k. *Description of Request:* Lower Valley Energy, licensee for the Swift Creek Hydroelectric Project, requests the Commission to amend license Article 408, which, in part, requires a minimum flow release or project inflow, whichever is less, from both of the dams into Swift Creek from 20 cubic feet per second (cfs) during daylight hours from May 1 through September 30 to 5 cfs at all times. Article 408 already requires 5 cfs from October 1 through April 30 at all times (24 hours). Therefore, minimum flow release would be 5 cfs year round. Amendment of Article 408 would also make Article 409 obsolete. Article 409 requires the licensee to limit the rate of change in river flow (ramping rate) at the project when increasing flows from 5 cfs to 20 cfs and when decreasing flows from 20 cfs to 5 cfs. If

an amendment to Article 408 is approved, no changes in minimum flow would occur and no ramping of the project would be necessary.
