

Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are

technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321-4370f), and have concluded this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2-1, paragraph (34)(g), of the Instruction. This rule involves the establishment of a safety zone. An environmental analysis checklist and a categorical exclusion determination are available in the docket where indicated under

ADDRESSES.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1226, 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05-1, 6.04-1, 6.04-6, 160.5; Pub. L. 107-295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add temporary § 165.T11-438 to read as follows:

§ 165.T11-438 IJSBA World Finals; Lower Colorado River, Lake Havasu, AZ

(a) *Location.* The limits of the safety zone will be as follows:

34°28.49' N, 114°21.33' W;
34°28.55' N, 114°21.56' W;
34°28.43' N, 114°21.81' W;
34°28.32' N, 114°21.71' W; along the shoreline to
34°28.49' N, 114°21.33' W.

(b) *Enforcement Period.* This section will be enforced from 6 a.m. through

7 p.m. on October 1, 2011 through October 9, 2011. If the event concludes prior to the scheduled termination time, the Captain of the Port will cease enforcement of this safety zone and will announce that fact via Broadcast Notice to Mariners.

(c) *Definitions.* The following definition applies to this section: *designated representative*, means any commissioned, warrant, or petty officer of the Coast Guard on board Coast Guard, Coast Guard Auxiliary, and local, state, and federal law enforcement vessels who have been authorized to act on the behalf of the Captain of the Port.

(d) *Regulations.* (1) Entry into, transit through or anchoring within this safety zone is prohibited unless authorized by the Captain of the Port of San Diego or his designated representative.

(2) Mariners requesting permission to transit through the safety zone may request authorization to do so from the Patrol Commander (PATCOM). The PATCOM may be contacted on VHF-FM Channel 16.

(3) All persons and vessels shall comply with the instructions of the Coast Guard Captain of the Port or his designated representative.

(4) Upon being hailed by U.S. Coast Guard patrol personnel by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed.

(5) The Coast Guard may be assisted by other federal, state, or local agencies.

Dated: September 17, 2011.

P.J. Hill,

Captain, U.S. Coast Guard, Acting Captain of the Port San Diego.

Coast Guard

33 CFR Part 165

[Docket No. USCG-2010-0842]

RIN 1625-AA00

Safety Zones; Annual Firework Displays Within the Captain of the Port, Puget Sound Area of Responsibility

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is amending our regulations to correct the coordinates for four firework displays. This action is necessary to prevent injury and to protect life and property

of the maritime public from the hazards associated with the firework displays. During the enforcement periods, entry into, transit through, mooring, or anchoring within these zones is prohibited unless authorized by the Captain of the Port, Puget Sound or Designated Representative.

DATES: This rule is effective November 3, 2011.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket USCG–2010–0842 and are available online by going to <http://www.regulations.gov>, inserting USCG–2010–0842 in the “Keyword” box, and then clicking “Search.” They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or e-mail Ensign Anthony P. LaBoy, USCG Sector Puget Sound Waterways Management Division, Coast Guard; telephone 206–217–6323, e-mail SectorPugetSoundWWM@uscg.mil. If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Regulatory Information

The Coast Guard is issuing this final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is unnecessary and contrary to the public interest. This action is a technical amendment to the rule to reflect the appropriate coordinates of these locations. The new coordinates listed below are the actual location that these displays have occurred without comment or objections from the maritime public in past years. This action is also necessary to prevent injury and to protect life and property of the maritime public from the hazards associated with the firework displays.

Basis and Purpose

The coordinates currently codified under this section do not correctly reflect the location of where the displays actually occur. The Coast Guard is amending the coordinates to list the correct coordinates for the locations.

Background

On February 25, 2010 we published a notice of proposed rulemaking (NPRM) entitled Safety Zones; Annual Firework Displays Within the Captain of the Port, Puget Sound Area of Responsibility in the **Federal Register** (75 FR 8566). We received 00 comments on the proposed rule. On June 15, 2010 the Coast Guard published a document in the **Federal Register** (75 FR 33700), establishing safety zones for fireworks displays within the Captain of the Port, Puget Sound Area of Responsibility. That notice provided a table which listed the coordinates of each firework display. The submitted coordinates differed from the actual coordinates for four of the fireworks displays. This rule changes the coordinates listed for four displays to the proper position. During the enforcement periods, entry into, transit through, mooring, or anchoring within these zones is prohibited unless authorized by the Captain of the Port, Puget Sound or Designated Representative.

Discussion of Rule

The Coast Guard is amending 33 CFR 165.1332 to correct coordinates listed for four firework displays that occur annually within the Captain of the Port, Puget Sound Area of Responsibility.

Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under that those Orders.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule would not affect any small entities since this rule does not involve creating any new safety zones but instead amends the current coordinates to reflect the appropriate coordinates of the locations.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offer to assist small entities in understanding the rule so that they can better evaluate its effects on them and participate in the rulemaking process.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have

determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866, as supplemented by Executive Order 13563, and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID,

which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction. This rule involves amending the coordinates of four firework displays codified under 33 CFR 165.1332. An environmental analysis checklist and a categorical exclusion determination are available in the docket where indicated under

ADDRESSES.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165, as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1

■ 2. In § 165.1332, revise the following entries in the table in (a)(1) to read as follows:

- (a) * * *
- (1) * * *

Event name	Event location	Latitude	Longitude
City of Anacortes	Fidalgo Bay	48°30.016' N	122°36.154' W

City of Kenmore Fireworks	Lake Forest Park	47°45.25' N	122°15.75' W
* * *	* * *	* * *	* * *
Vashon Island Fireworks	Quartermaster Harbor	47°24.0' N	122°27.0' W
* * *	* * *	* * *	* * *
Friday Harbor Independence	Friday Harbor	48°32.255' N	123°0.654' W

* * * * *

Dated: September 12, 2011.

S.J. Ferguson,

Captain, U.S. Coast Guard, Captain of the Port, Puget Sound.

[FR Doc. 2011-25344 Filed 10-3-11; 8:45 am]

BILLING CODE 9110-04-P

DEPARTMENT OF THE INTERIOR**National Park Service****36 CFR Part 7**

RIN 1024-AD75

Special Regulations; Areas of the National Park System, Grand Teton National Park, Bicycle Routes, Fishing and Vessels**AGENCY:** National Park Service, Interior.**ACTION:** Final rule.

SUMMARY: This rule designates certain multi-use pathways in Grand Teton National Park (Park) as routes for bicycle use. National Park Service (NPS) regulations require issuance of a special regulation to designate bicycle routes that are located off park roads and outside developed areas. The first two segments of a planned multi-use pathway system have been constructed and are generally located within 50 feet of existing park roads. Separating bicycle traffic from lanes used for motor vehicle travel will reduce real and perceived safety hazards, which will enhance opportunities for non-motorized enjoyment of the park and encourage the use of alternate transportation. This rule also revises NPS special regulations regarding fishing and vessels in certain Park waters to reflect current operating practices and management objectives.

DATES: This regulation is effective November 3, 2011.

FOR FURTHER INFORMATION CONTACT: Gary M. Pollock, Management Assistant, Grand Teton National Park, 307-739-3428.

SUPPLEMENTARY INFORMATION:**Background**

Grand Teton National Park is located in northwest Wyoming and encompasses approximately 310,000 acres. Located just south of Yellowstone National Park, Grand Teton is at the heart of the Greater Yellowstone Ecosystem, and includes the iconic mountains of the Teton Range, the broad valley of Jackson Hole, numerous lakes, and a 40-mile segment of the Snake River. The park was originally

established in 1929, but at that time included only the mountains and several of the lakes at their base. In 1943, Jackson Hole National Monument was established by presidential proclamation, including much of the valley to the east of the mountains. In 1950, Congress combined the 1929 park and the national monument into the present-day national park.

The Park supports diverse and abundant populations of wildlife, and is world renowned for its opportunities to view elk, moose, bison, pronghorn, grizzly and black bears, grey wolves, and coyotes. Other species such as trumpeter swans, bald eagles, and many species of waterfowl and small mammals are also abundant.

Visitors to the Park typically participate in several types of activities, including: scenic touring, viewing wildlife, hiking, mountain climbing, fly fishing, float trips, bicycling, and other forms of recreation consistent with enjoyment of the Park's resources. The Park includes several major developed areas, five campgrounds, almost 200 miles of hiking trails, 140 miles of paved roads, and 70 miles of unpaved roads. Visitation to the Park has remained relatively constant over the last decade averaging approximately 2.5 million recreational visitors, mostly between the months of May and September.

In April 2000, the Park undertook a transportation study to collect basic information regarding transportation issues in the Park. The study subsequently served as a foundation for a transportation planning process that was initiated in September 2001. The Transportation Plan/Final Environmental Impact Statement (FEIS) was released in September 2006. A Record of Decision (ROD) selecting Alternative 3a was signed on March 12, 2007, and a notice of the decision was published in the **Federal Register** on April 24, 2007 (72 FR 20365). A full description of the alternatives that were considered, the environmental impacts associated with the project, and public involvement can be found online at <http://www.nps.gov/grte/parkmgmt/tranplan>.

Although the planning effort and ROD addressed a variety of transportation-related issues, a major focus was on the development of a system of multi-use pathways to improve opportunities for non-motorized activities within the Park. Bicycling has become increasingly popular in the Park, and many visitors and others who commented during the planning process expressed concerns over the risks that are present when bicycles and motor vehicles share the

road. Commenters often noted that this was particularly true for families with young children and visitors who are not experienced bicyclists.

Among the issues that were raised during the planning process were the potential effects of the pathway system on the park's wildlife. Although wildlife is abundant and often visible from park roads, it is well documented that animals respond differently to the presence of pedestrians and bicyclists than they do to motor vehicle traffic. The potential for reducing the effectiveness of habitat and displacing wildlife from areas located near the pathways was a significant concern for many individuals and organizations that commented during the planning process. Furthermore, in light of the Park's abundant wildlife, concerns were raised regarding the potential for surprise and potentially dangerous encounters between bicyclists and large animals, including grizzly bears.

The ROD sets forth the Park's decision for the development of an extended system of multi-use pathways within the park. The system will include 39 miles of pathways between the south park boundary and Colter Bay via the Teton Park Road, as well as a 3-mile segment along the Moose-Wilson Road between the Granite Canyon Entrance and the Laurance S. Rockefeller Preserve. In general, pathways will be constructed within 50 feet of the road, except that the segments between North Jenny Lake Junction and Colter Bay, and along the Moose-Wilson Road will be constructed in very close proximity to the roads, generally within the existing engineered and previously disturbed road corridors.

The preferred alternative in the FEIS, subsequently adopted in the ROD, addressed the concerns regarding wildlife through a combination of research and monitoring, construction phasing, and the requirement that certain portions of the pathway system would be constructed within the existing road corridors. Specifically, the ROD includes a significant emphasis on wildlife research and monitoring to provide a detailed understanding of the effects of pathway development. Monitoring and research activities began in 2007 to provide a pre-construction baseline, and continued through 2010. The phased approach to construction of the pathway system will allow information obtained from the research and monitoring program to be integrated into the design and operation of future pathway segments.

The first phase of pathways was constructed during the summer and fall of 2008. These segments extend from
