 funding to support those specific activities, and (3) ensure that such activities are consistent with the ARRA requirement to allocate 50 percent of Race to the Top funds to local educational agencies (LEAs).

On page 56185, third column, we correct paragraph (g) to read as follows:

(g) The State will select activities for funding that are consistent with the commitment to comprehensive reform and innovation that the State demonstrated in its Race to the Top Phase 2 application, including activities that are most likely to improve STEM education.

On page 56186, first column, we correct the paragraph following the estimated State budget amounts chart to read as follows:

Once the Department notifies a qualified applicant of the final amount of funds it is eligible to receive for a Race to the Top Phase 3 award, the applicant must submit a detailed plan and budget describing the activities it has selected from its Race to the Top Phase 2 application that it proposes to implement with Race to the Top Phase 3 funding, including how the State will allocate a meaningful share of its Phase 3 award to advance STEM education in the State. This detailed plan must include an explanation of why the applicant has selected these activities and why the applicant believes such activities will have the greatest impact on advancing its overall statewide reform plan. The plan also must include a description of the State’s process for allocating at least 50 percent of Race to the Top Phase 3 funds to participating LEAs, as required by section 14006(c) of the ARRA. Subgrants to LEAs must be based on their relative shares of funding under Title I, Part A of the ESEA, and LEAs must use these funds in a manner that is consistent with the State’s
