SUPPLEMENTARY INFORMATION: On July 15, 2011, we published two proposed rules in the **Federal Register** (76 FR 41866 through 41927 and 76 FR 41930 through 41956, respectively).

The first rule would implement the new Affordable Insurance Exchanges (“Exchanges”), consistent with Title I of the Patient Protection and Affordable Care Act of 2010 (Pub. L. 111-148) as amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111-152), referred to collectively as the Affordable Care Act. The Exchanges would provide competitive marketplaces for individuals and small employers to directly compare available private health insurance options on the basis of price, quality, and other factors. The Exchanges, which would become operational by January 1, 2014, would help enhance competition in the health insurance market, improve choice of affordable health insurance, and give small businesses the same purchasing clout as large businesses. This proposed rule, “Patient Protection and Affordable Care Act; Establishment of Exchanges and Qualified Health Plans,” is significant in that it proposes—(1) Federal requirements that States must meet if they elect to establish and operate an Exchange; (2) minimum requirements that health insurance issuers must meet to participate in an Exchange and offer qualified health plans (QHPs); and (3) basic standards that employers must meet to participate in the Small Business Health Options Program (SHOP).

The second proposed rule would implement standards for States related

to reinsurance and risk adjustment, and for health insurance issuers related to reinsurance, risk adjustment, and risk corridors consistent with Title I of the Affordable Care Act. Collectively, these programs would mitigate the impact of potential adverse selection and stabilize premiums in the individual and small group markets as insurance reforms and the Exchanges are implemented. These programs are significant in that—(1) The transitional reinsurance program would serve to reduce uncertainty of insurance risk in the individual market by making payments to health plan issuers for high-cost cases; (2) the temporary risk corridor program would serve to protect against uncertainty by limiting the extent of health plan issuer losses and gains; and (3) the permanent risk adjustment program, on an on-going basis, is intended to provide adequate payments to health insurance issuers that attract high-risk populations, such as individuals with chronic conditions.

We believe that rules proposed by HHS and the Treasury on August 17, 2011 (76 FR 51148, 76 FR 51202, and 76 FR 50931, respectively), about eligibility determinations by an Exchange, generate additional insight on the issues raised by the July 15, 2011 proposed rules. Based on this reason, we are extending the comment period for the July 15, 2011 proposed rules to October 31, 2011.

On June 20, 2011, the NANC submitted a report on local number portability (LNP) Best Practice 67. The Report notes that since the inception of LNP, service providers have imposed varying thresholds, or limits, on the quantity of telephone numbers they will port within four business days—the porting interval for non-simple ports. To address these variations, Best Practice 67 recommends a set of standard thresholds and intervals for non-simple ports and “projects”—port requests that involve a large quantity of telephone numbers. The NANC notes that at present, port requests above the service provider’s maximum threshold can result in an undetermined due date that is ultimately negotiated between the old and new service providers. There is currently no industry-wide standard on what is considered a “project” by the old service provider for the purpose of porting numbers. Best Practice 67 addresses this issue. The NANC also recommends revisions to the NANC LNP Provisioning Flows in support of Best Practice 67.

The Commission seeks comment on Best Practice 67 and the proposed provisioning flows. Specifically, the Commission seeks comment on whether the thresholds and processing timelines for non-simple ports and projects are appropriate and whether the Commission should adopt Best Practice 67 as a rule.

This proposed rule implements three of these decisions: the Resolution on Tuna Conservation 2011-2013 (C-11-01), the Resolution Prohibiting Fishing on Data Buoys (C-11-03), and the Resolution Prohibiting the Retention of Oceanic Whitetip Sharks (C-11-10). This action is necessary for the United States to satisfy its obligations as a member of the IATTC.
